Keynote

Challenges and Changes in Automotive SC: Trends – Portfolio – Development

Axel Wenzler, Robert Bosch GmbH

Keynote

5G for the Industrial IoT

Andreas Müller, Robert Bosch GmbH, Renningen

Eingeladener Fachvortrag

Challenges and Opportunities of Deep-Submicron CMOS for Automotive Radar Transceivers

Philipp Ritter, Robert Bosch GmbH

Session 1: Data Converter and Subcircuits

- 1.1 A 100-MS/s 9-bit Charge-Injection Cell based SAR-ADC in 65 nm LP CMOS 7**
Marcel Runge, Dario Schmock, Philipp Scholz, Technische Universität Berlin
- 1.2 A Reconfigurable Arithmetic ADC for FPGA Implementations 11**
Oliver Bachmann, Klaus Hofmann, Technische Universität Darmstadt
- 1.3 A Beam-Forming Track and Hold Amplifier 16**
Enne Wittenhagen, Marcel Runge, Friedel Gerfers, Technische Universität Berlin

Session 2: Digitally Enhanced Analog Systems

- 2.1 Time-variant digital control for safe and reliable analog systems 21**
Saeid Yazdani¹, Werner Wolz¹, Rainer Engelhardt², Helmut Steinbach², Ulrich Heinkel¹
¹Technische Universität Chemnitz, ²Steinbeis-Forschungszentrum Systementwurf und Test, Chemnitz

Session 3: EDA and Design Methodology for Analog and Mixed-signal Circuits and Systems

- 3.1 Automatic Initial Sizing of Operational Amplifiers with Support of Weak, Moderate and Strong Inversion 25**
Inga Abel, Helmut Graeb, Technische Universität München
- 3.2 Innovative Design Methodology for Analog-to-Digital and Digital-to-Analog Converters 29**
Reimund Wittmann, Frank Henkel, IMST GmbH, Kamp-Lintfort; Andreas Ripp, MunEDA GmbH, Unterhaching; Alexander Meyer, Ralf Wunderlich, Stefan Heinen, RWTH Aachen University; Manfred Dietrich, Dikuli, Müllrose
- 3.3 Modeling Circuits with Parameter Variation by ELSA: Eigenvalue Based Linear Hybrid System Abstraction 35**
Ahmad Tarraf, Lars Hedrich, Goethe Universität Frankfurt

3.4	AnastASICA – Towards Structured and Automated Analog/Mixed-Signal IC Design for Automotive Electronics	41
	<i>Benjamin Prautsch, Helga Dornelas, Fraunhofer IIS/EAS, Dresden; Reimund Wittmann, Frank Henkel, IMST GmbH, Kamp-Lintfort; Frank Schenkel, MunEDA GmbH, Unterhaching Johannes Kölsch, Christoph Grimm, Technische Universität Kaiserslautern; Gunter Strube, Blu Business Development, Gröbenzell</i>	

Session 4: AI, ML and Neural Networks

4.1	Ain't got time for this? Reducing manual evaluation effort with Machine Learning based Grouping of Analog Waveform Test Data	47
	<i>Tom Reinhold¹, Marco Seeland², Martin Grabmann¹, Christian Paintz³, Patrick Mäder², Georg Gläser¹</i>	
	<i>¹IMMS GmbH, Ilmenau; ²Technische Universität Ilmenau; ³Melexis GmbH, Erfurt</i>	
4.2	Synthesis of Power-Efficient Analog Neural Networks for Signal Processing	53
	<i>Florian Aul, Nikoletta Katsaouni, Marcel H. Schulz, Lars Hedrich, Goethe Universität Frankfurt</i>	

Session 5: RF Circuits and Systems

5.1	Circuit Design-oriented Transmission Line Modeling for Millimeter-wave Integrated Circuits	59
	<i>Yannick Wenger, Bernd Meinerzhagen, Technische Universität Braunschweig</i>	
5.2	HF- und UHF-RFID-Sensorsysteme: Entwurf, Optimierung, Evaluierung	64
	<i>Björn Bieske, Tom Reinhold, Jun Tan, IMMS GmbH, Ilmenau</i>	

Session 6: Application of Analog Circuits and Systems

6.1	An Integrated Incremental Conductance MPPT based on a Delta Modulator with Analog Preprocessing	70
	<i>Leo Rolff, Michael Hanhart, Ralf Wunderlich, Stefan Heinen, RWTH Aachen University</i>	
6.2	Digitally Programmable low-noise Experimenter's Platform for 300 kHz Ultrasonic Transducers	75
	<i>Lukas Mennicke, Klaus Hofmann, Technische Universität Darmstadt</i>	
6.3	Advantages of an Asymmetric Design of Kuijk's Bandgap used in an Automotive Environment	79
	<i>Dirk M. Nuernbergk, Christian Lang, Nicolai Dobrostomat, Melexis GmbH, Erfurt</i>	
6.4	Erforschung eines Leistungstreibers für die Ansteuerung einer Pulslichtquelle mit ns-Bereich	84
	<i>Björn Brachthäuser, Michael Wahl, Universität Siegen</i>	
6.5	Eingeladener Fachvortrag MEMS – enabling technology for future mobility solutions	
	<i>Markus Sonnemann, Robert Bosch GmbH</i>
