

Contents

Power System Dynamics and Frequency Stability

Chair: Dr.- Ing. Andreas Kubis (PSI Software AG)

- 1 Comparison of grid-forming voltage source converter control concepts with respect to large active power imbalances 9**
Scheifele, Daniel; Schöll, Christian; Lens, Hendrik
- 2 Decentralized Data-Driven Tuning of Droop Frequency Controllers applied to a Non-Linear Grid Model 15**
Almeida Santos, Allan; Mora, Edwin; Peters, Jan; Steinke, Florian
- 3 Dynamic grid modeling for the estimation of inertia and the influence on frequency behavior 20**
Madura, Bartłomiej Tomasz; Glende, Eric; Wolter, Martin

Smart Grid Devices

Chair: Prof. Dr.-Ing. Hendrik Vennegeerts (Universität Duisburg-Essen)

- 4 Copula-based integration of electric vehicles into a smart grid using MILP 25**
Pohl, Christian; Franke, Georg; Schneider, Maximilian; Rinderknecht, Stephan
- 5 A Comparison of Machine Learning Algorithms for Thermal Rating Calculations of Power Cable Systems Based on Measurement Data 31**
Ainhirn, Florian
- 6 Using nontraditional current and voltage converters to create compact power devices of the future 37**
Rafikov, Vadim; Gotovkina, Elena; Yablokov, Andrew; Lebedev, Vladimir

Sector Coupling and Flexibility

Chair: Prof. Dr.-Ing. Matthias Luther (FAU Erlangen-Nürnberg)

- 7 Regulatory barriers for sector coupling systems on distribution level 43**
Wierzba, Bernd Bastian; Riedlinger, Tobias; Möhrke, Fabian; Zdrallek, Markus; Patzack, Sören; Schröder, Malin
- 8 Flexibilization of industrial customers through real time pricing based on multi-agent modeling 48**
Kohne, Thomas; Hauck, Steffen; Roloff, Nils; Weigold, Matthias
- 9 Development of a building optimization model for the planning of urban energy supply systems under consideration of sector coupling 54**
Hauk, Christopher; Breuning, Larissa; Moser, Albert

Simulation and Control of Renewables

Chair: Prof. Dr.-Ing. Bernd Engel (TU Braunschweig)

- 10 New Proposition for Multiple Vector Direct Model Predictive Control of Permanent Magnet Synchronous Generators in Variable-speed Wind Turbines 60**
Rouhabadi, Hossein; Abdelrahem, Mohamed; Kennel, Ralph
- 11 Direct Switching Maximum Power Point Tracking Technique for PV Applications 66**
Ahmed, Mostafa; Abdelrahem, Mohamed; Hackl, Christoph M.; Kennel, Ralph
- 12 Consideration of time delays in real-time simulation of a voltage sourced converter 71**
Graf, Lorenz; Resch, Simon

Smart Grid Operation

Chairs: Prof. Dr.-Ing. habil. Martin Wolter (OvGU Magdeburg) & Prof. Dr.-Ing. Christian Rehtanz (TU Dortmund)

- 13 Evaluation of Optimization Methods for Discrete Power Scheduling Applications in City Districts 76**
Uerlich, Sebastian Alexander
- 14 Smart Grids and Data – Exploring emerging data-driven solutions for Distribution System Operators 82**
Sgrafetto, Laura; Emmerich, Philip; Klingel, Michael
- 15 Impact of Large-Scale Trading of Industrial Flexibility Options on the Operation of a Distribution Grid 88**
Becker, Christian; Plöber, Tim; Böhringer, Marcel; Hanson, Jutta; Roloff, Nils

System Protection and Congestion Management

Chair: Prof. Dr.-Ing. Albert Moser (RWTH Aachen)

- 16 Application of one- and two-ended impedance based fault location algorithms for distance protection 94**
Wolf, Michael; Prommetta, Jonas; Jäger, Johann
- 17 Basic Considerations for Operation and Protection of Modular Grids with Grounding Transformer 100**
Franke, Martin; Palm, Sebastian; Schegner, Peter
- 18 A Linearized AC-OPF Framework for Re-dispatch Optimization 106**
Wilhelm, Katja; Alaya, Oussama; Müller, Benjamin; Lens, Hendrik

Microgrid Applications

Chair: Dr. Teng Jiang (TU Ilmenau)

- 19 Non-Cooperative, Payoff-Based Game in Application to an Energy-Management-Problem between Microgrids 112**
Götzinger, Jonathan; Hott, Ruben; Kuroptev, Kirill; Uetz, Pascal; Zimmermann, Jan

20	Recommendations for the Implementation of DC-DC Converters Based on Wide Band Gap Semiconductors for Off-Grid Photovoltaic Systems	118
	Cano-Tirado, David; Forchheim, Maximilian Hendrik; Korotkiewicz, Kamil; Steinbusch, Philippe; Zdrallek, Markus	
21	A Four-Port Bi-directional DC/DC Converter for DC-Microgrids	124
	Sabir, Russell	

Grid Simulation, Modeling and Control

Chair: Prof. Dr.-Ing. Jutta Hanson

22	Radio Frequency Impedance Analysis of Lithium-Ion Cells for Power-Line Communication.....	130
	Sabir, Reuel; Blömeke, Alexander; Fuengwarodsakul, Nisai; Sauer, Dirk Uwe	
23	Performance Analysis of Reactive Power Control Modes of Distributed Generation in Power Systems	136
	Yang, Chenxing; Liu, Zheng	
24	Development of a Non-Residential Building Model for an Enhanced Identification and Utilization of Flexibilities in Smart Distribution Grids.....	142
	Forchheim, Maximilian Hendrik; Wazifehdust, Mahjar; Cano-Tirado, David; Korotkiewicz, Kamil; Steinbusch, Philippe; Zdrallek, Markus	
25	An Extra-Low Voltage Inverter-Based Microgrid Test Bench for Teaching and Research....	148
	Hammer, Bernhard; Ziegelmayer, Nikolas; Hergt, Martin; Konigorski, Ulrich	
26	Concepts of Assistant Systems in Distribution Grids	154
	Kircheis, Jan; Brosinsky, Christoph; Song, Xinya; Schlegel, Steffen; Westermann, Dirk	
27	Application of the Digital Twin Concept for a Distribution Network.....	160
	Wagner, Timo; Mehlmann, Gert; Richter, Michael	
28	Impact of the share between medium and low voltage customers on the harmonic levels in medium voltage distribution networks	165
	Linke, Johanna; Möller, Friedemann; Meyer, Jan	
29	Cross-sectoral planning of energy grids in development areas with different heating concepts.....	171
	Riedlinger, Tobias; Wintzek, Patrick; Wierzba, Bernd Bastian; Zdrallek, Markus	
30	Conceptualising Different Approaches to the New Redispatch Procedure in Germany with Special Regard to the Distribution of Competences among the Grid Operators.....	177
	Girvan, Phillip; Stolte, Andreas; Mann, Michael	
31	Measurement of energy supply quality in German distribution grids based on a weighted system performance indicator (SPI)	183
	Tönges, Eric; Haack, Jonas; Braun, Martin	

Power System Devices and High-Voltage Applications

Chair: Prof. Dr.-Ing. Jutta Hanson

32	Approaches to the 6-10 kV cable line parameters definition in the context of transient processes' analysis	189
	Kutumov, Yuri D.; Shadrikova, Tatiana Yu.; Shuin, Vladimir A.	
33	Investigation on the PD and breakdown behaviour of alternative insulating gas mixtures as a result of typical defects	193
	Kempf, Michael; Wiener, Johannes	
34	Transformer Saturation Methods and Transformer Response to Low Frequency Currents... 199	
	Prohammer, Andreas; Rüschtz, Matthias; Albert, Dennis; Renner, Herwig	
35	Comparison of Electromagnetic Transient Models for Modular Multilevel Converters in High-Voltage Direct Current Applications..... 205	
	Tran, Kien-Nghiep; Richter, Michael	
36	Validation of a Scenario Computation Tool for Lithium Ion Battery Pack Simulations	211
	Pick, Andreas; Bihn, Stephan; Fuengwarodsakul, Nisai; Sauer, Dirk Uwe	
37	Modeling for Cross-Domain Electromobility Simulations	217
	Yavuzer, Aytug; Gümrükcü, Erdem; Zehir, Mustafa Alparslan; Monti, Antonello	
38	The use of partial discharge models in the diagnosis of high-voltage equipment..... 223	
	Kinsht, Nikolay; Petrunko, Natalya; Tetiora, Sergey; Silin, Nikolay	
39	Detailed soil investigations to establish a soil reference model and analysis of the influence on the prospective touch voltage by simplifications of the reference model..... 229	
	Jauk, Benjamin; Friedl, Katrin	
40	Storage of excess electrical energy generated by photovoltaics in form of compressed air in a production chain considering energy efficiency	235
