

# Inhaltsverzeichnis

## Keynote

### Challenges and Changes in Automotive SC: Trends – Portfolio – Development

*Axel Wenzler, Robert Bosch GmbH*

## Keynote

### 5G for the Industrial IoT

*Andreas Müller, Robert Bosch GmbH, Renningen*

## Eingeladener Fachvortrag

### Challenges and Opportunities of Deep-Submicron CMOS for Automotive Radar Transceivers

*Philipp Ritter, Robert Bosch GmbH*

## Session 1: Data Converter and Subcircuits

- 1.1 A 100-MS/s 9-bit Charge-Injection Cell based SAR-ADC in 65 nm LP CMOS ..... 7**  
*Marcel Runge, Dario Schmock, Philipp Scholz, Technische Universität Berlin*
- 1.2 A Reconfigurable Arithmetic ADC for FPGA Implementations ..... 11**  
*Oliver Bachmann, Klaus Hofmann, Technische Universität Darmstadt*
- 1.3 A Beam-Forming Track and Hold Amplifier ..... 16**  
*Enne Wittenhagen, Marcel Runge, Friedel Gerfers, Technische Universität Berlin*

## Session 2: Digitally Enhanced Analog Systems

- 2.1 Time-variant digital control for safe and reliable analog systems ..... 21**  
*Saeid Yazdani<sup>1</sup>, Werner Wolz<sup>1</sup>, Rainer Engelhardt<sup>2</sup>, Helmut Steinbach<sup>2</sup>, Ulrich Heinkel<sup>1</sup>*  
<sup>1</sup>Technische Universität Chemnitz, <sup>2</sup>Steinbeis-Forschungszentrum Systementwurf und Test, Chemnitz

## Session 3: EDA and Design Methodology for Analog and Mixed-signal Circuits and Systems

- 3.1 Automatic Initial Sizing of Operational Amplifiers with Support of Weak, Moderate and Strong Inversion ..... 25**  
*Inga Abel, Helmut Graeb, Technische Universität München*
- 3.2 Innovative Design Methodology for Analog-to-Digital and Digital-to-Analog Converters .... 29**  
*Reimund Wittmann, Frank Henkel, IMST GmbH, Kamp-Lintfort; Andreas Ripp, MunEDA GmbH, Unterhaching; Alexander Meyer, Ralf Wunderlich, Stefan Heinen, RWTH Aachen University; Manfred Dietrich, Dikuli, Müllrose*
- 3.3 Modeling Circuits with Parameter Variation by ELSA: Eigenvalue Based Linear Hybrid System Abstraction ..... 35**  
*Ahmad Tarraf, Lars Hedrich, Goethe Universität Frankfurt*

<b>3.4</b>	<b>AnastASICA – Towards Structured and Automated Analog/Mixed-Signal IC Design for Automotive Electronics</b> .....	<b>41</b>
	<i>Benjamin Prautsch, Helga Dornelas, Fraunhofer IIS/EAS, Dresden; Reimund Wittmann, Frank Henkel, IMST GmbH, Kamp-Lintfort; Frank Schenkel, MunEDA GmbH, Unterhaching Johannes Kölsch, Christoph Grimm, Technische Universität Kaiserslautern; Gunter Strube, Blu Business Development, Gröbenzell</i>	

## Session 4: AI, ML and Neural Networks

<b>4.1</b>	<b>Ain't got time for this? Reducing manual evaluation effort with Machine Learning based Grouping of Analog Waveform Test Data</b> .....	<b>47</b>
	<i>Tom Reinhold<sup>1</sup>, Marco Seeland<sup>2</sup>, Martin Grabmann<sup>1</sup>, Christian Paintz<sup>3</sup>, Patrick Mäder<sup>2</sup>, Georg Gläser<sup>1</sup></i>	
	<i><sup>1</sup>IMMS GmbH, Ilmenau; <sup>2</sup>Technische Universität Ilmenau; <sup>3</sup>Melexis GmbH, Erfurt</i>	
<b>4.2</b>	<b>Synthesis of Power-Efficient Analog Neural Networks for Signal Processing</b> .....	<b>53</b>
	<i>Florian Aul, Nikoletta Katsaouni, Marcel H. Schulz, Lars Hedrich, Goethe Universität Frankfurt</i>	

## Session 5: RF Circuits and Systems

<b>5.1</b>	<b>Circuit Design-oriented Transmission Line Modeling for Millimeter-wave Integrated Circuits</b> .....	<b>59</b>
	<i>Yannick Wenger, Bernd Meinerzhagen, Technische Universität Braunschweig</i>	
<b>5.2</b>	<b>HF- und UHF-RFID-Sensorsysteme: Entwurf, Optimierung, Evaluierung</b> .....	<b>64</b>
	<i>Björn Bieske, Tom Reinhold, Jun Tan, IMMS GmbH, Ilmenau</i>	

## Session 6: Application of Analog Circuits and Systems

<b>6.1</b>	<b>An Integrated Incremental Conductance MPPT based on a Delta Modulator with Analog Preprocessing</b> .....	<b>70</b>
	<i>Leo Rolff, Michael Hanhart, Ralf Wunderlich, Stefan Heinen, RWTH Aachen University</i>	
<b>6.2</b>	<b>Digitally Programmable low-noise Experimenter's Platform for 300 kHz Ultrasonic Transducers</b> .....	<b>75</b>
	<i>Lukas Mennicke, Klaus Hofmann, Technische Universität Darmstadt</i>	
<b>6.3</b>	<b>Advantages of an Asymmetric Design of Kuijk's Bandgap used in an Automotive Environment</b> .....	<b>79</b>
	<i>Dirk M. Nuernbergk, Christian Lang, Nicolai Dobrostomat, Melexis GmbH, Erfurt</i>	
<b>6.4</b>	<b>Erforschung eines Leistungstreibers für die Ansteuerung einer Pulslichtquelle mit ns-Bereich</b> .....	<b>84</b>
	<i>Björn Brachthäuser, Michael Wahl, Universität Siegen</i>	
<b>6.5</b>	<b>Eingeladener Fachvortrag MEMS – enabling technology for future mobility solutions</b>	
	<i>Markus Sonnemann, Robert Bosch GmbH</i>
