

CONTENTS

I	Session: Modulation	1
I-A	<i>E. Peiker, G. Yammine, W. G. Teich, J. Lindner:</i> Increasing the bandwidth efficiency of OFDM-N/MFSK	1
I-B	<i>T. Delamotte, G. Bauch:</i> Receiver design for GEO satellite systems using MIMO and time-frequency packing	9
I-C	<i>N. Schulz, L. Häring, A. Czylwik:</i> Performance comparison of MRC in cyclic prefix OFDM and OQAM OFDM	17
I-D	<i>I. Slim, C. Xie, J. A. Nossek:</i> Orthogonal frequency division multiplexing for spectrally efficient Nyquist WDM systems	23
II	Session: Channel estimation and synchronization	27
II-A	<i>C. Rohde, S. Lipp, H. Stadali, W. Gerstacker, W. Koch:</i> Efficient supporting methods for adaptive pilot-aided channel estimation in OFDM systems	27
II-B	<i>M. Hirschbeck, U. Berold, J. B. Huber:</i> Low complexity iterative channel estimation for the L-band digital aeronautical communication system 1 based on OFDM	34
II-C	<i>S. Schedler, V. Kühn, M. Woltering, D. Wübben, A. Dekorsy:</i> Investigation on Gaussian waveforms to improve robustness in physical layer network coding	42
II-D	<i>A. Ens, T. Janson, L. M. Reindl, C. Schindelbauer:</i> Robust multi-carrier frame synchronization for localization systems with ultrasound	50
III	Session: Cooperation	58
III-A	<i>S. Dierks, M. B. Amin, W. Zirwas, M. Haardt, B. Panzner:</i> The benefit of cooperation in the context of massive MIMO	58
III-B	<i>Y. Zhu, F. Zheng, T. Kaiser:</i> Distributed transmission framework against quasi-static channel impairments for downlink multi-cell MIMO-OFDM with IA	66
III-C	<i>M. El-Absi, A. B. Güven, T. Kaiser:</i> Interference alignment for OFDM cognitive radio networks in TV white space spectrum	72
III-D	<i>T. T. Nguyen, H. Cao, T. Kreul, T. Kaiser:</i> Exploiting periodical peaks of autocorrelation of pilot-added OFDM signals for enhanced spectrum sensing algorithms	79
IV	Session: Multi-user networks	85
IV-A	<i>A. Yaqot, P. A. Höher:</i> Efficient resource allocation for MIMO-OFDM cognitive networks with adaptive precoding	85
IV-B	<i>N. Obaid, A. Czylwik:</i> Energy efficiency analysis of dense picocell deployments	92
IV-C	<i>P. Torres, L. Charrua, A. Gusmao:</i> On the uplink detection performance in MU-MIMO broadband systems with a large number of BS antennas	98

IV-D	<i>T. Maruko, G. Osada, S. Takebuchi, F. Maehara:</i> Clipping and filtering employing deterministic transmit power control in MU-MIMO-OFDM systems	106
V	Session: Nonlinearities and implementation aspects	112
V-A	<i>S. Stern, R. F. H. Fischer:</i> OFDM vs. single-carrier modulation: A new view on the PAR behavior	112
V-B	<i>M. Gay, A. Lampe, M. Breiling:</i> PAPR reduction in OFDM using selected mapping with adaptive clipping at the transmitter, and sparse reconstruction at the receiver	120
V-C	<i>V.-T.-D. Huynh, N. Noels, P. Rombouts, J. Armstrong, H. Steendam:</i> Effect of time-interleaved analog-to-digital converter mismatches on OFDM performance	128
V-D	<i>I. Ouannes, P. Nickel, J. Bernius, K. Dostert:</i> Physical layer performance analysis of power line communication (PLC) applied for cell-wise monitoring of automotive Lithium-Ion batteries	136
VI	Poster session	144
VI-A	<i>Y. Gao, T. Kreul, T. Kaiser:</i> A simplified RF model to investigate impacts of RF impairments on OFDM	144
VI-B	<i>R. Guillaume, A. Mueller, C. T. Zenger, C. Paar, A. Czylik:</i> Fair comparison and evaluation of quantization schemes for PHY-based key generation	150
VI-C	<i>L. Häring, C. Kisters:</i> Influence of imperfect reciprocity on MAP-based automatic modulation classification for adaptive OFDM systems in TDD mode	155
VI-D	<i>C. Husmann, Y. Chen, A. Czylik:</i> Modulation classification for adaptive mobile OFDM systems	161
VI-E	<i>C. Kisters, L. Häring, A. Czylik:</i> Demonstrator for real-time OFDM transmission with bit loading in TDD systems	169
VI-F	<i>W. Sarhan, A. Klein:</i> Combining virtual noise and seamless rate adaptation for user-specific requirements on quality of service in xDSL systems	174
VI-G	<i>M. Schlamann, L. Häring, A. Czylik:</i> Lattice filter-based frequency-domain equalizer with multiple frequency offset compensation for MIMO SDMA OFDM systems	179
VI-H	<i>B. Y. Shikur, T. Weber:</i> Uplink-downlink transformation of the channel transfer function for OFDM systems	185
