

Contents

Plenary Session II

Energy Saving, the past, present, future

Wilfried Schulz, ETSI EE Vice Chairman, Germany

Final paper has not been submitted by the final deadline

ICT Getting Green

Reijo Maihaniemi, Efore Plc, Finland

An Overview of Battery Development placed in a historical Context and future Aspects

Stefan Göbel, Hawker GmbH, Germany

Batteries

Reliable Power Supply for Remote Telecom Facilities

Wieland Rusch, Ingo Stahlkopf, BAE Batterien GmbH, Germany

Ohmic Testing Applications in VRLA Batteries Maintenance

Jian Gao, China Mobile Communications Group Co. Ltd, China; Longyun Yu, China Mobile Communications Group Zhejiang Co., Ltd, China

The Batterie's Regulatory Process in Brazilian Telecommunications Industry

Maria de Fatima N.C. Rosolem, Glauco Ribeiro dos Santos, Luiz Antonio Soares, Luiz Eduardo Ferreira Dias Jr, Pamela Tobias Frare, Raul Fernando Beck, Vitor Torquato Arioli, CPqD, Brazil; Julio Cesar Fonseca, Anatel, Brazil

Improving the Characteristics of Lithium-ion Cells by Applying a Heat-resistant Separator and Heat Conductor

Toshio Matsushima, Tomonobu Tsujikawa, NTT Facilities Inc. R&D Headquarters, Japan

Conversion Technology

Variable Voltage PSU Technology for ICT Applications

Markku Kukkonen, Efore Plc, Finland

A Study of High Voltage Converter Topologies with Wide Input Voltage Range

Hiroyuki Osuga, Mitsubishi Electric Corporation, Kamakura Works, Japan; Isamu Terukina, Mitsubishi Electric Engineering Company Limited, Japan; Hiroshi Nagano, Japan Aerospace Exploration Agency, Japan

Method of Designing a Four-Legged Transformer for Hybrid-Type DC-DC Converters

Hiroshi Unno, H. Watanabe, Shindengen Mfg. Co., Ltd, Japan; H. Saotome, Y. Wakatsuki, Chiba University, Japan

Improved PFC Circuit for Three-Phase Single Switch Having Auxiliary Capacitors

Keiju Matsui, Masaru Hasegawa, Chubu University, Japan; Fukashi Ueda, Hideki Mori, Chubu Electric Power Co., Inc. Japan

Batteries and other Energy Storage Systems

Uninterrupted power supply – supported by fuel cells

Peter Beckhaus, Thorsten Notthoff, Sina Souzani, Angelika Heinzl, ZBT GmbH, Germany;
Bernhard Böden, Power Innovation GmbH, Germany

Fuel Cell Back-up Power

Dirk Weniger, b+w Electronic Systems GmbH & Co. KG, Germany

Novel Voltage Balancer for Electric Double Layer Capacitor by Using Forward Converter

Keiju Matsui, Hiroto Shimada, Masaru Hasegawa, Chubu University, Japan

Investigation into technical factors related to stationary lithium-ion battery used in telecommunications applications

Tomonobu Tujikawa, Kahou Yabuta, Takashi Matsushita, Toshio Matsushima, NTT Facilities, Inc., Japan; Masayasu Arakawa, NTT Facilities Research Institute Inc., Japan; Koji Hayashi, Shin-Kobe Electric Machinery Co. Ltd., Japan

AC/DC Power Supplies / Power Quality and Efficiency

Increasing grid transmit capability and power quality by new solar inverter concept and inbuilt data communication

Norbert Grass, Georg-Simon-Ohm University Nuremberg, Germany; Georg Kerber, Rolf Witzmann, Technical University Munich, Germany; Markus Sebeck, iAd GmbH, Germany; Reinhold Keck, Siemens AG, Germany

Evaluation of dc Voltage Levels for Integrated Information Technology and Telecom Power Architectures

Alexis Kwasinski, The University of Texas at Austin, USA

Scientific methodology for Telecom service energy consumption and CO₂ emission assessment including negative and positive impacts

Didier Marquet, Marc Aubree, France Telecom Orange Labs, France; Jean-Pierre Frangi, Xavier Chavanne, Universite Paris Diderot, France

Site Power Saving

Fabio Pizzuti, Telecom Italia SpA, Italy

UPS & Converters

A New Multi-Loop Digital Control DC-DC Converter

Fujio Kurokawa, Shohei Sukita, Junya Sakemi, Nagasaki University, Japan

Efficient powering of communication and IT equipments using rotating UPS

Enrico Blondel, C. Monney, Swisscom (Schweiz) AG, Switzerland

Increased MTBF and Decreased Maintenance Cost by using Systems without fans

Joerg Umbreit, Gustav Klein GmbH & Co. KG, Germany

Fuel-cells in the required packaging

Siegfried Suchanek, Thomas Welsch, Günter Siegmund, Rittal GmbH & Co. KG, Germany

UPS & Converters / EMC-Product Safety / Standards

Overview to ETSI Standards and Guides for Efficient Powering of Telecommunication and Datacom Equipment and Building

Wilfried Schulz, ETSI EE Vice Chairman, Germany

The new product safety standard for Information and Communication Technology equipment

Wilfried Schulz, ETSI EE Vice Chairman, Germany

Alternative Power Sources for Telecom Networks

The Green Base Station

Gunter Schmitt, Eltek Valere Deutschland, Germany

On Chip Micro Power Generator for Smart Pavement Material (SPM)

Hassan R. Homami, George Moglia, Parsons Brinckerhoff, USA; David Crouse, City College of New York, USA; Nadereh Moini, Rutgers University, USA

Energy Efficient Power System Solutions

Dirk Weniger, b+w Electronic Systems GmbH & Co. KG, Germany

Application of new technologies as primary and backup power supply in Telecom Installations

Dieter Braechtken, Downstream UG, Germany

Operation-Maintenance / Thermalmanagement

Development of -48-V DC power supply system for high power ICT equipment

Tadatoshi Babasaki, Toru Tanaka, Toshimitsu Tanaka, Yousuke Nozaki, NTT Energy and Environment Systems Laboratories, Japan; Fujio Kurokawa, Nagasaki University, Japan

The next generation smart telecom power distribution with solid state hypride circuit breakers and the contribution to pwer and facility management

Richard Mehl, E-T-A GmbH, Germany

Thermal and energy management system based on low cost Wireless Sensor Network Technology, to monitor, control and optimize energy consumption in Telecom Switch Plants and Data Centres

Fernando Genova, Fabio Luigi Bellifemine, Marco Gaspardone, Maurizio Beoni, Alberto Cuda, Gian Piero Fici, Telecom Italia, Italy

U.S. Gulf Coast Telecommunications Power Infrastructure Evolution since Hurricane Katrina

Alexis Kwasinski, The University of Texas at Austin, USA
