

Table of Contents

1	Preface	11
2	Introduction	13
3	Legal Requirements	15
3.1	Approach to determining the legal implications	15
3.2	Software as a medical device	17
3.2.1	Intended purpose	18
3.2.2	Normal Use.....	20
3.2.3	Medical device	20
3.2.4	Accessories.....	21
3.3	Legal Requirements for medical devices	21
3.3.1	European medical device law	23
3.3.1.1	General responsibilities of the manufacturers.....	23
3.3.1.2	General safety and performance requirements for software	24
3.3.1.3	Clinical and performance evaluation of software.....	25
3.3.1.4	Software traceability.....	26
3.3.2	The national legal framework for medical devices in Germany....	27
3.4	Requirements from other fields of law	28
3.4.1	Copyright	29
3.4.2	Data protection law.....	30
3.4.3	Advertising in Health Care Act and Act against Unfair Competition.....	33
3.4.4	Liability law.....	34
3.4.4.1	Contractual liability.....	34
3.4.4.2	Non-contractual liability – product and manufacturer’s liability ..	36
3.4.4.3	Outsourced processes	41
3.5	The road to certification of medical software	42
3.6	Medical software in the market	48
3.7	Jurisdiction of the notified bodies and national authorities.....	49
3.8	Peculiarities of markets outside the EU.....	50
3.8.1	Example: Market approval and operation of medical devices in the US	51

3.8.1.1	Requirements for market approval of medical devices in the US ..	51
3.8.1.2	Requirements for the operation of medical devices in the US	53
3.8.2	Proof of product safety.....	54
3.8.3	Approach to determining international requirements.....	55
4	Medical software – from the idea to the finished product	57
4.1	Product idea.....	57
4.1.1	Market requirements.....	58
4.1.1.1	Compatibility and operability.....	59
4.1.1.2	Efficiency, user groups and decision makers.....	60
4.1.1.3	Requirements for installation and support.....	62
4.1.1.4	Functional requirements	63
4.1.2	Product related regulatory strategy	66
4.2	Development of Medical Software	73
4.2.1	Specification of the overall system.....	73
4.2.1.1	Specification of the software subsystem.....	74
4.2.1.2	Specification of the hardware subsystem.....	75
4.2.1.3	Viewpoints in requirements	76
4.2.1.4	Types of requirements.....	77
4.2.1.5	Requirements – step by step.....	78
4.2.1.6	Principles	80
4.2.2	Usability	82
4.2.3	System architecture/specification of the software components	86
4.2.4	Detailed software design	89
4.2.5	Implementation.....	90
4.2.6	Risk management.....	92
4.2.6.1	General	92
4.2.6.2	Procedure	95
4.2.6.2.1	Risk analysis	96
4.2.6.2.2	Risk assessment	96
4.2.6.2.3	Risk control	97
4.2.6.2.4	Implementation and proof of effectiveness	98
4.2.6.2.5	Assessment of the remaining risk	99
4.2.6.2.6	Subsequent phases.....	99
4.2.7	Verification.....	100
4.2.7.1	Verification in the language of IEC 62304	101
4.2.7.2	Verification versus validation.....	101
4.2.7.3	Aspects	101
4.2.7.4	Reviews and inspections	102
4.2.7.5	Examination by execution	104

4.2.7.6	Testing levels/test approaches	106
4.2.8	Validation	107
4.2.8.1	Delimitation	107
4.2.8.2	Terminology – Definition	108
4.2.8.3	Procedure	109
4.2.9	Traceability	112
4.2.9.1	Definition	112
4.2.9.2	Necessity	113
4.2.9.3	Benefit	113
4.2.9.4	Implementation	114
4.3	The development process	115
4.3.1	Introduction, constraints	115
4.3.2	Standards requirements for the development process	116
4.3.2.1	Planning the activities before their realization	116
4.3.2.2	Level of detail of the activities is depending on the safety contribution of the software	117
4.3.2.3	Design input before design output	117
4.3.2.4	Mandatory Documentation	119
4.3.2.5	Change management	120
4.3.3	Possible development processes	120
4.3.3.1	Factors affecting the selection and design of development processes	120
4.3.3.2	Cascading process	122
4.3.3.3	Iterative/incremental processes	123
4.3.3.4	Agile processes	126
4.3.4	Other best practices in software development and their manifestation in medical software	130
4.3.4.1	Using tools/tool validation	130
4.3.4.2	Continuous Integration	131
4.3.4.3	Test automation	132
4.3.4.4	Using an ALM tool	133
5	The benefit of standards	135
5.1	Background on standardization	135
5.2	Standards on producing conformity with the legal requirements	137
5.3	Process standards	141
5.3.1	Software life cycle	141
5.3.1.1	Interfaces with quality and risk management	141
5.3.1.2	How big may a software unit be?	143
5.3.1.3	Requirements for software reliability	144

5.3.2	Quality management.....	145
5.3.2.1	Approach to implementing the quality management system.....	146
5.3.2.2	Approach in monitoring by internal audits and system analysis .	147
5.3.2.3	Changes in the 2016 version of the EN ISO 13485 standard.....	148
5.3.3	Risk management.....	148
5.3.3.1	Risk considerations in IT networks.....	163
5.3.4	Usability.....	164
5.3.5	Information security.....	165
5.3.6	Clinical IT risk management.....	169
5.4	Product standards.....	169
5.4.1	Electrical medical devices.....	169
5.4.2	Health software.....	176
5.4.2.1	Background on IEC 82304-1.....	176
5.4.2.2	Requirements of IEC 82304-1.....	176
5.5	Standards with additional area of application.....	178
5.5.1	Clinical and performance evaluation.....	178
5.6	Index of standards and guidelines.....	179
5.6.1	Harmonized European standards for medical devices and in- vitro diagnostic medical devices.....	179
5.6.2	European standards.....	179
5.6.3	International standards and technical reports.....	180
5.6.4	FDA Guidance documents.....	180
6	Prospects.....	183
6.1	Future factors which will affect the European legal framework ..	183
6.2	The future role of standards.....	184
6.3	Notified bodies – from partner of the manufacturers to the long arm of the authorities.....	185
6.4	Future standards projects regarding medical software.....	185
7	Abbreviations/acronyms.....	189
8	References and web links.....	193
8.1	References.....	193
8.2	Web links.....	197
9	Annex.....	199
9.1	Questions for determining the legal implications.....	199
9.2	Stakeholders with influence on the legal implications.....	200
9.3	Conformity assessment procedure of the European regulations ..	201

9.4	Classification according to the European MDR.....	204
10	Acknowledgement.....	205
