

Contents Volume 1

Tuesday, June 3, 2008

Session 1.1: Advanced SAR Technology

- 1.1.1 Advanced Onboard technologies for ISRO's RISAT-1 follow on L-Band Polarimetric SAR mission** 15
Nilesh Desai, Saravana Kumar, Jethabhai Vachhani, Virendra Gujraty, Space Applications Centre (ISRO), India
- 1.1.2 On Space-based Synthetic Aperture Radar Antennas** 19
Cornelis van't Klooster, European Space Agency Estec, The Netherlands
- 1.1.3 One-Bit Digitization for DBF-SAR: Too Good to be True** 23
Christoph Schaefer, Christian Fischer, Michael Völker, EADS Astrium GmbH, Germany
- 1.1.4 A pod with a very long broadband time steered array antenna for PAMIR** 27
Helmut Wilden, Olaf Saalman, Alfred Schmidt, Olaf Peters, Andreas Brenner, FGAN-FHR, Germany

Session 1.2: TerraSAR-X/TanDEM-X Commercial Exploitation (invited)

- 1.2.1 Current mapping and monitoring challenges and potential of high-resolution spaceborne SAR application for emerging nations in equatorial regions**
Rudolf Matindas, TBC Bakosurtanal, Indonesia
Paper not available
- 1.2.2 TerraSAR-X – an introduction to system capabilities, basic products and value-added products**
Jürgen Janoth, Bernd Scheuchl, Nikolaus Faller, Infoterra GmbH, Friedrichshafen, Germany
Paper not available
- 1.2.3 TerraSAR-X high resolution SAR data: Ground motion and mapping applications for infrastructure, oil & gas and public health domain** 31
Oscar Mora, Johanna Granda, Erlinda Biescas, Anne Urdirroz, ALTAMIRA Information, France
- 1.2.4 The Use of Radar in Geospatial Intelligence, Image Analysis**
Tom Last, ImStrat Corporation, Canada
Paper not available

Session 1.3: Polarimetric SAR I

- 1.3.1 Hybrid-Quadrature-Polarity SAR Architecture** 35
Keith Raney, Johns Hopkins University, USA
- 1.3.2 Compact Polarimetric Observation using Phased Array Antenna and Its Case Study for PALSAR** 37
Takashi Fujimura, Tsunekazu Kimura, NEC Corporation, Japan

1.3.3 Requirements for Model-Based Polarimetric Decomposition	41
Jakob van Zyl, Yunjin Kim, Jet Propulsion Laboratory, Motofumi Ariei, California Institute of Technology, USA	

1.3.4 Investigation on the Performance of Compact Polarimetry in SAR Interferometry	45
Marco Lavallo, Domenico Solimini, University of Rome Tor Vergata, Italy; Eric Pottier, IETR UMR CNRS 6164 - Univ. Rennes1, France; Yves-Louis Desnos, ESA/ESRIN, Italy	

Session 1.4: Bistatic, Multistatic and Multi-Satellite SAR I

1.4.1 Bistatic SAR Experiment with the Ingara Imaging Radar: Preliminary Results	49
Alvin Goh, Doug Gray, University of Adelaide, Mark Preiss, Nick Stacy, DSTO, Australia	

1.4.2 Hybrid Bistatic SAR Experiment TerraPAMIR – Geometric Description and Point Target Simulation	53
Ulrich Gebhardt, Forschungsgesellschaft für Angewandte Naturwissenschaften e.V. (FGAN), Otmar Dr. Loffeld, Holger Nies, Center for Sensorsystems (ZESS), University of Siegen, Germany	

1.4.3 Bistatic Experiment Using TerraSAR-X and DLR’s new F-SAR System	57
Stefan Baumgartner, Marc Rodriguez-Cassola, Anton Nottensteiner, Ralf Horn, Rolf Scheiber, Marco Schwerdt, Ulrich Steinbrecher, Robert Metzsig, Markus Limbach, Josef Mittermayer, Gerhard Krieger, Alberto Moreira, German Aerospace Center (DLR), Germany	

1.4.4 A real time simulation model for estimation of position and orientation of two airborne SAR systems platforms in Matlab/Simulink: description, analysis and implementation	61
Giovanni Marino, Matthias Weiß, FGAN, Germany	

Session 2.1: SAR Processing, Image Enhancement, Post Processing, Data Fusion

2.1.1 Onboard Radar Processor of SOSTAR-X	65
Franz Lang-Schnee, Jörg Hippler, Falk Ringel, Dietmar Weber, EADS Deutschland GmbH, Germany	

2.1.2 SAR amplitude filtering using TV prior and its application to building delineation	69
Florence Tupin, Marc Sigelle, Telecom Paris, Loic Denis, Ecole Nationale Supérieure de Chimie Physique Electronique; Jerome Darbon, Epita Research and Development Laboratory; Céline Tison, CNES, France	

2.1.3 Wave Number Domain Processing on Squinted Spotlight SAR Data of the SOSTAR-X Sensor	73
Jörg Hippler, EADS Deutschland GmbH, Germany	

2.1.4 Fast Factorized Backprojection as Applied to X-Band Data for Curved Flight Paths	77
Michael Brandfass, EADS Deutschland GmbH, Germany	

2.1.5 Ship traffic monitoring using multi-polarisation satellite SAR images combined with AIS reports	81
Camilla Brekke, Oystein Hellenen, Richard Olsen, FFI; Dan Johan Weydahl, Norwegian Defence Research Establishment (FFI), Norway	

Session 2.2: TerraSAR-X Commissioning Phase Results (invited)

2.2.1 TerraSAR-X Mission Status

Stefan Buckreuss, German Aerospace Center (DLR), Germany

Paper not available

2.2.2 TerraSAR-X Instrument Characterization / Verification 85

Robert Metzger, Benjamin Bräutigam, Donata Polimeni, Johannes Böer, Markus Bachmann,

Josef Mittermayer, German Aerospace Center (DLR), Germany

Paper not available

2.2.3 TerraSAR-X System Performance & Command Generation 87

Josef Mittermayer, Ulrich Steinbrecher, Adriano Meta, Nuria Tous-Ramon, Steffen Wollstadt,

Marwan Younis, Jose Marquez, Daniel Schulze, Carlos Ortega, German Aerospace Center (DLR),

Germany

2.2.4 TerraSAR-X Calibration Results 91

Marco Schwerdt, Benjamin Bräutigam, Markus Bachmann, Björn Döring, German Aerospace Center,

Germany

2.2.5 TerraSAR-X SAR Payload Data Processing: Results from Commissioning and Early Operational Phase 95

Helko Breit, Birgit Schättler, Thomas Fritz, Heiko Damerow, Egbert Schwarz, German Aerospace

Center; Ulrich Balss, Technical University of Munich, Germany

2.2.6 TerraSAR-X Image Products: Characterization and Verification 99

Thomas Fritz, Helko Breit, Birgit Schättler, Marie Lachaise, German Aerospace Center (DLR),

Michael Eineder, German Aerospace Center (DLR); Ulrich Balss, Technical University of Munich,

Germany

Session 2.3: Polarimetric SAR II

2.3.1 Analysis of Spatial Statistics in Polarimetric SAR Data Using Wavelet Signatures 103

Gianfranco De Grandi, European Commission, Italy; Attilio Gambardella, Maurizio Migliaccio,

Università Napoli Parthenope, Italy; Jan Kropacek, European Commission, Czech Republic;

Thomas Ainsworth, Naval Research Laboratory, USA

2.3.2 Polarimetric SAR Coherent Change Detection 107

Mark Preiss, Nick Stacy, DSTO, Australia

2.3.3 Statistical evaluation and bias removal of multi-look effect on En-tropy/Alpha/Anisotropy of polarimetric target decomposition 111

Jong-Sen Lee, Thomas Ainsworth, John Kelly, Naval Research Laboratory, USA;

Carlos López-Martínez, Universitat Politècnica de Catalunya (UPC), Spain

2.3.4 On Scattering Model Decomposition with Pol-InSAR data 115

Hiroyoshi Yamada, Hitoshi Onoda, Yoshio Yamaguchi, Niigata University, Japan

2.3.5 Recent Advances in Polarimetric and Interferometric Radar Remote Sensing 119

Wolfgang Boerner, UIC Chicago, USA

Session 2.4: Bistatic, Multistatic and Multi-Satellite SAR II

- 2.4.1 Performance Analysis of the Validity Constraints of the Bistatic SAR Processing** 123
Qurat Ul-Ann, Otmar Dr. Loffeld, Holger Nies, Robert Wang, Koba Natroshvili, Stefan Knedlik,
Center for Sensorsystems (ZESS), University of Siegen, Germany
- 2.4.2 A Numerical Solution for Azimuth Invariant Bistatic SAR Processing Using Geometry-based Bistatic Formula** 127
Jinshan Ding, Otmar Dr. Loffeld, Center for Sensorsystems (ZESS), University of Siegen, Germany;
Zhenhua Zhang, National Lab for Radar Signal Processing; Zheng Bao, Xidian University, P. R. China
- 2.4.3 Bistatic Experiment with Ultra-Wideband VHF-band Synthetic-Aperture Radar** 131
Lars Ulander, Björn Flood, Per-Olov Fröling, Anders Gustavsson, Tommy Jonsson,
Johan Rasmusson, Gunnar Stenström, FOI, Sweden; Arnold Barmettler, Erich Meier
University Zurich, Switzerland
- 2.4.4 Temporal Alignment and Doppler Centroid Estimation in Opportunistic Bistatic SAR Systems** 135
Paco Lopez-Dekker, Jordi Mallorqui, Pau Serra-Morales, Universitat Politecnica de Catalunya
(UPC), Spain
- 2.4.5 Swiss Airborne Monostatic and Bistatic Dual-Pol SAR Experiment at the VHF-Band** 139
Arnold Barmettler, Lukas Zuberbühler, Erich Meier, University Zurich, Switzerland;
Lars Ulander, Anders Gustavsson, FOI, Sweden; Peter Wellig, armasuisse, Switzerland

Session 3.1: Near-Field Synthetic Apertur Approaches for Security Applications (invited)

- 3.1.1 Interferometric Focussing for the Imaging of Humans** 143
Sebastian Bertl, Alexander Dallinger, Juergen Detlefsen, Technische Universitaet Muenchen,
Lehrstuhl fuer Hochfrequenztechnik, Germany
- 3.1.2 3D SAR Processing for a Fast Scanning Millimetre-Wave Short Range Imaging System** 147
Frank Gumbmann, University of Erlangen-Nuremberg, Germany
- 3.1.3 Millimetre Wave Near Field SAR Scanner for Concealed Weapon Detection** 151
Manfred Haegelen, Helmut Essen, Gunnar Briese, FGAN-FHR; Axel Tessmann, Fraunhofer IAF,
Germany
- 3.1.4 A Concept of Microwave System for the Inspection of People and Luggage** 155
Igor Gorshkov, Ivan Grokhotkov, APSTEC Ltd.; Valery Averianov, Researcher, Russia;
Andrey Kuznetsov, Director of the Department; Alexey Evsenin, Researcher, KRI, Russia
- 3.1.5 Near-field microwave imaging radiometers for security applications** 159
Markus Peichl, Stephan Dill, Matthias Jirousek, Helmut Suess, German Aerospace Centre (DLR),
Germany
- 3.1.6 Stand-off detection of suspicious concealed objects in centimetre- and millimetre-wave range using sampling phased array principle and sparse array** 163
Roman Pinchuk, Christoph Sklarczyk, Andrey Bulavinov, Michael Kröning, Fraunhofer-IZFP,
Germany

Session 3.2: First Scientific TerraSAR-X Results (invited)

- 3.2.1 Crop characterisation at X-band Pol-InSAR** 165
Irena Hajnsek, Konstantinos Papathanassiou, German Aerospace Center, Germany
Paper not available
- 3.2.2 Coherent Scatterers (CSs) Detection in TerraSAR-X Data** 167
Luca Marotti, Rafael Schneider, Konstantinos Papathanassiou, Irena Hajnsek, German Aerospace Center (DLR), Oberpfaffenhofen, Germany
Paper not available
- 3.2.3 Monitoring Alpine Glacier activity by a combined use of TerraSAR-X images and continuous GPS measurements – the Argentière glacier experiment** 169
Emmanuel Trouve, Ivan Petillot, Philippe Bolon, Université de Savoie, Michel Gay, INPG, Lionel Bombrun, Images and Signals Laboratory; Jean-Marie Nicolas, Florence Tupin, GET – Télécom Paris; Andrea Walpersdorf, Nathalie Cotte, Université Joseph Fourier, France; Irena Hajnsek, Martin Keller, German Aerospace Center (DLR) Oberpfaffenhofen, Germany
- 3.2.4 Use of TerraSAR-X data for oceanography** 173
Susanne Lehner, Johannes Schulz-Stellenfleth, Stephan Brusch, Xiao Ming Li, German Aerospace Center (DLR), Germany
- 3.2.5 Extraction of water and flood areas from SAR data** 177
Thomas Hahmann, Sandro Martinis, André Twele, Achim Roth, German Aerospace Center (DLR); Manfred Buchroithner, Dresden University of Technology, Germany

Session 3.3: Polarimetric SAR III

- 3.3.1 Pol-SAR time series for soil moisture estimation under vegetation** 181
Thomas Jagdhuber, Irena Hajnsek, Helmut Schoen, Konstantinos Papathanassiou, German Aerospace Center, Germany
- 3.3.2 Recent advances in POL(in)SAR remote sensing & stress-change monitoring of wetlands with applications to the Suncheon Bay Tidal Flats** 185
Ji-Eun Kim, Seoul National University, Korea; Sang-Eun Park, University of Rennes 1, France; Duk-jin Kim, Korea Aerospace Research Institute (KARI), Korea; Wolfgang Boerner, UIC Chicago, USA; Wooil Moon, University of Manitoba, Winnipeg, Canada
- 3.3.3 Investigation of Multiple CSs inside a Resolution Cell by means of PolInSAR** 189
Koichi Iribe, Rafael Schneider, Konstantinos Papathanassiou, Irena Hajnsek, German Aerospace Center, Oberpfaffenhofen, Germany
- 3.3.4 POLSAR Image Analysis of Wetlands Using Fully Polarimetric Quad-SAR Data** 193
Yoshio Yamaguchi, Hiroyoshi Yamada, Yuki Yajima, Ryoichi Sato, Niigata University, Japan; Wolfgang Boerner, UIC Chicago, USA
- 3.3.5 Pol-InSAR Simulations in Forest Bistatic Scattering** 197
Ludovic Villard, Cooperation between ONERA and DLR, France; Pierre Borderies, ONERA, France; Konstantinos Papathanassiou, Irena Hajnsek, German Aerospace Center, German Aerospace Center (DLR) Oberpfaffenhofen, Germany
- 3.3.6 Extinction estimation over land ice using long-wavelength Pol-InSAR** 201
Jayanti Sharma, Irena Hajnsek, Konstantinos Papathanassiou, German Aerospace Center, Germany

Session 3.4: Inverse and Circular SAR; SAR Simulation

3.4.1 GMTI Systems Simulation using the SAR Simulation Tool PIRDIS	205
Jochen Meyer-Hilberg, Christoph Neumann, Hermine Senkowski, EADS Deutschland GmbH, Germany	
3.4.2 A refined Micro-Doppler analysis of pedestrians in ISAR imaging	209
Antoine Ghaleb, Luc Vignaud, ONERA, France; Jean-Marie Nicolas, GET – Télécom Paris, France	
3.4.3 Comparison of SAR simulation concepts for the analysis of high-resolution SAR data	213
Horst Hammer, FGAN, Germany; Timo Balz, Wuhan University, P. R. China; Uwe Soergel Ulrich Thoennessen, FGAN-FOM, Uwe Stilla, Technische Universitaet Muenchen (TUM), Germany	
3.4.4 Assessment of physical limitations of High Resolution on targets at X-band from Circular SAR experiments	217
Hubert Cantalloube, Elise Colin, ONERA, France	
3.4.5 First Results on VHF-band SAR Imaging using Circular Tracks	221
Per-Olov Frörlind, Lars Ulander, Anders Gustavsson, FOI, Sweden	
3.4.6 MOCEM: An 'all in one tool' to simulate SAR image	225
Christian Cochin, DGA, France; Daniel Le Hellard, Franck Aubineau, Philippe Gosselin, Alyotech – Cril Technology, France	

Contents Volume 2

Wednesday, June 4, 2008

Session 4.1: Low Frequency SAR for Forest Mapping: State of the Art and Challenges in Spaceborne Implementation (invited)

- 4.1.1 Derivation of mission requirements for long-wavelength forest biomass missions 17**
Malcolm Davidson, ESA/ESTEC, The Netherlands
Paper not available
- 4.1.2 PALSAR L-band Polarimetry – Two years experiences for calibration 19**
Masanobu Shimada, JAXA, Japan; Masato Ohki, Japan Aerospace Exploration Agency, Japan
- 4.1.3 Mapping Ionospheric TEC using Faraday Rotation in Full-Polarimetric L-Band SAR Data 23**
Franz Meyer, University of Alaska Fairbanks; Jeremy Nicoll, Alaska Satellite Facility, USA
- 4.1.4 Quantifying Temporal Decorrelation over Boreal Forest at L- and P-band 27**
Seung-Kuk Lee, Florian Kugler, Konstantinos Papathanassiou, Irena Hajnsek, German Aerospace Center (DLR), Oberpfaffenhofen, Germany
- 4.1.5 Advanced Concepts for Ultra-Wide-Swath SAR Imaging 31**
Gerhard Krieger, Nicolas Gebert, Marwan Younis, Federica Bordoni, Anton Patyuchenko, Alberto Moreira, German Aerospace Center (DLR), Germany

Session 4.2: Missions: RADARSAT-2, COSMO-SkyMed, Cassini

- 4.2.1 The Cassini Radar Investigation 35**
Stephen Wall, California Institute of Technology, USA; Enrico Flamini, Agenzia Spaziale Italiana, Italy
- 4.2.2 RADARSAT-2 Program Update 39**
Daniel De Lisle, Canadian Space Agency, Canada
- 4.2.3 The Cosmo SkyMed Satellite Constellation for Earth Observation and applications 43**
Luciana Di Domenico, e-GEOS S.p.A.; Federica Mastracci, Telespazio, Italy
Paper not available
- 4.2.4 Operational services and applications based on the Integrated use of satellite imagery and geospatial information 45**
Luciana Di Domenico, e-GEOS S.p.A.; Federica Mastracci, Telespazio, Italy
Paper not available
- 4.2.5 RADARSAT-2 Mission Status: Capabilities Demonstrated and Image Quality Achieved 47**
Alan Thompson, Anthony Luscombe, Kenneth James, Peter Fox, MDA, Canada
- 4.2.6 RADARSAT-2 SAR Imaging Performance and Calibration 51**
Pierre Le Dantec, Kenneth James, Alan Thompson, Peter Fox, MDA Geospatial Services, Canada

Session 4.3: New Techniques in POLInSAR I (invited)

4.3.1 Compact PolInSAR and Ionosphere	55
Pascale Dubois-Fernandez, My-Linh Truong-Loi, Sebastien Angelliaume, ONERA, Jean-Claude Souyris, CNES, France	
4.3.2 Frequency and Bandwidth Effects in Pol-InSAR Forest Height Estimation	
Florian Kugler, Seung-Kuk Lee, Konstantinos Papathanassiou, Irena Hajsek, German Aerospace Center (DLR), Oberpfaffenhofen, Germany	
<i>Paper not available</i>	
4.3.3 Early results in forest conditions from a single-pass L-Band airborne PolInSAR system	59
Bryan Mercer, Parivash Lumsdon, Intermap Technologies Corp., Canada	
4.3.4 Coherence Tomography for Boreal Forest: Comparison with HUTSCAT Scatterometer Measurements	63
Jaan Praks, Martti Hallikainen, Helsinki University of Technology (TKK), Finland; Florian Kugler, Konstantinos Papathanassiou, German Aerospace Center, Germany	
4.3.5 PolInSAR Signatures of Alpine Snow	67
Keith Morrison, Univ. of Cranfield, United Kingdom; Helmut Rott, Univ. of Innsbruck, Austria; Thomas Nagler, Environmental Earth Observation IT GmbH, Austria; Pau Prats, German Aerospace Center (DLR, Germany; Helge Rebhan, Patrick Wursteisen, ESA ESTEC Noordwijk, The Netherlands	

Session 4.4: Three-dimensional SAR Techniques I (invited)

4.4.1 A robust multibaseline sector interpolator for 3D SAR imaging	69
Fabrizio Lombardini, Matteo Pardini, Lucio Verrazzani, University of Pisa, Italy	
4.4.2 Tomographic Focusing by Combining Time-Domain Back-Projection and Multi-Looking Based Focusing Techniques	73
Othmar Frey, Erich Meier, University Zurich, Switzerland	
4.4.3 A Comparison of L-band and P-band Repeat Pass Interferometry at La Selva	77
Scott Hensley, Bruce Chapman, Sassan Saatchi, Jet Propulsion Laboratory, California Institute of Technology, USA; Paul Siqueira, University of Massachusetts, USA	
<i>Paper not available</i>	
4.4.4 Interferometric Methods for 3-D Target Reconstruction with Multi-Pass Circular SAR	79
Emre Ertin, Randy Moses, Lee Potter, Ohio State University, USA	
4.4.5 Multifrequency 3-D Imaging of Tropical Forest using Polarization Coherence Tomography	83
Shane Cloude, AEL Consultants, United Kingdom	

Session 5.1: Sub-Surface Imaging and Sounding I (invited)

5.1.1 Two years of MARSIS observations	87
Wlodek Kofman, Université de Grenoble/CNRS, France; Jeffrey Plaut, Jet Propulsion Laboratory, USA; Ali Safaenili, JPL, USA; Giovanni Picardi, University of Rome La Sapienza, Italy	

5.1.2 Surface echo reduction by clutter simulation: Application to the Marsis data	91
Alain Herique, Wlodek Kofman, Université de Grenoble/CNRS, France; Jean-Francois Nouvel ONERA, France; Ali Safaeinili, JPL, USA	
5.1.3 Dual Frequency and Multi-Receiver Radars for Sounding and Imaging Polar Ice Sheets	95
Fernando Rodriguez-Morales, University of Kansas, Prasad Gogineni, Carl Leuschen, Kiran Marathe, Jilu Li, John Ledford, Center For Remote Sensing Of Ice Sheets; Ken Jezek, The Ohio State University, Christopher Allen, Victor Jara, University of Kansas; Anthony Hoch, University of Kansas, USA	
5.1.4 Global Ice Sheet Mapping Orbiter Concept: Airborne Experiments	99
Ken Jezek, The Ohio State University, Prasad Gogineni, Center For Remote Sensing Of Ice Sheets; Xiaoqing Wu, Vexcel Corporation; Ernesto Rodriguez, Tony Freeman, Jet Propulsion Laboratory, California Institute of Technology; Fernando Rodriguez-Morales, Anthony Hoch University of Kansas; John Sonntag, E.G.&G. Corporation; Richard Forster, University of Utah, USA	
5.1.5 Implementation and test of an airborne P-band ice sounding radar	103
Jorgen Dall, Steen Kristensen, Viktor Krozer, Carlos Hernández, Jens Vidkjaer, Anders Kusk, Jan Balling, Niels Skou, Sten Søjbjerg, Erik Christensen, Technical University of Denmark, Denmark	

Session 5.2: Next Generation SAR and Future Missions

5.2.1 Lidar/InSAR Synergism for Earth Science Applications	107
Tom Farr, Eric Rignot, Sassan Saatchi, Marc Simard, Robert Treuhaft, Jet Propulsion Laboratory, California Institute of Technology, USA	
5.2.2 CoReH2O – A Ku- and X-band SAR mission for snow and ice monitoring	111
Helmut Rott, Univ. of Innsbruck, Austria; Don Cline, NOAA-NOHRS Center, USA; Claude Duguay, University of Waterloo, Canada; Richard Essery, University of Edinburgh, UK; Christian Haas, Alfred Wegener Institute for Polar and Marine Research, Germany; Giovanni Macelloni, IFAC-CNR Firenze, Italy; Eirik Malnes, NORUT Tromsø, Norway; Jouni Pulliainen, Finnish Meteorological Inst., Finland; Helge Rebhan, ESA ESTEC Noordwijk, The Netherlands; Simon Yueh, JPL-CalTech, USA	
5.2.3 Deformation, Ecosystem Structure and Dynamics of Ice (DESDynI)	115
Tony Freeman, Andrea Donnellan, Paul Rosen, Diane Evans, Jim Graf, Adam Loverro, Robert Treuhaft, Robert Oberto, William Johnson, Marc Simard, Tom Farr, Eric Rignot, Ronald Kwok, Xiaoqing Pi, Jet Propulsion Laboratory, California Institute of Technology, USA	
5.2.4 A SAR Concept for the German Lunar Orbiting Mission	119
Bernhard Grafmueller, EADS Astrium GmbH, Germany	
5.2.5 ESA's SAR Technology and Future Mission Concept Developments	123
Chung-Chi Lin, Florence Hélière, Paolo Bensi, Alan Thompson, Miguel Aguirre, Christopher Buck, Michael Ludwig, Martin Suess, Nicolas Le Gallou, Marinella Aloisio, Cyril Mangenot, Cornelis van't Klooster, Peter Rinous, Julian Santiago-Prowald, European Space Agency (ESTEC), The Netherlands	
5.2.6 Ka-Band SAR for Spaceborne Applications based on Scan-on-Receive Techniques	127
Michael Ludwig, Salvatore D'Addio, Paula Saameno-Perez, ESA, The Netherlands	

Session 5.3: New Techniques in POLInSAR II (invited)

- 5.3.1 Polarimetric Temporal Stability of urban GB-SAR measurements** 131
Luca Pipia, Xavier Fabregas, Carlos López-Martínez, Albert Aguasca, Jordi Mallorqui, Universitat Politecnica de Catalunya (UPC), Spain
- 5.3.2 Multi-aspect POL-InSAR 3D Urban Scene Reconstruction at L-Band** 135
Stefan Sauer, Laurent Ferro-Famil, University of Rennes 1, France; Andreas Reigber, German Aerospace Center, Microwaves and Radar Institute, Oberpfaffenhofen-Wessling, Germany; Eric Pottier, University of Rennes 1, France
- 5.3.3 Study of Sea Clutter Influence in Ship Classification Algorithms based on Polarimetric SAR Inteferometry** 139
Gerard Margarit, Jordi J. Mallorqui, Remote Sensing Lab. (RSLab), Universitat Politècnica de Catalunya, Barcelona, Spain
- 5.3.4 Recent Advances in the Derivation of POL-inSAR Statistics: Study and Applications** 143
Laurent Ferro-Famil, Maxim Neumann; University of Rennes 1, France

Session 5.4: Three-dimensional SAR Techniques II (invited)

- 5.4.1 3D Urban Remote Sensing using Spectral Analysis Techniques applied to L-Band Dual-baseline POL-InSAR Images** 147
Stefan Sauer, Laurent Ferro-Famil, University of Rennes 1, France; Andreas Reigber, German Aerospace Center, Microwaves and Radar Institute, Oberpfaffenhofen-Wessling, Germany; Eric Pottier, University of Rennes 1, France
- 5.4.2 3D subsurface SAR for humanitarian demining** 151
Motoyuki Sato; Tohoku University, Japan; Kazunori Takahashi, BAM, Germany
- 5.4.3 Bistatic 3D subsurface radar imaging** 155
Naoki Hayashi, Motoyuki Sato, Tohoku University, Japan
- 5.4.4 A LMMSE approach to 3D SAR Focusing** 159
Gianfranco Fornaro, Antonio Pauciullo, IREA, CNR, Italy
- 5.4.5 Very high resolution SAR interferometry of urban areas** 163
Andreas Brenner, Ludwig Roessing, Wolfram Bürger, FGAN-FHR, Germany

Session 6.1: Sub-Surface Imaging and Sounding II (invited)

- 6.1.1 Radar Sounder: Cross-Track Polarimetric Selectivity** 167
Keith Raney, Johns Hopkins University, USA
- 6.1.2 Surface Clutter Suppression Techniques for Ice Sounding Radars: Analysis of Airborne Data** 171
Rolf Scheiber, Pau Prats, German Aerospace Center (DLR), Germany; Florence Hélière, ESA/ESTEC, The Netherlands
- 6.1.3 Polarisation Effects in Space-borne Ice Sounding Configurations**
Konstantinos Papathanassiou, Irena Hajnsek, Rafael Schneider, German Aerospace Center (DLR) Oberpfaffenhofen, Germany
Paper not available

6.1.4 Radar sounders for Earth and the Planets	175
David Hall, Martin Cohen, EADS Astrium; Nicholas Walker, eOsphere Ltd, UK; Florence Hélière, Arno Wielders, European Space Agency (ESTEC), The Netherlands	

Session 6.2: Sentinel-1 I (invited)

6.2.1 Sentinel-1 ESA's New European Radar Observatory	179
Evert Attema, Malcolm Davidson, Nicolas Floury, Guido Levrini, ESA/ESTEC, The Netherlands; Betlem Rosich, ESA/ESRIN, Italy; Bjorn Rommen, ESTEC/EOP-FTC; Paul Snoeij, ESA, The Netherlands	
6.2.2 Sentinel-1 Radar Interferometry Applications	183
Francesco De Zan, Andrea Monti Guarnieri, Fabio Rocca, Stefano Tebaldini, Politecnico di Milano, Italy	
6.2.3 Sentinel-1 Land Applications based on Multi-temporal Data Acquisitions	187
Christiana Schmullius, Friedrich-Schiller-University Jena, Germany <i>Paper not available</i>	
6.2.4 Sentinel-1 Ship Monitoring Applications	189
Harm Greidanus, European Commission Joint Research Centre, Italy; Evert Attema, ESA, The Netherlands	
6.2.5 Sentinel-1 Mission Analysis	193
Andrea Pietropaolo, Michelangelo L'Abbate, Claudio Bruno, Thales Alenia Space S.p.A., Italy	

Session 6.3: Urban Remote Sensing (invited)

6.3.1 Registration of metric resolution SAR and Optical images in urban areas	197
Gabrielle Lehureau, Florence Tupin, GET/Telecom Paris; Céline Tison, CNES; Guillaume Oller, Magellium; David Petit, Magellium, France	
6.3.2 Simulation of Radar Reflection at Man-Made Objects and its Benefits for Persistent Scatterer Interferometry	201
Stefan Auer, Stefan Gernhardt, Stefan Hinz, Remote Sensing Technology, Technische Universität München; Nico Adam, Richard Bamler, German Aerospace Center (DLR), Germany	
6.3.3 Circular SAR imagery for urban remote sensing	205
Helene Oriot, Hubert Cantalloube, ONERA, France	
6.3.4 Modelling and Analysing InSAR Phase Profiles at Building Locations in Multi-Aspect and Multi-Resolution Data	209
Antje Thiele, Ulrich Thoennesen, Uwe Soergel, Karsten Schulz, FGAN-FOM, Germany	
6.3.5 Analysis of building dimension estimation accuracy from SAR shadow information	213
David Blacknel, Cranfield University; Robert Hill, Christopher Moate, QinetiQ, United Kingdom	

Session 6.4: Bistatic SAR I (invited)

- 6.4.1 Progress of Hybrid Bistatic SAR: Synchronization Experiments and First Imaging Results** 217
Thomas Espeter, Ingo Walterscheid, Andreas Brenner, FGAN-FHR; Jens Klare, FGAN;
Christoph Gierull, DRDC Ottawa, c/o FGAN-FHR; Joachim Ender, FGAN e. V.;
Otmar Dr. Loffeld, Center for Sensorsystems (ZESS), University of Siegen, Germany
- 6.4.2 Spaceborne Bistatic Radargrammetry: a robust method for DEM generation** 221
Antonio Moccia, Alfredo Renga, Università di Napoli “Federico II”, Italy
- 6.4.3 Simulation based Optimization of Bi- and Multistatic SAR-Missions** 225
Marc Kalkuhl, Wolfgang Wiechert, University of Siegen; Holger Nies, Otmar Dr. Loffeld Center
for Sensorsystems (ZESS), University of Siegen, Germany
- 6.4.4 A hybrid SAR processing method for data collected using a stationary bistatic receiver** 229
Ishuwa Sikaneta, DRDC Ottawa, Canada
- 6.4.5 A Review of Point Target Spectra for Bistatic SAR Processing** 233
Yew Lam Neo, DSO National Labs, Singapore; Frank Wong, MacDonald, Dettwiler and
Associates Ltd; Ian Cumming, University of British Columbia, Canada

Session 7.1: Calibration and Verification I

- 7.1.1 Permanent Scatterers for SAR Sensor Calibration** 237
Paola Rizzoli, Davide Giudici, Davide D'Aria, Aresys; Andrea Monti Guarnieri, Fabio Rocca,
Politecnico di Milano; Betlem Rosich, ESA/ESRIN, Italy
- 7.1.2 Calibration of longer wavelength polarimetric SARs** 241
Tony Freeman, Jet Propulsion Laboratory; Thomas Ainsworth, Naval Research Laboratory, USA
- 7.1.3 Compact Polarimetry at longer wavelengths – calibration** 245
Tony Freeman, Jet Propulsion Laboratory, USA; Pascale Dubois-Fernandez, My-Linh Truong-Loi,
ONERA, France
- 7.1.4 A Permanent Response SAR Transponder for Monitoring Ground Targets and Features** ... 249
David Hounam, German Aerospace Center (DLR), Germany; Harold Zwick, Bernhard Rabus,
MDA, Canada
- 7.1.5 A New Concept for SAR Image Quality Assessment Realizing Bar Patterns in SAR Images** 253
Karsten Schulz, Antje Thiele, Ulrich Thoennesen, Thomas Ritter, FGAN-FOM;
Andreas Brenner, FGAN-FHR, Germany

Session 7.2: Sentinel-1 II (invited)

- 7.2.1 The C-SAR Instrument Design & Performance for the GMES Sentinel-1 Mission** 257
Friedhelm Rostan, Sebastian Riegger, Wolfgang Pitz, EADS Astrium Friedrichshafen, Germany;
Renato Croci, Thales Alenia Space Italia; Ramon Torres, ESA – ESTEC, The Netherlands
- 7.2.2 Next Generation CORE Radar Electronics Subsystem for Sentinel-1** 261
Michael Hutchinson, Les Griffiths, Astrium Ltd; Eric Mak, EADS Astrium, United Kingdom

7.2.3 Electrical Architecture of the SENTINEL-1 SAR Antenna Subsystem	265
Uwe Schönfeldt, Harald Braubach, EADS Astrium GmbH, Germany	
7.2.4 Thermo-Mechanical Architecture of the SENTINEL-1 SAR Antenna	269
Mathias Alberti, EADS Astrium GmbH, Germany	

Session 7.3: Advanced SAR Instruments, Modes and Processing

7.3.1 Onera Drive Project	273
Jean-Francois Nouvel, Olivier Ruault Du Plessis, ONERA, France; Jan Svedin, Andreas Gustafsson, FOI, Sweden	
7.3.2 TerraSAR-X TOPSAR and ScanSAR comparison	277
Adriano Meta, Pau Prats, Ulrich Steinbrecher, Josef Mittermayer, Rolf Scheiber, German Aerospace Center (DLR), Germany	
7.3.3 Interference covariance matrix estimation for a Multi-Channel Synthetic Aperture Radar	281
Matteo Sedehi, Marta Bucciarelli, Diego Cristallini, Simona Scolamiero, Pierfrancesco Lombardo, University of Rome La Sapienza, Italy	
7.3.4 A new approach for reconfigurable SAR system using space-time coding	285
Junghyo Kim, Thomas Fuegen, Werner Wiesbeck, IHE, University of Karlsruhe, Germany	
7.3.5 Dual-polarized Patch Antenna Array for High Resolution Wide Swath SAR Applications	289
Malgorzata Switka, Gdansk University of Technology, Poland; Philip Shutie, EADS Astrium, Germany	

Session 7.4: Bistatic SAR II (invited)

7.4.1 A Special Point Target Reference Spectrum for Spaceborne/airborne Configuration bistatic SAR processing	293
Robert Wang, Otmar Loffeld, Holger Nies, Amaya Medrano Ortiz, Stefan Knedlik, Center for Sensorsystems (ZESS), University of Siegen, Germany	
7.4.2 Space-Surface Bistatic SAR topology and its impact on image formation	297
Michail Antoniou, Rajesh Saini, Rui Zuo, Mikhail Cherniakov, University of Birmingham, United Kingdom	
7.4.3 Bistatic Interferometry using Fixed Receiver Configurations	301
Sergi Duque, Paco Lopez-Dekker, Juan Carlos Merlano, Jordi Mallorqui, Antoni Broquetas, Universitat Politecnica de Catalunya (UPC), Spain	
7.4.4 Analysis and Extension of Loffeld's Bistatic Formula for the Spaceborne/Airborne Configuration	305
Robert Wang, Otmar Loffeld, Holger Nies, Qurat Ul-Ann, Amaya Medrano Ortiz, Stefan Knedlik, Center for Sensorsystems (ZESS), University of Siegen, Germany	
7.4.5 First polarimetric validation and results on the bistatic scattering by a set of cylinders using a forest scattering model	309
Elise Colin, ONERA; Laetitia Thirion Lefevre, SONDRRA, France	

Contents Volume 3

Wednesday, June 4, 2008, Poster Session

P01: Spaceborne, Airborne and UAV SAR

- P01.01 Remote Sensing at Millimetre Waves with the MEMPHIS Synthetic Aperture Radar 19**
Helmut Essen, Manfred Haegelen, Hartmut Schimpf, Thorsten Brehm, FGAN, Germany
- P01.02 Study on airship imaging radar based on aperture synthesis antenna 23**
Yingni Hou, Daojing Li, Jianfeng Yin, Chinese Academy of Science; Wen Hong, National Key Laboratory of Microwave Imaging Technology, P. R. China
- P01.03 Data Collection Campaign with MARSE Radar for VHR SAR imagery 27**
Luc Bosser, Didier Le Foll, Thales Systemes Aeroportes, France

P02: SAR Technology

- P02.01 Step-Tune Method for Digital Automatic Gain Control System of SAR 31**
Xi Chen, Yun-Kai Deng, Ping Zhang, Haiming Qi, Chinese Academy of Sciences, P. R. China
- P02.02 VHF dual-polarized dipole antenna with capacitive loads 35**
Igor Porokhov, Leon Neronskiy, Joint-stock Company Radio Engineering Corporation VEGA, Russia
- P02.03 One-bit quantization for Synthetic Aperture Radar with DBF 37**
Alicja Ossowska, German Aerospace Center (DLR), Germany
- P02.04 Ground Based Noise Waveform SAR with Static Antenna Array and Single Channel Receiver 41**
Konstantin Lukin, Anatoly Mogila, National Academy of Sciences of Ukraine, Ukraine
- P02.05 Reconfigurable Ground Based Noise-Waveform-SAR for Short Range Applications 45**
Konstantin Lukin, Anatoly Mogila, National Academy of Sciences of Ukraine, Ukraine

P03: Next Generation SAR and Advanced Modes

- P03.01 The Polar Format Imaging Algorithm for Forward-looking Bistatic SAR 49**
Sun Jin-ping, Lv Yan, Shiyi Mao, University of Aeronautics and Astronautics, BeiJing; Wen Hong, National Key Laboratory of Microwave Imaging Technology, P. R. China
- P03.02 Exploitation of Angular Diversity for Bistatic Image Formation using Opportunistic Transmitters 53**
Chin Yuan Chong, Laetitia Thirion, DSO National Laboratories/Sondra Laboratory, France
- P03.03 SAR Imaging Solutions Based on Azimuth Phase Coding 57**
Diego Cristallini, Matteo Sedehi, Pierfrancesco Lombardo, University of Rome, "La Sapienza", Italy

P03.04 Non-parametrical focusing of SAR images in transionospheric VHF-band SAR	61
Oleg Goriachkin, VSATI; Evgeniy Ivaschenko, State Research and Production Space Rocket Centre "TsSKB-Progress", Russia	

P03.05 The Modified BFPQ algorithm	65
Ury Naftaly, Elta, Israel	

P04: STAP, MTI & Change Detection

P04.01 Results from an Airborne Tri-channel SAR-GMTI Experiment	69
Xiaolei Lv, Jiang Qian, Mengdao Xing, Shouhong Zhang, Key Laboratory for Radar Signal Processing, Xidian University, P. R. China	

P04.02 Improved multichannel GMTI via moving target de-chirping and range migration correction	73
Christoph Gierull, Joachim Ender, FGAN, Germany	

P04.03 Detection of the Along-Track Speed of Moving Targets in SAR Imagery based on the Radon Transform	77
José María Muñoz-Ferreras, Félix Pérez-Martínez, Universidad Politécnica de Madrid, Spain; Mihai Datcu, German Aerospace Center, Germany	

P04.04 Performance Analysis of STAP for Spaceborne Sparse Array in the Presence of Amplitude and Phase Errors	81
Xueyan Kang, Yunhua Zhang, Risheng Yun, Center for Space Science and Applied Research, Chinese Academy of Sciences; Bitao Jiang, Beijing Institute of Remote Sensing Information, P. R. China	

P04.05 Change detection based GMTI on single channel SAR images	85
Debora Pastina, University of Rome "La Sapienza"; Giulia Battistello, D'Appolonia; Angelo Aprile, Galileo Avionica Spa, Italy	

P04.06 Innovative SAR/MTI Concepts for Digital Radar	89
Jacco de Wit, TNO Defence, Security and Safety, The Netherlands	

P04.07 A Novel Methodology for Full Velocity Vector Estimation of Ships Using SAR Data	93
Andrea Radius, University "Tor Vergata" Rome, Italy; Paulo Marques, Instituto de Telecomunicações – Insituto Superior de Engenharia de Lisboa, Portugal	

P05: SAR Calibration and Verification

P05.01 Investigation of the Doppler Effect Influence on the Interferometric SAR Directional Pattern	97
Zolotarev Ilya, Omsk State University Omgu; Iakov Miller, Academy MBF, Russia	

P05.02 Improvement of Radiometric Calibration Accuracy Using Super Resolution Methods	101
Mikhail Dostovalov, Scientific Research Institute of Precise Instruments; Leon Neronskiy, Joint-stock Company Radio Engineering Corporation "VEGA", Russia	

P05.03 Ionospheric Correction by Means of Coherent Scatterers	105
Rafael Schneider, Konstantinos Papathanassiou, German Aerospace Center (DLR), Germany	

P05.04 Geometric, Radiometric, Polarimetric and Along-Track Interferometric Calibration of the new F-SAR system of DLR in X-Band	109
Jens Fischer, Stefan Baumgartner, Ralf Horn, Anton Nottensteiner, Rolf Scheiber, Andreas Reigber, German Aerospace Center (DLR), Germany	

P06: SAR Simulation

P06.01 A New Statistical Model of High Resolution SAR Clutter in Raw Data Domain: Theoretical Results and Experimental Validation	113
Yanfei Zhang, Radar teaching group; Jian Guan, Naval Aeronautical Engineering Institute, P. R. China	

P06.02 Inserting Moving Targets to Polarimetric SAR Image by Self Deception Jamming	117
Necmi Tezel, Selçuk Paker, Istanbul Technical University, Turkey	

P06.03 High Frequency Multi Reflection RCS and ISAR Simulation	121
Wen Xiaoyang, Chao Wang, Zhang Hong, Wu Yanzhao, Zhang Bo, Chinese Academy of Science, P. R. China	

P06.04 Analysis and Computer Simulation of Circular Synthetic Aperture Radar with single frequency	125
Xiangkun Zhang, Yunhua Zhang, Jingshan Jiang, Center for Space Science and Applied Research, Chinese Academy of Sciences, P. R. China	

P06.05 An Educational Multi-Channel Testbed for Synthetic Aperture Techniques	129
Paulo Marques, Instituto de Telecomunicações – Instituto Superior de Engenharia de Lisboa, Portugal	

P06.06 Simulation of airborne SAR raw data using real-time domain approach and predictive coding algorithms	133
Pablo Perna, Francisco Grings, Haydee Karszenbaum, Julio Cesar Jacobo-Berlles, University of Buenos Aires, Argentina	

P06.07 SAR Raw Data Simulation of Targets Using Three Dimensional Models	137
Ozan Dogan, Mesut Kartal, Istanbul Technical University, Turkey	

P07: SAR and Inverse SAR Processing

P07.01 A TOPSAR Processing Algorithm Based on Extended Chirp Scaling: Evaluation with TerraSAR-X Data	141
Pau Prats, Adriano Meta, Rolf Scheiber, Josef Mittermayer, Alberto Moreira, German Aerospace Center (DLR), Germany; Jesus Sanz-Marcos, Cota Cero Arquitectura y Algoritmica S. L., Spain	

P07.02 High Resolution Tower-Turntable ISAR with the Millimetre Wave Radar COBRA (35/94/220 GHz)	145
Helmut Essen, Alfred Wahlen, Jörn Wilcke, Gregor Biegel, Winfried Johannes, Rainer Sommer, FGAN, Germany	

P07.03 Reconstruction of 3-D Target Geometry Using Radar Movie	149
Kei Suwa, Kazuhiko Yamamoto, Masafumi Iwamoto, Mitsubishi Electric Corporation, Japan; Tetsuo Kirimoto, The University of Electro-Communications, Japan	

P07.04 High Speed Target ISAR Imaging Based on Synthetic Bandwidth	153
Zhaozhao Gao, Huanying Zhang, Mengdao Xing, Zhang Shouhong, Xidian University, P. R. China	
P07.05 Bistatic ISAR Image Formation in Presence of Bistatic Angle Changes and Phase Synchronisation Errors	157
Marco Martorella, University of Pisa, Italy	
P07.06 Detection of Curving Ground Vehicles in Radar Data for ISAR Imaging	161
Patrick Berens, Ulrich Gebhardt, Jürgen Holzner, FGAN, Germany	
P07.07 Non-Linear SAR Data Processing By Time-Domain Back-Projection	165
Othmar Frey, Christophe Magnard, Erich Meier, University of Zurich; Maurice Rüegg, UBS AG, Switzerland	
P07.08 Chirp-Z Transform Based Interpolator Adaptation for Range Migration Correction	169
Dominique Derauw, Christian Barbier, Centre Spatial de Liège, Belgium	
P07.09 Applications of Time-Domain Back-Projection SAR Processing in the Airborne Case	173
Marcelo Albuquerque, Instituto Tecnológico de Aeronáutica, Brazil; Pau Prats, Rolf Scheiber, German Aerospace Center (DLR), Germany	
P07.10 Advanced SAR Mode Image Formation Using Pulse Z-Transform	177
Oyvind Overrein, Applied Radar Physics AS, Norway	
P07.11 Near Real Time SAR Processors for ISRO's multimode RISAT-I and DMSAR	181
Nilesh Desai, Space Applications Centre (ISRO); Saravana Kumar, Indian Space Research Organisation, India	
P07.12 Squint Angle Limitations for Space-Borne Spot SAR Imaging	185
Ury Naftaly, Elta, Israel	
P07.13 Simple Imaging Algorithm for Stepped-Chirp SAR	189
Yunhua Zhang, Wenshuai Zhai, Xiangkun Zhang, Chinese Academy of Sciences, P. R. China	
P07.14 Bistatic ISAR Target Simulation	193
Nickolai Kolev, Naval Academy, Bulgaria	
P07.15 ISAR Data dynamics: target shapes features extraction for the design of ISAR retrieval system	197
M. N. Saidi, Abdelmalek Toumi, Brigitte Hoeltzener, Ali Khenchaf, Laboratoire E3I2-EA3876, Brest, France; Driss Aboutajdine, University Mohamed, Morocco	
 P08: Bistatic, Multistatic and Multi-Satellite SAR	
P08.01 Analysis and Improvement of a Fast Backprojection Algorithm for Stripmap Bistatic SAR Imaging	201
Jintao Xiong, Jianyu Yang, Yong Fan, University of Electronic Science and Technology of China, P. R. China	
P08.02 Research on Improved RD Algorithm for Airborne Bistatic SAR and Experimental Data Processing	205
Jintao Xiong, Jianyu Yang, Yong Fan, University of Electronic Science and Technology of China, P. R. China	

P08.03 Research on the Extremum Points of Range-surface and Doppler-surface for Bistatic SAR	209
Jingen Wang, Jiang Kai, East China Research Institute of Electronic Engineering; Yanfei Wang, Artillery Academy of P.L.A, P.R. China	
P08.04 Motion Compensation in Bistatic SAR for the Hybrid Experiment	213
Amaya Medrano Ortiz, Robert Wang, University Siegen; Otmar Dr. Loffeld, Holger Nies, Center for Sensorsystems (ZESS) Germany	
P08.05 A Simplified Approach to Fast Calculating the Resolution in Arbitrary Direction for Bistatic SAR	217
Jingen Wang, Jiang Kai, East China Research Institute of Electronic Engineering; Yanfei Wang, Artillery Academy of P.L.A, P. R. China	
P08.06 Optimal selection of phase-keyed signals for bistatic SAR	221
Natalie Sologub, Kharkov Aviation Institute, Ukraine	
P08.07 Multiposition SAR. Processing algorithm and imaging stability versus monostatic SAR ...	225
Alexander Ksendzuk, National Aerospace University, Ukraine; Vladimir Ksendzuk, Navis, Russia	
P08.08 Optimisation of multiposition pseudo-passive SAR	229
Alexander Ksendzuk, Valery Volosyuk, National Aerospace University, Ukraine	
 P09: Interferometry, Repeat Pass, SAR Tomography, 3D SAR and Applications	
P09.01 A Region Based Approach for SAR Image Co-Registration	233
Jinfeng Wang, Zhouan Han, Yiming Pi, Jintao Xiong, University of Electroni Science and Technology of China, P. R. China	
P09.02 A new dual baseline phase unwrapping algorithm for the TanDEM-X Mission	237
Marie Lachaise, Thomas Fritz, Michael Eineder, German Aerospace Center (DLR), Germany	
P09.03 Imaging of targets beneath foliage with SAR tomography	241
Matteo Nannini, Rolf Scheiber, Ralf Horn, German Aerospace Center (DLR), Germany	
P09.04 SAR Tomography over Decorrelating Targets for Forestry Applications	245
Stefano Tebaldini, Fabio Rocca, Politecnico di Milano, Italy	
P09.05 Two Dimensional Kalman Filter Approach for Phase Unwrapping of TerraSAR-X Data	249
Holger Nies, Otmar Dr. Loffeld, Robert Wang, University Siegen, Germany	
P09.06 The Modified 3-D Range Migration Algorithm for Synthetic Aperture Radar Tomography	253
WeiXian Tan, Wen Hong, YanPing Wang, YiRong Wu, Chibiao Ding, National Key Laboratory of Microwave Imaging Technology, P. R. China	
P09.07 Glint Effects Simulation for an Extended Naval Target Using an Interferometric Inverse Synthetic Aperture Radar System Model	257
Theodoros Kostis, University of the Aegean, Greece	
P09.08 Tomographic SAR and Circular SAR Experiments in Anechoic Chamber	261
Wen Hong, YanPing Wang, WeiXian Tan, National Key Laboratory of Microwave Imaging Technology; NanJing Li, ChuFeng Hu, LinXi Zhang, Northwest Polytechnical University, P. R. China	

P09.09 Surface displacements of the St. Augustine Volcano, Alaska, measured from an DInSAR and GPS data	265
Chang-Wook Lee, Hyung-Sup Jung, Joong-Sun Won, Yonsei University, Korea; Zhong Lu, Oh-Ig Kwoun, USGS/EROS data center, USA; Seung-Kuk Lee, German Aerospace Center (DLR), Germany	
P09.10 Ionosphere Perturbation Effects in Repeated Orbits SAR Interferometry	269
Alexander Zakharov, Institute of radioengineering and electronics, Russia	
P09.11 On the Exploitation of the Extended Minimum Cost Flow (EMCF) Phase Unwrapping Algorithm for the Generation of Deformation Time-Series	273
Antonio Pepe, University of Napoli; Francesco Casu, Riccardo Lanari, IREA; Michele Manunta, Giuseppe Mozzarella, University of Cagliari, Italy	
P09.12 Evaluation of Digital Elevation Models from Stereo Radargrammetry data	277
Parivash Lumsdon, Bryan Mercer, Intermap technologies Corp., Canada	
P09.13 Phase Unwrapping for Multiple Interferograms: An Airborne Experiment for TanDEM-X	281
Christian Andres, Rolf Scheiber, Markus Bachmann, Gerhard Krieger, Jaime Hueso Gonzalez, German Aerospace Center (DLR), Germany	
P09.14 Multi-pass airborne interferometry campaign at X-band	285
Sebastien Angelliaume, Helene Oriot, Xavier Dupuis, Olivier Ruault Du Plessis, Patrick Fromage, Daniel Heuzé, Colette Coulombeix, ONERA, France	
P09.15 Coherent vs. Persistent Scatterers: A Case Study	289
Luca Marotti, Alessandro Parizzi, Nico Adam, Konstantinos Papathanassiou, German Aerospace Center (DLR), Germany	
P09.16 TanDEM-X Performance Analysis	293
Sigurd Huber, Marwan Younis, Gerhard Krieger, German Aerospace Center (DLR), Germany	
 P10: Polarimetry, Polarimetric Interferometry & Applications	
P10.01 Foliage penetration effect on polarimetric SAR interefometry observation of forest	297
Armando Marino, Karin Viergever, Iain Woodhouse, University of Edinburgh; Nicholas Walker, eOsphere Ltd, United Kingdom; Ralf Horn, German Aerospace Center (DLR), Germany	
P10.02 Water Change Detection in Natural Dam caused by Earthquake using Pi-SAR fully Polarimetric Data	301
Yoshio Yamaguchi, Hiroyoshi Yamada, Ryoichi Sato, Niigata University, Japan	
P10.03 Effect of combined direct ground and double-bounce mechanisms on the homogeneous volume over ground model	305
Josep-David Ballester-Berman, Juan Lopez-Sanchez, University of Alicante, Spain	
P10.04 Polarimetric Coherence Signatures and Coherence Regions in Complex Unit Circle	309
Ludmila Zakharova, Institute of Radioengineerng and Electronics RAS, Russia	
P10.05 Scattering Analysis of Urban Targets with Simulated SAR Imagery	313
Gerard Margarit-Martin, GMV Aerospace and Defense; Jordi Mallorqui, Carlos López-Martínez, Albert Aguasca, Xavier Fabregas, Luca Pipia, Technical University of Catalunya, Spain	

P10.06 A Unified Interpretation for Polarization Signature Method and Circular Polarization Method Based on Stokes Matrix Analysing	317
Yang Li, Fang Cao, Institute of Electronics, Chinese Academy of Science; Wen Hong, YanPing Wang, YiRong Wu, National Key Laboratory of Microwave Imaging Technology, P. R. China	
P10.07 Sub-Aperture Analysis of the Coherent Scatterers using Polarimetric SAR data	321
Xi Chen, Chao Wang, Chinese Academy of Sciences; Hong Zhang, Zhang Bo, China Remote Sensing Satellite Ground Station, P. R. China	
P10.08 Polarimetric Analysis of Dual Polarimetric SAR Imagery	325
Thomas Ainsworth, John Kelly, Jong-Sen Lee, Naval Research Laboratory, USA	
P10.09 A New Soil Moisture Estimation Method Study Using PolinSAR	329
Xinwu Li, Zhen Li, Quan Chen, Microwave Remote Sensing Division; Huadong Guo, Chinese Academy of Sciences; YanPing Wang, National Key Laboratory of Microwave Imaging Technology, P. R. China	
P10.10 A Monitoring Technique for Seasonal Water Area Change of Wetland Based on POLSAR Image Analysis	333
Ryoichi Sato, Yoshio Yamaguchi, Hiroyoshi Yamada, Niigata University, Japan	
P10.11 Statistical Assessment of the PolInSAR Coherence Set for Geophysical Media	337
Maxim Neumann, Laurent Ferro-Famil, University of Rennes 1, France; Marc Jäger, Andreas Reigber, Berlin University of Technology, Germany	
P10.12 The Potential of airborne Pol-InSAR measurements to derive vertical structure parameters of Alpine Glaciers	341
Thomas Busche, Irena Hajnsek, Jayanti Sharma, Konstantinos Papathanassiou, German Aerospace Center (DLR), Germany <i>Paper not available</i>	
 P11: Image Enhancement and Post Processing	
P11.01 An Orthogonal Projection Approach for Suppressing Moving Targets in Multi-Channel SAR Images	343
Florian Schulz, Christoph Gierull, Andreas Brenner, FGAN, Germany	
P11.02 Improved SAR Motion Compensation without Interpolation	347
Evan Zaugg, David Long, Brigham Young University; Michael Wilson, U. S. Naval Research Laboratory, USA	
P11.03 PGA Algorithm Application for Local Autofocusing of Hi-Res Spaceborne SAR Images ...	351
Leon Neronskiy, Igor Osipov, Vladimir Verba, Dmitry Pushkov, Joint-stock Company Radio Engineering Corporation “VEGA”, Russia	
P11.04 Method of Selective One-dimensional Azimuth Ambiguity Reduction for High Resolution SAR	355
Alexander Kovalenko, Scientific and Research Institute of Precise Instruments, Russia	
P11.05 CFAR Detection of Extended Targets in SAR Images based on goodness-of-fit test	359
Xiaobo Deng, Zhouan Han, Yiming Pi, Xiaobo Yang, University of Electronic Science and Technology of China; Zhenglin Cao, Radar and Avionics Institute of China Aviation Industry Corporation I, P. R. China	

P11.06 Squint SAR Data Processing With Extended Wavenumber Domain Algorithm Combines Motion Compensation	363
Yun-Kai Deng, Ge-Wei Tan, Chinese Academy of Sciences, P.R. China	
P11.07 A study of extrapolation technique in radar imaging	367
Ping Zhang, Graduate University of Chinese Academy of Sciences; Ruliang Yang, Chinese Academy of Sciences, P. R. China	
P11.08 Adaptive Dynamic Range Reduction for SAR Images.	371
Martin Lambers, Andreas Kolb, University of Siegen, Germany	
P11.09 Improved Airborne SAR Data Processing by Blockwise Focusing, Mosaicking and Geocoding	375
Christophe Magnard, Othmar Frey, Erich Meier, University of Zurich; Maurice Rüegg, UBS AG, Switzerland	
P11.10 Influence of an error and correlation of a phase evaluation of reference signal on a SAR image quality in a method of an autofocus using point radiocontrast targets	379
Alexander Broukhansky, Moscow Aviation Institute, Russia	
P11.11 SAR Image Quality Assessment in the Real Clutter Environment	383
Kwag Young, Chul Ho Jung, Jae Hoon Jung, Tae Oh, Korea Aerospace University, Korea	
P11.12 Radar Rectification of GIS Data for SAR Image Analysis in Mountainous Areas	387
Ivan Petillot, Emmanuel Trouve, Philippe Bolon, Université de Savoie, France; Michel Gay, Jean-Michel Vanpé, INPG, France	
P11.13 Imaging base on second-order signal statistic in SAR for the stochastic surface models ...	391
Alexander Ksendzruk, National Aerospace University; Natalie Sologub, Kharkov Aviation Institute, Ukraine	
 P12: Image Classification and Segmentation	
P12.01 Non-negative Matrix Factorization with Sparseness Constraints for Sea Ice SAR Feature Extraction	395
Juha Karvonen, Finnish Institute of Marine Research, Finland	
P12.02 The Use of GPR at the Interpretation of Radar Images of Forest at Meter Wavelength Range	399
Boris Kutuza, Russian Acad. of Sciences; Anatoliy Kalinkevich, Marina Krylova, Olga Shishkova, Vasily Marchuk, Institute of Radio Engineering and Electronics; Vladimir Verba, Viktor Plushchev, Valeriy Manakov, VEGA Corporation, Russia	
P12.03 Hierarchical Gauss Markov Segmentation of SAR Images Using Fourier Domain	403
Sedef Kent, Ibrahim Papila, Mesut Kartal, Istanbul Technical University, Turkey	
P12.04 SAR image segmentation using a fast level set technique	407
Marta Mejail, Juliana Gambini, Norberto Goussies, Maria Buemi, Julio Cesar Jacobo-Berlles, University of Buenos Aires, Argentina	
P12.05 Land-cover classification using fused PolSAR and PolInSAR	411
Michal Shimoni, Dirk Borghys, Roel Heremans, Christiaan Perneel, Marc Acheroy, Royal Military Academy, Belgium	

P12.06 Multilook Color Mapping Processing	415
Andrzej Gados, Adam Gorzelanczyk, Maj Mordzonek, Piotr Samczynski, Maciej Smolarczyk Telecommunications Research Institute; Krzysztof Kulpa, Jacek Misiurewicz, Warsaw University of Technology, Poland	
P12.07 Clustering by deterministic annealing and Wishart based distance measures for fully-polarimetric SAR-data	419
Ronny Haensch, Marc Jäger, Olaf Hellwich, Berlin University of Technology, Germany	
P12.08 Improved Unsupervised Classification Based on Freeman-Durden Polarimetric Decomposition	423
Wen Yang, Tong yuan Zhou, Hong Sun, Wuhan University, P.R. China	
P12.09 An Unsupervised Segmentation Using the Data Log-Likelihood for Fully Polarimetric SAR Data Analysis	427
Fang Cao, Chinese Academy of Sciences; Wen Hong, YiRong Wu, YanPing Wang, National Key Laboratory of Microwave Imaging Technology, P. R. China	
P12.10 Automated detection of precipitation induced artefacts in X-band SAR images	431
Andreas Danklmayer, Björn Döring, German Aerospace Center (DLR), Germany; Madhu Chandra, Technical University of Chemnitz, Germany	
P12.11 SAR Image Segmentation Via Lattice Filters Based Subband Decomposition	435
Isin Erer, Mesut Kartal, Sedef Kent, Istanbul Technical University, Turkey	
P12.12 Building Extraction from Polarimetric SAR Data using Mean Shift and Conditional Random Fields	439
Wenju He, Marc Jäger, Andreas Reigber, Olaf Hellwich, Berlin University of Technology, Germany	
 P13: Feature Extraction	
P13.01 Adaptive Detection of Range-Distributed Targets Based on SAR Raw data	443
Yanfei Zhang, Radar teaching group; Jian Guan, Naval Aeronautical Engineering Institute, P. R. China	
P13.02 SAR Automatic Target Recognition based on Decision Fusion	447
Ruohong Huan, Ruliang Yang, Chinese Academy of Sciences, P. R. China	
P13.03 Statistical Analysis of High Resolution spatially correlated Land Clutter at Millimeterwave Frequencies	451
Anika Kurz, Hartmut Schimpf, FGAN, Germany	
P13.04 A Variational Level Set SAR Image Segmentation Approach	455
Zongjie Cao, Yiming Pi, Xiaobo Yang, Jintao Xiong, University of Electronic Science and Technology of China, P. R. China	
P13.05 Target Detection Improvement by Using a Class Decision Algorithm for Synthetic Aperture Radar	459
Mesut Kartal, Sedef Kent, Istanbul Technical University; Serdar Kargin, Air Force Academy, Turkey	
P13.06 Application of SAR to Monitoring Activities and Environmental Parameters during Oil Platform Installation	463
Victoria Zatyagalova, R&D Center ScanEx; Andrei Ivanov, Russian Academy of Sciences, Russia	

P13.08 Detection of Step Changes in a Long Sequence of SAR Images	467
Diego Cristallini, Pierfrancesco Lombardo, University of Rome “La Sapienza”, Italy	
P13.09 Independency Preserving Dependent Maximum Likelihood Texture Tracking Model	471
Esra Erten, Andreas Reigber, Olaf Hellwich, Berlin University of Technology; Pau Prats, German Aerospace Center (DLR), Germany	
P13.10 Cross-calibration of Ground-Based SAR by using ALOS/PALSAR and a retrieval of soil moisture	475
Manabu Watanabe, Motoyuki Sato, Masayoshi Matsumoto, Tohoku University, Japan	
P13.11 Some effects of target vibration on SAR images	477
Brian Barber, Defence Science and Technology Lab, United Kingdom	
P13.12 TerraSAR-X Data Evidence Maximization-based Feature Extraction and Despeckling	481
Matteo Soccorsi, Mihai Datcu, German Aerospace Center (DLR), Germany	
P13.13 Super-resolution satellite SAR for urban features monitoring	485
Morten Ramberg, University of Oslo; Dan Johan Weydahl, Norwegian Defence Research Establishment (FFI), Norway	
P13.14 Rapid assessment of exposed populations in the aftermath of natural hazard events: Lessons from the Sumatra 2004 Tsunami regarding the use of SAR data	489
Dan Blumberg, Ben-Gurion University of the Negev, Israel; Deborah Balk, City University of New York; Yuri Gorokhovich, Lehman College, CUNY; Christopher Small, Dalia Bach, Columbia University, USA	

Contents Volume 4

Thursday, June 5

Session 8.1: Calibration and Verification II

- 8.1.1 X-band RAMSES PolInSar data calibration and validation 15**
Sebastien Angelliaume, Pascale Dubois-Fernandez, ONERA, France
- 8.1.2 Final Results of the TerraSAR-X In-Orbit Antenna Model Verification 19**
Markus Bachmann, Marco Schwerdt, Benjamin Bräutigam, Björn Döring, German Aerospace Center, Germany
- 8.1.3 Radar Instrument Calibration of TerraSAR-X 23**
Benjamin Bräutigam, Jaime Hueso Gonzalez, Marco Schwerdt, Markus Bachmann, German Aerospace Center (DLR), Germany

Session 8.2: TanDEM-X I

- 8.2.1 The TanDEM-X Mission 27**
Michael Bartusch, Hermann Berg, Oliver Siebertz, German Aerospace Center (DLR), Germany
- 8.2.2 The TanDEM-X Mission Concept 31**
Manfred Zin, Gerhard Krieger, Hauke Fiedler, Alberto Moreira, German Aerospace Center (DLR) Oberpfaffenhofen, Germany
- 8.2.3 The TanDEM-X Satellite 35**
David Miller, EADS Astrium, Germany
- 8.2.4 Interferometric SAR Processing: From TerraSAR-X to TanDEM-X 39**
Thomas Fritz, Helko Breit, Michael Eineder, Nico Adam, Marie Lachaise, German Aerospace Center (DLR), Germany
- 8.2.5 TanDEM-X: Science Exploration during the Phase C/D**
Irena Hajnsek, Thomas Busche, Alberto Moreira, German Aerospace Center (DLR) e.V., Germany
Paper not available
- 8.2.6 The TanDEM-X Data Acquisition Timeline and Mission Plan 43**
Hauke Fiedler, Gerhard Krieger, Manfred Zink, Michael Geyer, Juergen Jaeger, German Aerospace Center (DLR), Germany

Session 8.3: MTI and Change Detection I (invited)

- 8.3.1 First experimental demonstration of GMTI improvement through antenna switching 47**
Delphine Cerutti-Maori, FGAN-FHR, Christoph Gierull, DRDC Ottawa, c/o FGAN-FHR, Joachim Ender, FGAN e. V., Germany
- 8.3.2 A coherent change detection analysis using multi-pass airborne interferometric data at X-band 51**
Sebastien Angelliaume, Helene Oriot, Xavier Dupuis, ONERA, France

8.3.3 Traffic Measurement with TerraSAR-X: Processing System Overview and First Results	55
Steffen Suchandt, Hartmut Runge, Helko Breit, Alexander Kotenkov, German Aerospace Center (DLR); Diana Weihing, Stefan Hinz, Remote Sensing Technology, Technische Universitaet Muenchen, Germany	
8.3.4 Estimation of the lateral length of moving ground targets by airborne radar	59
Richard Klemm, FGAN, Germany	
8.3.5 ATI Performance using Simulated X-band Sea-clutter	63
Luke Rosenberg, Nick Stacy, DSTO, Australia	

Session 8.4: Innovative Digital Beamforming SAR Systems (invited)

8.4.1 Along-track array processing for MIMO-SAR/MTI	67
Joachim Ender, FGAN e. V., Germany	
8.4.2 Frontend development for the High Resolution Wide Swath SAR	71
Christian Fischer, Christoph Heer, Christoph Schaefer, EADS Astrium, Germany	
8.4.3 Experimental Performance Analysis of Digital Beam Forming on Synthetic Aperture Radar	75
Junghyo Kim, IHE, University of Karlsruhe; Marwan Younis, German Aerospace Center; Denis Becker, Werner Wiesbeck, University of Karlsruhe, Germany	
8.4.4 Multi-Channel ScanSAR for High-Resolution Ultra-Wide-Swath Imaging	79
Nicolas Gebert, Gerhard Krieger, Alberto Moreira, German Aerospace Center (DLR), Germany	
8.4.5 A Novel Ka-band Digitally Beamformed Interferometric Synthetic Aperture Radar for Glacier and Ice-sheet Topographic Mapping: Concept and Technology Development	83
Delwyn Moller, Brandon Heavey, Eric Rignot, Gregory Sadowy, Marc Simard, Mark Zawadzki, Jet Propulsion Laboratory, USA	

Session 9.1: Feature Extraction, Image Classification and Segmentation I

9.1.1 Evaluation of high resolution space borne SAR for man-made target characterization	87
Bert van den Broek, Rob Dekker, TNO Defence, Security and Safety, The Netherlands	
9.1.2 Time-Frequency Estimates of River Speeds	91
Paul Kersten, Thomas Ainsworth, Robert Jansen, Jakov Toporkov, Mark Sletten, Naval Research Lab; Stephen Frasier, Dragana Perkovic, Unversity of Massachusetts, USA	
9.1.3 TerraSAR-X Image Analysis using PCA, ICA and SVM	95
Houda Chaabouni-Chouayakh, Mihai Datcu, German Aerospace Center (DLR), Germany; David Mata-Moya, University of Alcalá, Spain	
9.1.4 A Study of Land Cover Classification Using ALOS/PALSAR Polarimetric Data	99
Masato Ohki, Masanobu Shimada, Japan Aerospace Exploration Agency, Japan	
9.1.5 Detection of Clear-Cuts Using ALOS PALSAR Satellite Images	103
Johan Fransson, Mattias Magnusson, Håkan Olsson, Swedish University of Agricultural Sciences; Leif Eriksson, Gustaf Sandberg, Klas Folkesson, Chalmers University of Technology, Sweden; Maurizio Santoro, GAMMA Remote Sensing Research and Consulting AG, Switzerland; Lars Ulander, FOI, Sweden	

Session 9.2: TanDEM-X II

- 9.2.1 TanDEM-X DEM Calibration Concept and Height References** 107
Jaime Hueso Gonzalez, Markus Bachmann, Hauke Fiedler, Gerhard Krieger, Manfred Zink,
German Aerospace Center (DLR), Germany
- 9.2.2 Design of the DEM Calibration and Mosaicking Processor for TanDEM-X** 111
Birgit Wessel, Ursula Marschalk, Astrid Gruber, Martin Huber, Thomas Hahmann, Achim Roth,
Martin Habermeyer, German Aerospace Center (DLR), Germany
- 9.2.3 Analysis of Potential GMTI Performance of TanDEM-X** 115
Christoph Schaefer, Axel Wagner, EADS Astrium, Germany
- 9.2.4 Design and Performance of the TanDEM-X T/R Modules** 119
Kristina Biller, Helmut Dreher, Andreas Fleckenstein, Georg Hoefler, Marcus Wahl, EADS Defence
Electronics; Markus Adolph, Ulrich Hackenberg, Ralf Rieger, EADS Deutschland GmbH;
Rudolf Zahn, EADS, Germany
- 9.2.5 The TOR Payload on TanDEM-X** 123
Ludwig Grunwaldt, GeoForschungsZentrum Potsdam, Germany

Session 9.3: MTI and Change Detection II (invited)

- 9.3.1 Modeling of change detection in VHF- and UHF-band SAR** 127
Lars Ulander, FOI, Sweden
- 9.3.2 STAP or Along-Track Interferometry: two different perspectives** 131
Helene Oriot, Hubert Cantalloube, Bernard Vaizan, ONERA, France
- 9.3.3 Moving Target Signals in High Resolution Wide Swath SAR** 135
Martina Gabele, Gerhard Krieger, German Aerospace Center (DLR), Germany
- 9.3.4 Detection of Traffic Congestion in SAR Imagery** 139
Gintautas Palubinskas, Hartmut Runge, German Aerospace Center (DLR), Germany

Session 9.4: Differential Interferometry, Multi-Pass SAR and SAR Tomography

- 9.4.1 X-Band Airborne DInSAR With the OrbiSAR System: New Results** 143
Stefano Perna, Università degli Studi di Napoli "Parthenope", Italy; Christian Wimmer,
Wimmer Consulting, Germany; Joao Moreira, Orbisat, Brazil; Gianfranco Fornaro, CNR-IREA, Italy
- 9.4.2 Impact of atmospheric phase screen and target decorrelation of ground based SAR
Differential interferometry** 147
Fabio Rocca, Politecnico di Milano; Davide D'Aria, Aresys; Bernardini Giulia, IDS;
Andrea Monti Guarnieri, Politecnico di Milano; Pier Paolo Ricci, IDS Ingegneria dei Sistemi SpA,
Italy
- 9.4.3 Recent Developments and Applications of Multi-Pass Airborne Interferometric SAR using
the E-SAR System** 151
Rolf Scheiber, Irena Hajnsek, Ralf Horn, Konstantinos Papathanassiou, Pau Prats, Alberto Moreira,
German Aerospace Center (DLR), Germany

9.4.4 Long-Term and Short-Term Surface Deformation Mapping by Repeat-Pass Satellite SAR . .	155
Chih-Tien Wang, Kun-Shan Chen, National Central University, Jhongli, Taiwan; Jong-Sen Lee, NRL; Wolfgang Boerner, UIC Chicago, USA	
9.4.5 New results on dynamic instability of Antarctic Peninsula glaciers detected by TerraSAR-X ice motion analysis	159
Helmut Rott, Univ. of Innsbruck, Austria; Michael Eineder, Dana Floricioiu, German Aerospace Center (DLR); Thomas Nagler, Environmental Earth Observation IT GmbH, Austria	

Session 10.1: Feature Extraction, Image Classification and Segmentation II

10.1.1 Time-frequency analysis of point target behavior in high resolution single polarization SAR images	163
Marc Spigai, Thales Alenia Space; Céline Tison, Jean-Claude Souyris, CNES, France	
10.1.2 Computer-supported training for the interpretation of radar images	167
Daniel Szentes, Bela Bargel, Anton Berger, Wolfgang Roller, Fraunhofer-IITB, Germany	
10.1.3 Automatic Fusion of SAR and Optical Imagery based on Line Features	171
Jan Wegner, Leibniz University of Hannover; Jordi Inglada, Céline Tison, CNES, France	
10.1.4 Scattering centre extraction for target classification	175
Emanuela Cerrone, Chris Baker, University College London, United Kingdom; Kwag Young, Korea Aerospace University, Korea	
10.1.5 Specific Post-processing Algorithms Fused for Ocean Monitoring in SAR Images	179
Marivi Tello, Carlos López-Martínez, Jordi Mallorqui, Universitat Politecnica de Catalunya (UPC), Spain	

Session 10.2: Airborne and UAV SAR

10.2.1 The ONERA compact SAR in Ka band	183
Jean-Francois Nouvel, Olivier Ruault Du Plessis, ONERA, France	
10.2.2 First Flight Trials with ARTINO	187
Matthias Weiß, Olaf Peters, Joachim Ender, FGAN e. V., Germany	
10.2.3 Impact of Platform Attitude Disturbances on the 3D Imaging Quality of the UAV ARTINO	191
Jens Klare, Andreas Brenner, FGAN-FHR; Joachim Ender, FGAN e. V., Germany	
10.2.4 F-SAR – DLR’s advanced airborne SAR system onboard DO228	195
Ralf Horn, Anton Nottensteiner, Rolf Scheiber, German Aerospace Center, Germany	
10.2.5 The Airborne SAR System SETHI: Airborne Microwave Remote Sensing Imaging System	199
Gregory Bonin, Philippe Dreuillet, ONERA, France	

Session 10.3: Along-track Interferometry, MTI, STAP

10.3.1 Estimation of the Surface Velocity Field of Temperate Glaciers Using Airborne SAR Interferometry	203
Pau Prats, Christian Andres, Rolf Scheiber, Ralf Horn, German Aerospace Center (DLR); Andreas Reigber, Berlin University of Technology, Germany	
10.3.2 Acceleration Independent Along-Track Velocity Estimation of Moving Targets	207
Stefan Baumgartner, Gerhard Krieger, German Aerospace Center (DLR), Germany	
10.3.3 ATI Slow Target Detection in a Log Likelihood Framework	211
Nick Stacy, Mark Preiss, DSTO, Australia	
10.3.4 Space-Time Adaptive Detection with Array Antennas	215
Wolfram Burger, Ulrich Nickel, FGAN-FHR, Germany	

Session 10.4: SAR Interferometry (invited)

10.4.1 TerraSAR-X High Resolution SAR-Interferometry	219
Nico Adam, Nestor Yague-Martinez, Richard Bamler, German Aerospace Center (DLR), Germany	
10.4.2 Moving from PS to Slowly Decorrelating Targets: A Prospective View	223
Alessandro Ferretti, Fabrizio Novali, Tele-Rilevamento Europa – T.R.E. srl; Fabio Rocca, Claudio Prati, Francesco De Zan, Politecnico di Milano; Tele-Rilevamento Europa – T.R.E. srl, Italy	
10.4.3 PALSAR Interferometric potential for observing the solid earth	227
Masanobu Shimada, Masato Ohki, Japan Aerospace Exploration Agency, Japan	
10.4.4 Water Defense System Monitoring using SAR Interferometry	231
Ramon Hanssen, Freek van Leijen, Delft University of Technology, The Netherlands
