

Inhaltsverzeichnis

Session 1

- 1 Constraint Propagation Methods for Robust IC Design 7**
 A. Krinke, Technische Universität Dresden; G. Jerke, Robert Bosch GmbH;
 J. Lienig, Technische Universität Dresden
- 2 Symbolic Fault Modeling and Model Counting for the Identification of Critical Gates in Digital Circuits 15**
 A. Bernardini, U. Schlichtmann, Technische Universität München
- 3 3D: Defects and Reliability 23**
 M. Wahl, A. Grünewald, K. Hahn, R. Brück, Universität Siegen

Session 2

- 4 Bond Wire Design with the Bond Calculator 30**
 C. C. Jung¹, C. Silber², J. Scheible¹
¹Robert Bosch Centre for Power Electronics, Reutlingen University;
²Robert Bosch GmbH, Reutlingen
- 5 Analytical model for ideal generic memristor circuits based on the theory of Volterra 36**
 A. Ascoli, R. Tetzlaff, Technische Universität Dresden
- 6 Thermal und mechanical simulations for the improvement of the lifespan of highly-integrated systems 43**
 A. Heinig, D. Papaioannou, Fraunhofer Institute for Integrated Circuits IIS, Dresden

Poster

- 7 On the Automated Verification of User-defined MBIST Algorithms 50**
 J. Kinseher, M. Richter, Intel Mobile Communications, München; I. Polian, Universität Passau
- 8 Abstract Technology Handling for Generator-Based Analog Circuit Design 56**
 B. Prautsch, U. Eichler, T. Reich, A. Puppala, Fraunhofer Institute for Integrated Circuits IIS, Design Automation Division EAS, Dresden; J. Lienig, Dresden University of Technology
- 9 Correcting Delay Faults and Transient Faults in Pipelines 62**
 S. Scharoba, T. Koal, H. T. Vierhaus, Brandenburgische Technische Universität Cottbus-Senftenberg
- 10 Extending Microprocessor Trace Hardware for Fault Injection 69**
 M. Gunia, M. Zabel, R. G. Spallek, Technische Universität Dresden

- 11 Coverage of Uncertainties in Cyber-Physical Systems 77**
W. Chipman, C. Grimm, C. Radojicic, Technische Universität Kaiserslautern
- 12 Mixed-Signal Multi-Core Circuit Architecture for a Reliable Task Distribution 85**
J. von Rosen, L. Hedrich, Universität Frankfurt/Main

Session 4

- 13 Stochastic analysis of degradation and variations in CMOS-Transistors 92**
T. Hillebrand, N. Hellwege, N. Heidmann, S. Paul, D. Peters-Drolshagen, Universität Bremen
- 14 Cost and Reliability Trade-off during the Development of Heterogeneous 3D-Systems 100**
A. Grünewald, M. Wahl, R. Brück, Universität Siegen
- 15 Yield Analysis and Optimization Methods for Active CMOS Pixels 107**
C. Lindner, C. Soell, J. Roeber, A. Baenisch, R. Weigel, Friedrich-Alexander-Universität Erlangen-Nürnberg
