

## Contents

### Lecture Session 1: Active Noise Cancellation

- 01 Signal Processing Challenges for Active Noise Cancellation Headphones** ..... 11  
*Stefan Liebich, Johannes Fabry, Peter Jax, Peter Vary, RWTH Aachen University*
- 02 Hybrid Active Noise Control Structures: A Short Overview** ..... 16  
*Piero Rivera Benois, Patrick Nowak, Udo Zölzer, Helmut Schmidt University, Hamburg*
- 03 Active control of noise and vibration for time-varying transfer paths** ..... 21  
*Arthur Berkhoff, University of Twente, EM-SDAC, Enschede, The Netherlands;  
 TNO Acoustics and Sonar, The Hague, The Netherlands*
- 04 The Occlusion Effect – Measurements, Simulations and Countermeasures** ..... 26  
*Thomas Zurbrügg, toz GmbH, Frauenfeld, Switzerland*

### Lecture Session 2: Signal Enhancement for Hearing Aids and Communication Systems

- 05 A Relative-Transfer-Function-based Post-Filter for Speech Enhancement in Hearing Aids using a Nearby External Microphone** ..... 31  
*Dianna Yee<sup>1</sup>, Homayoun Kamkar-Parsi<sup>2</sup>, Rainer Martin<sup>1</sup>, Henning Puder<sup>2</sup>  
<sup>1</sup>Ruhr University Bochum; <sup>2</sup>Sivantos GmbH, Erlangen*
- 06 Multi-loudspeaker equalization for acoustic transparency in a custom hearing device** ..... 36  
*Henning Schepker, Florian Denk, Birger Kollmeier, Simon Doclo, University of Oldenburg*
- 07 On the Benefit of a Stereo Acoustic Echo Cancellation in an In-Car Communication System** ..... 41  
*Jan Franzen, Inka Meyer zum Alten Borgloh, Tim Fingscheidt, Technical University of Braunschweig*
- 08 Acoustic Tube Interpolation for Spectral Envelope Estimation in Artificial Bandwidth Extension** ..... 46  
*Thomas Schlien, Peter Jax, Peter Vary, RWTH Aachen University*

### Lecture Session 3: Diagnostics, Paralinguistics and Biosignals

- 09 Automatic Screening for Transition into Dementia using Speech** ..... 51  
*Jochen Weiner, Tanja Schultz, University of Bremen*
- 10 Evaluation of the Pain Level from Speech: Introducing a Novel Pain Database and Benchmarks** ..... 56  
*Zhao Ren<sup>1</sup>, Nicholas Cummins<sup>1</sup>, Jing Han<sup>1</sup>, Sebastian Schnieder<sup>2,3</sup>, Jarek Krajewski<sup>3,4</sup>, Björn Schuller<sup>1,5</sup>  
<sup>1</sup>University of Augsburg; <sup>2</sup>Hochschule für Medien, Kommunikation und Wirtschaft Berlin;  
<sup>3</sup>University of Wuppertal; <sup>4</sup>Rheinische Fachhochschule Köln; <sup>5</sup>Imperial College London, UK*

|           |   |           |
|-----------|---|-----------|
| <b>11</b> | <b>On the Effects of Speaker Gender in Emotion Recognition Training Data</b> .....                    | <b>61</b> |
|           | <i>Ziyi Xu, Patrick Meyer, Tim Fingscheidt, Technische Universität Braunschweig</i>                   |           |
| <b>12</b> | <b>A comparison of EMG-to-Speech Conversion for Isolated and Continuous Speech</b> .....              | <b>66</b> |
|           | <i>Lorenz Diener, Sebastian Bredehöft, Tanja Schultz, Cognitive Systems Lab, University of Bremen</i> |           |

#### Lecture Session 4: Neural Processing in Automatic Speech Recognition

|           |  |           |
|-----------|--|-----------|
| <b>13</b> | <b>DNN/CNN Acoustic Model Turbo Fusion for Phoneme Recognition.</b> .....  | <b>71</b> |
|           | <i>Timo Lohrenz, Wei Li, Tim Fingscheidt, Technical University of Braunschweig</i>   |           |
| <b>14</b> | <b>Sequence Modeling and Alignment for LVCSR-Systems</b> .....   | <b>76</b> |
|           | <i>Eugen Beck, Albert Zeyer, Patrick Doetsch, André Merboldt, Ralf Schlüter, Hermann Ney, RWTH Aachen University</i>   |           |
| <b>15</b> | <b>Accurately Capturing Speech Feature Distributions by Extending Supervectors for Robust Speaker Recognition</b> .....  | <b>81</b> |
|           | <i>Kevin Wilkinghoff, Fraunhofer Institute for Communication, Information Processing and Ergonomics FKIE, Wachtberg</i>  |           |
| <b>16</b> | <b>Objective Assessment of a Speech Enhancement Scheme with an Automatic Speech Recognition-Based System</b> .....   | <b>86</b> |
|           | <i>Rainer Huber<sup>1</sup>, Arne Pusch<sup>1</sup>, Niko Moritz<sup>1</sup>, Jan Rannies<sup>1,2</sup>, Henning Schepker<sup>3</sup>, Bernd T. Meyer<sup>3</sup><br/><sup>1</sup>Fraunhofer IDMT, Oldenburg; <sup>2</sup>Boston University, Boston, MA, USA; <sup>3</sup>University of Oldenburg, Oldenburg</i> |           |

#### Lecture Session 5: Acoustic Sensor Networks

|           |   |            |
|-----------|---|------------|
| <b>17</b> | <b>Resource Allocation for Distributed Blind Source Separation</b> .....  | <b>91</b>  |
|           | <i>Markus Bachmann, Andreas Brendel, Walter Kellermann, University of Erlangen-Nuremberg, Erlangen</i>  |            |
| <b>18</b> | <b>Fast and Accurate Audio Resampling for Acoustic Sensor Networks by Polyphase-Farrow Filters with FFT Realization</b> .....   | <b>96</b>  |
|           | <i>Aleksej Chinaev<sup>1</sup>, Gerald Enzner<sup>1</sup>, Jörg Schmalenströer<sup>2</sup><br/><sup>1</sup>Ruhr University Bochum; <sup>2</sup>Paderborn University</i> |            |
| <b>19</b> | <b>Gender Discrimination Versus Speaker Identification Through Privacy-Aware Adversarial Feature Extraction</b> .....   | <b>101</b> |
|           | <i>Alexandru Nelus, Rainer Martin, Ruhr University Bochum</i>   |            |
| <b>20</b> | <b>RTF-Based Binaural MVDR Beamformer Exploiting an External Microphone in a Diffuse Noise Field</b> .....  | <b>106</b> |
|           | <i>Nico Gößling, Simon Doclo, University of Oldenburg</i>   |            |

#### Lecture Session 6: Speech and Audio Quality Evaluation

|           |  |            |
|-----------|--|------------|
| <b>21</b> | <b>Auditory Assessment of Multichannel Audio Systems</b> ..... | <b>111</b> |
|           | <i>Magnus Schäfer, HEAD acoustics GmbH, Herzogenrath</i>       |            |

|           |  |            |
|-----------|--|------------|
| <b>22</b> | <b>Signal-based Root Cause Analysis of Quality Impairments in Speech Communication Networks</b> .....  | <b>116</b> |
|           | <i>Tobias Hübschen<sup>1</sup>, Gabriel Mittag<sup>2</sup>, Sebastian Möller<sup>2,3</sup>, Gerhard Schmidt<sup>1</sup></i>  |            |
|           | <i><sup>1</sup>Christian-Albrechts-Universität zu Kiel; <sup>2</sup>Technische Universität Berlin; <sup>3</sup>Deutsches Forschungszentrum für Künstliche Intelligenz (DFKI), Berlin</i> |            |

|           |   |            |
|-----------|---|------------|
| <b>23</b> | <b>Perceived Listening Effort for In-car Communication systems</b> .....              | <b>121</b> |
|           | <i>Jan Reimes<sup>1</sup>, Christian Lücke<sup>2</sup></i>                            |            |
|           | <i><sup>1</sup>HEAD acoustics GmbH, Herzogenrath; <sup>2</sup>sonoware GmbH, Kiel</i> |            |

## Lecture Session 7: Machine Learning for Speech Enhancement

|           |   |            |
|-----------|---|------------|
| <b>24</b> | <b>Robust DNN-Based Speech Enhancement with Limited Training Data</b> .....                                   | <b>126</b> |
|           | <i>Robert Rehr, Timo Gerkmann, Universität Hamburg</i>  |            |
| <b>25</b> | <b>Smoothing along Frequency in Online Neural Network Supported Acoustic Beamforming</b> .                    | <b>131</b> |
|           | <i>Jens Heitkaemper, Jahn Heymann, Reinhold Haeb-Umbach, Paderborn University</i>                             |            |
| <b>26</b> | <b>Multichannel Nonnegative Matrix Factorization for Ego-Noise Suppression</b> .....                          | <b>136</b> |
|           | <i>Thomas Haubner, Alexander Schmidt, Walter Kellermann, Friedrich Alexander University Erlangen-Nürnberg</i> |            |

## Poster

### Poster Session 1

|            |   |            |
|------------|---|------------|
| <b>P01</b> | <b>Online Adaptation for Jointly Optimized Blind Source Separation and Dereverberation of Speech Mixtures</b> .....                           | <b>141</b> |
|            | <i>Timo Schuster, Stefan Feldes, Mannheim University of Applied Sciences</i>  |            |
| <b>P02</b> | <b>Subband Based Room Impulse Response Reshaping</b> .....  | <b>146</b> |
|            | <i>Radoslaw Mazur, Fabrice Katzberg, Martina Böhme, Alfred Mertins, University of Lübeck</i>  |            |
| <b>P03</b> | <b>Good Noise Power Estimators Are Not Always Good</b> .....  | <b>151</b> |
|            | <i>Patrick Meyer, Samy Elshamy, Technische Universität Braunschweig</i>   |            |
| <b>P04</b> | <b>Evaluation of Robust Constrained MFMVDR Filtering for Single-Channel Speech Enhancement</b> .....  | <b>156</b> |
|            | <i>Dörte Fischer, Simon Doclo, Department of Medical Physics and Acoustics and Cluster of Excellence Hearing4all, University of Oldenburg</i> |            |
| <b>P05</b> | <b>Evaluation of binaural Own Voice Detection (OVD) algorithms</b> .....  | <b>161</b> |
|            | <i>Joerg Bitzer, Sascha Bilert, Inga Holube, Jade University of Applied Sciences, Oldenburg</i>   |            |
| <b>P06</b> | <b>Distributed MAP Estimators for Noise Reduction in Fully Connected Wireless Acoustic Sensor Networks</b> .....                              | <b>166</b> |
|            | <i>Raziyeh Ranjbarian<sup>1</sup>, Simon Doclo<sup>2</sup>, Hamid Reza Abutalebi<sup>1</sup></i>  |            |
|            | <i><sup>1</sup>Yazd University, Yazd, Iran; <sup>2</sup>University of Oldenburg</i>   |            |

|                             |   |            |
|-----------------------------|---|------------|
| <b>P07</b>                  | <b>Benchmarking Neural Network Architectures for Acoustic Sensor Networks</b> .....   | <b>171</b> |
|                             | <i>Janek Ebberts, Jens Heitkaemper, Jörg Schmalenströer, Reinhold Haeb-Umbach, Paderborn University</i>   |            |
| <b>P08</b>                  | <b>Unsupervised Domain Adaptation by Adversarial Learning for Robust Speech Recognition</b> .   | <b>176</b> |
|                             | <i>Pavel Denysov, Ngoc Thang Vu, Marc Ferras Font, University of Stuttgart</i>  |            |
| <b>P09</b>                  | <b>Parameter Optimization for CTC Acoustic Models in a Less-resourced Scenario: An Empirical Study</b> .....  | <b>181</b> |
|                             | <i>Markus Müller, Sebastian Stüker, Alex Waibel, Karlsruhe Institute of Technology</i>  |            |
| <b>P10</b>                  | <b>Keyword Detection for the Activation of Speech Assistants</b> .....  | <b>186</b> |
|                             | <i>Hans-Günter Hirsch, Michael Gref, Niederrhein University of Applied Sciences, Krefeld</i>  |            |
| <b>P11</b>                  | <b>Utilizing Slow Feature Analysis for Lipreading</b> .....   | <b>191</b> |
|                             | <i>Jan Freiwald, Mahdie Karbasi, Steffen Zeiler, Jan Melchior, Varun Kompella, Laurenz Wiskott, Dorothea Kolossa, Ruhr University Bochum</i>  |            |
| <b>P12</b>                  | <b>Diagnostic and Summative Approach for Predicting Speech Communication Quality in a Super-Wideband Context</b> .....  | <b>196</b> |
|                             | <i>Sebastian Möller<sup>1,3</sup>, Tobias Hübschen<sup>2</sup>, Gabriel Mittag<sup>1</sup>, Gerhard Schmidt<sup>2</sup></i><br><i><sup>1</sup>Technische Universität Berlin; <sup>2</sup>Christian-Albrechts-Universität zu Kiel; <sup>3</sup>Deutsches Forschungszentrum für Künstliche Intelligenz (DFKI), Berlin</i> |            |
| <b>P13</b>                  | <b>Observations from a Simple Vocal-Tract-Model's Behaviour for PD-Dysarthric Speech: Applicability</b> .....   | <b>201</b> |
|                             | <i>Ulrich Heute, Gerhard Schmidt, Christian-Albrechts-Universität zu Kiel</i>   |            |
| <b>P14</b>                  | <b>The Articulatory Code and Related OVC-Gestures</b> .....   | <b>206</b> |
|                             | <i>Harald Höge, Universität der Bundeswehr München, Neubiberg</i>   |            |
| <br><b>Poster Session 2</b> |   |            |
| <b>P15</b>                  | <b>Enhancement of G.711-Coded Speech Providing Quality Higher Than Uncoded</b> .....  | <b>211</b> |
|                             | <i>Ziyue Zhao, Huijun Liu, Tim Fingscheidt, Technische Universität Braunschweig</i>   |            |
| <b>P16</b>                  | <b>NARA-WPE: A Python package for weighted prediction error dereverberation in Numpy and Tensorflow for online and offline processing</b> .....   | <b>216</b> |
|                             | <i>Lukas Drude, Jahn Heymann, Christoph Boeddeker, Reinhold Haeb-Umbach, University of Paderborn</i>  |            |
| <b>P17</b>                  | <b>Iterative Alternating Least-Squares Approach to Jointly Estimate the RETFs and the Diffuse PSD</b> .....   | <b>221</b> |
|                             | <i>Marvin Tammen<sup>1</sup>, Ina Kodrasi<sup>2</sup>, Simon Doclo<sup>1</sup></i><br><i><sup>1</sup>University of Oldenburg; <sup>2</sup>Idiap Research Institute, Martigny, Switzerland</i>   |            |
| <b>P18</b>                  | <b>Equalization filter design for achieving acoustic transparency in a semi-open fit hearing device</b> .....   | <b>226</b> |
|                             | <i>Florian Denk, Henning Schepker, Simon Doclo, Birger Kollmeier, University of Oldenburg</i>   |            |
| <b>P19</b>                  | <b>A gaze-based attention model for spatially-aware hearing aids</b> .....  | <b>231</b> |
|                             | <i>Giso Grimm, Hendrik Kayser, Maartje Hendrikse, Volker Hohmann, University of Oldenburg</i>   |            |

|            |  |            |
|------------|--|------------|
| <b>P20</b> | <b>Evaluation of Signal-Dependent Partial Noise Estimation Algorithms for Binaural Hearing Aids</b> .....  | <b>236</b> |
|            | <i>Jonas Klug<sup>1</sup>, Daniel Marquardt<sup>1,2</sup>, Nico Gößling<sup>1</sup>, Simon Doclo<sup>1</sup></i><br><i><sup>1</sup>University of Oldenburg; <sup>2</sup>Starkey Hearing Technologies, USA</i>  |            |
| <b>P21</b> | <b>Maximum-Likelihood and Maximum-A-Posteriori Perspectives for Blind Channel Identification on Acoustic Sensor Network Data</b> .....   | <b>241</b> |
|            | <i>Philipp Thüne, Gerald Enzner, Ruhr-Universität Bochum</i>   |            |
| <b>P22</b> | <b>Insights into the Interplay of Sampling Rate Offsets and MVDR Beamforming</b> .....   | <b>246</b> |
|            | <i>Jörg Schmalenströer, Reinhold Haeb-Umbach, University of Paderborn</i>  |            |
| <b>P23</b> | <b>Open Source Automatic Speech Recognition for German</b> .....   | <b>251</b> |
|            | <i>Benjamin Milde, Arne Köhn, Universität Hamburg</i>  |            |
| <b>P24</b> | <b>Improving Robust Speech Recognition for German Oral History Interviews Using Multi-Condition Training</b> .....   | <b>256</b> |
|            | <i>Michael Gref<sup>1,2</sup>, Christoph Schmidt<sup>1</sup>, Joachim Köhler<sup>1</sup></i><br><i><sup>1</sup>Fraunhofer Institute for Intelligent Analysis and Information Systems (IAIS), Sankt Augustin;</i><br><i><sup>2</sup>Niederrhein University of Applied Sciences, Krefeld</i> |            |
| <b>P25</b> | <b>Robust Speaker Identification by Fusing Classification Scores with a Neural Network</b> .....   | <b>261</b> |
|            | <i>Kevin Wilkinghoff, Paul M. Baggenstoss, Alessia Cornaggia-Urrigshardt, Frank Kurth,</i><br><i>Fraunhofer Institute for Communication, Information Processing and Ergonomics FKIE, Wachtberg</i>   |            |
| <b>P26</b> | <b>Super-Wideband Extension of a Perceptual Based Echo Assessment Method for Aurally Adequate Evaluation of Residual Single Talk Echoes</b> .....  | <b>266</b> |
|            | <i>Stefan Bleiholder, Jan Reimes, Frank Kettler, HEAD acoustics GmbH, Herzogenrath</i>   |            |
| <b>P27</b> | <b>Statistical Modeling of Speech Spectral Coefficients in Patients with Parkinson’s Disease</b> ..  | <b>271</b> |
|            | <i>Ina Kodrasi, Hervé Bourlard, Idiap Research Institute, Martigny, Switzerland</i>  |            |
| <b>P28</b> | <b>Session-Independent Array-Based EMG-to-Speech Conversion using Convolutional Neural Networks</b> .....  | <b>276</b> |
|            | <i>Lorenz Diener, Gerrit Felsch, Miguel Angrick, Tanja Schultz, University of Bremen</i>   |            |

### Poster Session 3

|            |   |            |
|------------|---|------------|
| <b>P29</b> | <b>Optimal temporal dynamics of MFCCs for low-complexity VAD systems – a case study</b> ...   | <b>281</b> |
|            | <i>Alexandra Craciun<sup>1</sup>, Tom Bäckström<sup>2</sup></i><br><i><sup>1</sup>XMOS Ltd, UK; <sup>2</sup>Aalto University, Finland</i>   |            |
| <b>P30</b> | <b>Overcoming Covariance Matrix Phase Sensitivity in Single-Channel Speech Enhancement with Correlated Spectral Components</b> .....  | <b>286</b> |
|            | <i>Johannes Stahl, Sean U. N. Wood, Pejman Mowlae, Graz University of Technology, Austria</i>   |            |
| <b>P31</b> | <b>Acoustic Howling Detection and Suppression for IP-Based Teleconference Systems</b> .....   | <b>291</b> |
|            | <i>Stefan Kühl<sup>1</sup>, Carlotta Anemüller<sup>1</sup>, Christiane Antweiler<sup>1</sup>, Peter Jax<sup>1</sup>, Florian Heese<sup>2</sup>,</i><br><i>Patrick Vicinus<sup>2</sup></i><br><i><sup>1</sup>RWTH Aachen University; <sup>2</sup>LogMeIn Germany GmbH, Dresden</i> |            |

|            |   |            |
|------------|---|------------|
| <b>P32</b> | <b>A Synchronized Binaural N-of-M Sound Coding Strategy for Bilateral Cochlear Implant Users</b> .....  | <b>296</b> |
|            | <i>Tom Gajęcki, Waldo Nogueira, Hannover Medical University</i>   |            |
| <b>P33</b> | <b>Performance Prediction of the Binaural MVDR Beamformer with Partial Noise Estimation using a Binaural Speech Intelligibility Model</b> .....   | <b>301</b> |
|            | <i>Christopher F. Hauth, Nico Gößling, Thomas Brand, University of Oldenburg</i>  |            |
| <b>P34</b> | <b>Extension of the Framework for auditory discrimination experiments (FADE) to predict the Göttingen (everyday) sentence speech test</b> .....   | <b>306</b> |
|            | <i>David Hülsmeier, Anna Warzybok, Marc René Schädler, Universität Oldenburg</i>  |            |
| <b>P35</b> | <b>MARVELO – A Framework for Signal Processing in Wireless Acoustic Sensor Networks</b> .   | <b>311</b> |
|            | <i>Haitam Afifi, Jörg Schmalenströer, Joerg Ullmann, Reinhold Haeb-Umbach, Holger Karl, University of Paderborn</i>   |            |
| <b>P36</b> | <b>Source separation by fuzzy-membership value aware beamforming and masking in ad hoc arrays</b> .....   | <b>316</b> |
|            | <i>Sebastian Gergen<sup>1</sup>, Rainer Martin<sup>2</sup>, Nilesh Madhu<sup>3</sup></i><br><i><sup>1</sup>Bochum Institute of Technology gGmbH, Bochum; <sup>2</sup>Ruhr University Bochum; <sup>3</sup>Ghent University – imec, Belgium</i> |            |
| <b>P37</b> | <b>Densely Connected Convolutional Networks for Speech Recognition</b> .....  | <b>321</b> |
|            | <i>Chia-Yu Li, Ngoc Thang Vu, University of Stuttgart</i>   |            |
| <b>P38</b> | <b>“Gap after the next two vehicles“: A Spatio-temporally Situated Dialog for a Cooperative Driving Assistant</b> .....   | <b>326</b> |
|            | <i>Martin Heckmann<sup>1</sup>, Dennis Orth<sup>1,2</sup>, Dorothea Kolossa<sup>2</sup></i><br><i><sup>1</sup>Honda Research Institute Europe, Offenbach/Main; <sup>2</sup>Ruhr University Bochum</i>   |            |
| <b>P39</b> | <b>Deep Learning of Articulatory-Based Representations and Applications for Improving Dysarthric Speech Recognition</b> .....   | <b>331</b> |
|            | <i>Feifei Xiong, Jon Barker, Heidi Christensen, University of Sheffield, Sheffield, UK</i>  |            |
| <b>P40</b> | <b>Automatic Estimation of the Triangular Vowel Space Area from i-Vectors</b> .....   | <b>336</b> |
|            | <i>Maureen Tanuadji, Michael Stadtschnitzer, Rolf Bardeli, Hagen Jaeger, Fraunhofer IAIS, Sankt Augustin</i>  |            |
| <b>P41</b> | <b>ANN-based Alzheimer’s disease classification from bag of words</b> .....   | <b>341</b> |
|            | <i>Philipp Klumpp, Julian Fritsch, Elmar Nöth, Friedrich-Alexander-Universität Erlangen-Nürnberg, Erlangen</i>  |            |
| <b>P42</b> | <b>Optical force and distance sensing in intraoral devices for stroke rehabilitation: a distance calibration and force classification approach</b> .....  | <b>345</b> |
|            | <i>Christoph Wagner, Simon Stone, Peter Birkholz, Technische Universität Dresden</i>  |            |
