

Inhaltsverzeichnis

Keynotes	1
-----------------------	----------

Verification

1 fbPDR: In-depth Combination of Forward and Backward Analysis in Property Directed Reachability (Extended Abstract)	2
Tobias Seufert and Christoph Scholl	
2 ACCESS: HW/SW-Co-Equivalence Checking for Firmware Optimization	4
Michael Schwarz, Dominik Stoffel and Wolfgang Kunz	
3 Inductive Proof Rules Beyond Safety Properties	8
Martin Köhler and Klaus Schneider	
4 Approximation of Neural Networks for Verification	17
Fin Hendrik Bahnsen and Goerschwin Fey	

HW/SW Systems

5 Self-Explaining Digital Systems – Some Technical Steps	27
Goerschwin Fey and Rolf Drechsler	
6 Measuring NoC Fault Tolerance with Performability	35
Jie Hou and Martin Radetzki	
7 Analyse sicherheitskritischer Software für RISC-V-Prozessoren	36
Peer Adelt, Bastian Koppelman, Wolfgang Müller and Christoph Scheytt	
8 Logical Analysis of Distributed Systems: The Importance of Being Constructive	41
Michael Mendler	

Design Methods and Optimization

9 Optimization Framework for Hardware Design of Engine Control Units	42
Iryna Kmitina, Nico Bannow, Christoph Grimm, Daniel Zielinski and Carna Zivkovic	
10 Logic Optimization of Majority-Inverter Graphs	50
Heinz Riener, Eleonora Testa, Winston Haaswijk, Alan Mishchenko, Luca Amaru, Giovanni De Micheli and Mathias Soeken	
11 How to Keep 4-Eyes Principle in a Design and Property Generation Flow	54
Keerthikumara Devarajegowda, Wolfgang Ecker and Wolfgang Kunz	

12	Automated Sensor Firmware Development – Generation, Optimization, and Analysis	60
	Jens Rudolf, Manuel Strobel, Joscha-Joel Benz, Christian Haubelt, Martin Radetzki and Oliver Bringmann	

System Design

13	SEMAS – System Engineering Methodology for Automated Systems – The World Described in Layers	72
	Markus Hedderich, Markus Heimberger and Axel Klekamp	
14	Ein Ansatz für die agile, verteilte Entwicklung Cyber-Physischer „Systems of Systems“ (Work in Progress)	81
	Christoph Grimm, Frank Wawrzik and Carna Zivkovic	
15	Processor Hardware Security Vulnerabilities and their Detection by Unique Program Execution Checking	85
	Mohammad Rahmani Fadiheh, Dominik Stoffel, Clark Barrett, Subhasish Mitra and Wolfgang Kunz	
16	Model-Based Configuration of a Coarse-Grained Reconfigurable Architecture	87
	Jens Froemmer, Nico Bannow, Axel Aue, Christoph Grimm and Klaus Schneider
