

Contents

Regular Session 1:

Theoretical advances of CNNs

- 01 Amplitude and phase equations for nonlinear oscillators with noisy interactions 11**
Michele Bonnin, Fernando Corinto, Valentina Lanza
- 02 Metastable rotating waves in Chua-Yang ring networks 13**
Barnabas M. Garay, Miklós Koller
- 03 On Robustness of Sparse High-D Computing 15**
Mika Laiho, Jussi H. Poikonen, Eero Lehtonen, Pentti Kanerva
- 04 Designing a Tactile Sensor Array for Shape Recognition 17**
Hannah Juarez, James P. Schmiedeler, Michael Niemier, György Cserey
- 05 Online Linear Subspace Learning in an Analog Array Computing Architecture 19**
Jussi H. Poikonen, Mika Laiho

Regular Session 2:

Cellular architectures and algorithms

- 06 Construction of CNN Template via Learning with Random Weight Change Algorithm 21**
Shyam P. Adhikari, Changju Yang, Hyongsuk Kim, Leon O. Chua
- 07 Robust 2D Propagation Stopper Network for Asynchronous Binary Wave Computing 23**
Ari Paasio, Jonne Poikonen
- 08 Matlab Simulation Framework for Asynchronous Binary Wave Computing 25**
Ari Paasio, Jonne Poikonen
- 09 Ultra Low-Power Array Processor 1-D Test Structure Implementation 27**
Ari Paasio
- 10 Saliency based Attention Mechanism for Topographic Architectures 29**
Volkan Meriç, and Müştak E. Yalçın

Regular Session 3:

Applications on FPGAs and GPUs

- 11 A New Implementation of Fully Programmable Complete CNN Processor Core on FPGA .. 31**
Volkan Meric, Mustak Erhan Yalcin
- 12 Computer Assisted Sperm Motility Analysis Implemented on Hybrid CPU+FPGA Architecture As An Intelligent Microscope Application 33**
Osman Levent Şavkay, Müştak Erhan Yalçın, Vedat Tavşanoğlu

13	On the way to a Third Generation Real-Time Cellular Neural Network Processor	35
	Nerhun Yildiz, Evren Cesur, Vedat Tavsanoğlu	
14	A Discussion on Spatiotemporal Filtering on a Third Generation Real-Time Cellular Neural Network Processor	37
	Nerhun Yildiz, Evren Cesur, Vedat Tavsanoğlu	
15	Kinect image processing by CNN algorithm for gait recognition	39
	Kevin Leyden, Miklós Koller, Michael Niemier, James Schmiedeler, György Cserey	

Regular Session 4:

Biological relevance of CNNs

16	Wrist pulse detection and analysis using three in-line sensors and linear actuators	41
	Nathan Spulak, Sándor Foldi, Miklós Koller, Michael Niemier, James Schmiedeler, György Cserey	
17	Cellular computation in the Insect Brain	43
	Paolo Arena, Luca Patané	
18	Learning Deep CNN Structures	45
	Jens Müller, Simon Walz, Ronald Tetzlaff	
19	Deconvolution as a model of blur adaptation in the visual cortex	47
	László Orzó, Antal Hiba, Ákos Zarándy	
20	Phage-based environmental nanobiosensor	49
	Teuku Fawzul Akbar, Bergoi Ibarlucea, Larysa Baraban, Gianaurelio Cuniberti, Alon Ascoli, Ronald Tetzlaff, Taiuk Rim, Chang Ki Baek, Dhahanjay Bodas	

Regular Session 5:

Memristor materials, devices, circuits, and systems (1)

21	Linearized Bond Graph of Hodgkin-Huxley Memristor Neuron Model	51
	Israa Al-Mashhadani, Sillas Hadjiloucas	
22	A Nonlinear Memristor Model with Activation Thresholds and Variable Window Functions	53
	Valeri Mladenov, Stoyan Kirilov	
23	DC behaviour of a non-volatile memristor: part I	55
	Alon Ascoli, Ronald Tetzlaff, Leon Ong Chua, John Paul Strachan, Richard Stanley Williams	
24	DC behaviour of a non-volatile memristor: part II	57
	Alon Ascoli, Ronald Tetzlaff, Leon Ong Chua, John Paul Strachan, Richard Stanley Williams	
25	A physics-based Spice model for the Nb₂O₅ threshold switching memristor	59
	Janaki Radhakrishnan, Stefan Slesazeck, Helge Wylezich, Thomas Mikolajick, Alon Ascoli, Ronald Tetzlaff	

Regular Session 6:

Memristor materials, devices, circuits, and systems (2)

26	Impact of Quantized Conductance Effects of ReRAM Devices on Neuromorphic Networks	61
	Anne Siemon, Sebastian Ferch, Stephan Menzel, Rainer Waser, Eike Linn	
27	Reduction of Memristance Drift in Twin Memristor Crossbar	63
	Son Ngoc Truong, Khoa Van Pham, Wonsun Yang, Kyeong-Sik Min	
28	The Generalized Metastable Switch Memristor Model	65
	Timothy W. Molter, M. Alexander Nugent	
29	Memristor-Based Binary Synapses for Deep Neural Networks	67
	Jacopo Secco, Fernando Corinto	
30	A new approach based on memristor crossbar for synchronization	69
	Lucia Valentina Gambuzza, Mattia Frasca, Luigi Fortuna, Vasileios Ntinis, Ioannis Vourkas, Georgios Ch. Sirakoulis	

Special Session 1:

Cellular and Alternative Processing Architectures for Embedded Vision Systems

31	Experimental Evidence of Power Efficiency due to Architecture in Cellular Processor Array Chips	71
	Ricardo Carmona-Galán, Jorge Fernández Berni, Ángel Rodríguez-Vázquez	
32	Pre-processing Architecture for IR-Visual Smart Camera Based on Post-Processing Constraints	73
	Muhammad Imran, Xu Wang, Najeem Lawal, Mattias O'Nils	
33	Real time architectures for the Scale Invariant Feature Transform algorithm	75
	Gines Doménech-Asensi, Javier Garrigós, Paula López, Victor Brea, Diego Cabello	
34	3D Technologies for massive parallel computing vision system: Expected Performances, Design Constraints and Trends	77
	Gilles Sicard, Laurent Millet, Margaux Vigier, Stephane Chevobbe	
35	Cellular Neural Networks for FPGAs with OpenCL	79
	Franz Richter-Gottfried, Dietmar Fey	

Special Session 2:

Advances in the Theory of Cellular Nonlinear/Nanoscale Networks

36	CNN Computing of Piezoelectric Solid with Nano-Holes under Time-Harmonic Anti-Plane Load	81
	Angela Slavova, Ventsislav Ignatov	
37	A study on multistability of CNNs with memristors	83
	Mauro Di Marco, Mauro Forti, Luca Pancioni	

38	Evidence of Turing patterns in Memristive Cellular Nonlinear Networks	85
	Arturo Buscarino, Claudia Corradino, Luigi Fortuna, Mattia Frasca, Leon O. Chua	
39	Local Activity in Reaction-Diffusion CNN with Memristor Synapses	87
	Angela Slavova, Galina Bobeva	
40	Trajectory recognition by CNN with memristive units	89
	Aleksy Barcz, Zbigniew Szymański, Stanisław Jankowski	

Special Session 3: Memristors for Computing

41	Impact of the Nonlinear Switching Kinetics on Logic Circuits based on Memristive Switching Devices	91
	Stephan Menzel, Anne Siemon, Eike Linn	
42	Algorithmic Considerations in Memristive Memory Processing Units (MPU)	93
	Rotem Ben-Hur, Nishil Talati, Shahar Kvatinsky	
43	CIM100x: Computation in-Memory Architecture Based on Resistive Devices.	95
	Said Hamdioui, Mottaqiallah Taouil, Hoang Anh Du Nguyen, Muhammad Adib Bin Haron, Lei Xie, Koen Bertels	
44	Approximate Computing with Stochastic Memristors	97
	Rawan Naous, Khaled Nabil Salama	
45	Machine Learning with Memristors via Thermodynamic RAM	99
	Timothy W. Molter, M. Alexander Nugent	
46	1-D Memristor Networks as Ternary Storage Cells	101
	Ioannis Vourkas, Angel Abusleme, Georgios Ch. Sirakoulis, Antonio Rubio	

Special Session 4: Computing with Dynamically-Coupled Systems

47	Toward the design of mixed high-speed and low-power NML circuits	103
	Fabrizio Cairo, Luca Gnoli, Marco Vacca, Giovanna Turvani, Maurizio Zamboni, Mariagrazia Graziano	
48	Deterministic Pattern Recognition with the Oscillatory Network based MONACO-Architecture	105
	Daniel Heger, Katharina Krischer	
49	Computation with Coupled Oscillators in an Image Processing Pipeline	107
	Zachary Hull, Donald Chiarulli, Steven Levitan, Gyorgy Csaba, Wolfgang Porod, Matthew Pufall, William Rippard, Nigel Stepp, Yongqiang Cao, Shankar Rao, Praveen Pilly, David Payton	
50	Oscillatory neural network from ring oscillators	109
	György Csaba, Trond Ytterdal, Wolfgang Porod	

51	Computing with Coupled Dynamical Systems	111
	Nikhil Shukla, Suman Datta, A. Parihar, V. Narayanan, A. Raychowdhury	
52	Wave-based signal processing devices using spin waves	113
	Ádám Papp, Wolfgang Porod, Emily Song, György Csaba	

Special Session 5:

Problems on Mega Core Architectures

53	FPGA-based clustering of multi-channel neural spike trains	115
	László Schäffer, Zoltán Nagy, Zoltán Kincses, Zsolt Vörösházi, Richárd Fiáth, István Ulbert, Péter Szolgay	
54	Accelerating a charged single alpha-helix search algorithm in protein sequences using FPGA	117
	Zoltán Nagy, Zoltán Gáspári, Ákos Kovács	
55	Accelerating Numerical Simulations of Spin-wave Dynamics on FPGA	119
	András Kiss, Zoltán Nagy, Péter Szolgay, György Csaba, Wolfgang Porod	
56	A system concept for EMG classification from measurement to deployment	121
	Bence J. Borbély, Péter Szolgay	

Special Session 6:

CNN based vehicle control

57	Cellular Vision Based ADAS Applications	123
	András Horváth, István Horváth, Ákos Kiss, Domonkos Huszár, András Pálffy, Lóránt Kovács, Dóra Babicz, Bence Farkas, Gábor Majoros, Csaba Rekeczky	
58	Remote Aircraft Detection against Sky Background	125
	Antal Hiba, Ákos Zarándy, Borbála Pencz, Peter Bauer, Bálint Vanek	
59	A Real-time High Dynamic Range Vision System with Tone Mapping for Automotive Applications	127
	Julien N. P. Martel, Lorenz K. Müller, Stephen J. Carey, Piotr Dudek	
60	Retina simulator challenges, image processing with a varying resolution sensor	129
	Antal Hiba, László Orzó
