

Content

Review Talks I

Chairs: Helmut F. Schlaak (Technical University of Darmstadt, Germany), Kenji Uchino (The Pennsylvania State University, USA)

RT.I.1 Advances in Magnetorheological Actuators	17
Janusz Gołdasz (BWI Group, Technical Center Krakow, Poland); Seung-Bok Choi (INHA University, South Korea)	

Review Talks II

Chairs: Emmanouel Pagounis (ETO MAGNETIC GmbH, Germany), Stefan Seelecke (Saarland University, Saarbrücken, Germany)

RT.II.1 High-Power Piezoelectric Characterization System (HiPoCS)	18
Kenji Uchino (The Pennsylvania State University, USA)	

Review Talks III

Chairs: Jürgen Maas (Technical University of Berlin, Germany), Emmanuel Benjamin Vander Poorten (KU Leuven, Belgium)

RT.III.1 Energy-efficient Actuation Concepts for SMAs	22
Paul Motzki (Center for Mechatronics and Automation Technologies (ZeMA gGmbH) & Saarland University, Germany)	
RT.III.2 Electromagnetic Actuators	24
Tom Ströhla, Martin Dahlmann, Thomas Sattel (Ilmenau University of Technology, Germany)	

A1: Piezoelectric Actuators (1)

Chairs: Kenji Uchino (The Pennsylvania State University, USA), Ulrike Wallrabe (University of Freiburg, Germany)

A1.1 Piezoelectric Active Spherical Shell Reflector for Space	30
Kainan Wang (Université Libre de Bruxelles, Belgium); David Alaluf (European Space Agency – ESA/ESTEC, The Netherlands); Thomas Godfroid, Damien Robert (Materia Nova, Belgium); Gonçalo Rodrigues (European Space Agency, The Netherlands); André Preumont (Université libre de Bruxelles, Belgium)	
A1.2 Uniaxial Stress and Temperature Resilience of HPZ Piezoelectric Actuators	34
Tim Comyn, Peter Cowing (Ionix Advanced Technologies, United Kingdom); Andrew Bell (University of Leeds, Germany)	
A1.3 High Power Synthetic Jet Actuator	38
Gerald Aigouy, Etienne Betsch, Frank Claeysen, Gladys Jaussaud (CEDRAT Technologies S.A., Meylan, France); Julien Dandois, Emmanuel Eglinger, Quentin Gallas, Pierre More, Frederic Ternoy (ONERA, Lille, France)	

A2: Piezoelectric Actuators (2)

Chair: Waldemar Spomer (Physik Instrumente (PI) GmbH & Co. KG, Germany)

- A2.1 Extremum seeking control of preload-controllable ultrasonic motor 42**
Abdullah M. Mustafa, Takeshi Morita (The University of Tokyo, Japan)
- A2.2 Generating Homogeneous Gas Mixtures by Using Acoustic Waves 46**
Sandro Krempel, Nico Seidel, Sabrina Tietze, Klaus Drese (Coburg University of Applied Sciences and Arts, Germany)
- A2.3 Controller design for the Vector Control of Piezoelectric transducers 50**
Anis Kaci (University of Lille, France); Frédéric Giraud (University of Lille & L2EP / IRCICA, France); Christophe Giraud-Audine (Ensam, France); Michel Amberg, Betty Semail (University of Lille, France)
- A2.4 MSPA motors for rotary motions 54**
Jonathan Stentz, Alexandre Pagès, Adrien Guignabert, Jolan Gauthier, Aurore Loubet (Cedrat Technologies, France); Frank Claeysen (CEDRAT Technologies S.A., France)

A3: Piezoelectric Actuators (3)

Chairs: Hassan Hariri (Rafik Hariri University, Lebanon), Patrick Pertsch (PI Ceramic GmbH, Germany)

- A3.1 Gimbal mechanism design based on piezoelectric motors 58**
Cayetano Rivera, Alvaro Pascual, Javier Inés, Marcelo Collado (Arquimea Ingeniería, Spain)
- A3.2 Dual Source Dual Frequency Drive and Modeling of Resonance type Piezoelectric Motors 62**
Burhanettin Koc, Lennart Von Deyn, Bülent Delibas (Physik Instrumente (PI) GmbH & Co. KG, Karlsruhe, Germany)
- A3.3 Ship Propulsion by Means of Acoustic Radiation 66**
Alexander Backer, Sandro Krempel, Frank Ritter, Sabrina Tietze, Klaus Drese (Coburg University of Applied Sciences and Arts, Germany)
- A3.4 High Frequency Oscillation Control Technique for Piezoelectric Damping System 70**
Shunji Suzuki (Honda R&D Co., Ltd., Japan); Toshizumi Yamaguchi (Honda Motor Co., Ltd., Japan)
- A3.5 Phase difference torque control of USM for walking assist system 74**
Tatsuki Sasamura, Takamitsu Kaneko, Abdullah M. Mustafa, Yuichiro Orino, Satori Hachisuka, Takeshi Morita (The University of Tokyo, Japan)
- A3.6 Core-shell droplet generation device using a flexural vibration by a bolt-clamped Langevin type ultrasonic transducer 78**
Kentaro Omori, Nozomu Fujimoto, Takefumi Kanda, Shuichi Wakimoto, Norihisa Seno (Okayama University, Japan)

A4: Piezoelectric Actuators (4)

Chair: Waldemar Spomer (Physik Instrumente (PI) GmbH & Co. KG, Germany)

- A4.1 Efficient Simulation Model of a Circular Piezoelectric Actuator with TDNNS Elements in Netgen/NGSolve 82**
 Alexander Reininger, Lukas Grasböck, Daniel Reischl (Linz Center of Mechatronics GmbH, Austria); Martin Meindlhumer, Astrid Pechstein (Johannes Kepler University, Austria); Thomas Lechleitner (MED-EL Elektromedizinische Geräte GmbH, Austria)
- A4.2 Flat Small Size Piezoelectric Actuator Operating in Several Modes 85**
 Dalius Mazeika, Andrius Ceponis (Vilnius Gediminas Technical University, Lithuania); Piotr Vasiljev (Vytautas Magnus University, Lithuania); Sergejus Borodinas (Vilnius Gediminas Technical University, Lithuania); Regimantas Bareikis (Vytautas Magnus University, Lithuania); Vytautas Jūrėnas, Vytautas Ostasevicius (Kaunas University of Technology, Lithuania); Genadijus Kulvietis (Vilnius Gediminas Technical University, Lithuania)
- A4.3 Hemispherical resonators made of soft and hard piezo material for planar ultrasonic motors 89**
 Frank Schiele, Bernd Gundelsweiler (University of Stuttgart, Germany)
- A4.4 A vibro-impact approach to PLine® ultrasonic motors 93**
 Simon Kapelke (Physik Instrumente (PI) GmbH & Co. KG, Germany)
- A4.5 Optical evaluation of the large signal behaviour of piezoelectric disc actuators to increase the precision of micro diaphragm pumps 97**
 Agnes Bußmann, Philipp Korzer, Christian Wald (Fraunhofer EMFT, Germany)
- A4.6 Energy Harvesting System by Piezoelectric Power Generation using Mechanical-acoustic Coupling 101**
 Hirotarou Tsuchiya, M. Tsuchiya, Tomomi Adachi, Hiroyuki Moriyama, Helmut Takahiro Uchida, S. Iwamori (Tokai University, Japan)

A5: Medical Devices (1)

Chairs: Bert Müller (University of Basel, Switzerland), Peter P. Pott (University of Stuttgart, Germany)

- A5.1 Concentric muscles – Miniature Pneumatic Actuation with Integrated Channel for Surgical Instruments 105**
 Julie Legrand, Mouloud Ourak, Emmanuel Benjamin Vander Poorten (KU Leuven, Belgium)
- A5.2 Posture Control of Hand Using Multi-balloon Actuator 109**
 Ken'ichi Koyanagi, Tomoaki Murabayashi, Toru Oshima (Toyama Prefectural University, Japan); Kenji Kagechika (Toyama Prefectural Rehabilitation Hospital & Support Center for Children with Disabilities); Takumi Tamamoto (Toyama Prefectural University, Japan)
- A5.3 Robust Silicon Micropump of Chip Size 5×5×0.6 mm³ with 4 ml/min Air and 0.5 ml/min Water Flow Rate for Medical and Consumer Applications 113**
 Henry Leistner, Martin Wackerle, Yücel Congar, Daniel Anheuer, Siegfried Röhl, Martin Richter (Fraunhofer EMFT, Germany)
- A5.4 Titanium Micro Diaphragm Pump for Implantable Medical Applications 117**
 Claudia Patricia Durasiewicz, Agnes Bußmann, Sebastian Kibler (Fraunhofer EMFT, Germany)

A5.5	Investigation of Flexural Mechanical Amplifier for the Development of Miniaturized and Large Force Piezoelectric Actuator for Medical Implant Applications	120
	Hussam Kloub (Furtwangen University, Germany)	
A5.6	Comparison of smart artificial muscles with different functional fibers	124
	Shuichi Wakimoto, Sota Kogawa, Hiroaki Matsuda, Kazuya Nagaoka, Takefumi Kanda (Okayama University, Japan)	

A6: Medical Devices (2) / Haptic Devices

Chairs: Jérôme Perret (Haption GmbH, Germany), Emmanuel Benjamin Vander Poorten (KU Leuven, Belgium)

A6.1	Rendering Large-Area Deformable Tissue Haptics through Robotic Encountering Technology	127
	Sergio Portoles-Diez, Emmanuel Benjamin Vander Poorten, Dominiek Reynaerts (KU Leuven, Belgium); Yasuyoshi Yokokohji (Kobe University, Japan)	
A6.2	Electromagnetic tuneable haptic feedback for HMI devices	129
	Javier Ríos Quesada, Shinara Utegenova (Moving Magnet Technologies S.A., France)	
A6.3	Twisted String Actuation for an Active Modular Hand Orthosis	133
	Pia Mühlbauer, Mario Schimbera, Kent W. Stewart, Peter P. Pott (University of Stuttgart, Germany)	
A6.4	Energy Harvesting in and on the Human Body	137
	Ailinn Scheidl, Peter P. Pott (University of Stuttgart, Germany)	
A6.5	Monolithic joints and linkages for low-cost microscopy	141
	Christian Tichopad, Peter P. Pott (University of Stuttgart, Germany)	

B1: Shape Memory Actuators (1)

Chair: Emmanouel Pagounis (ETO MAGNETIC GmbH, Germany)

B1.1	SMA thick wires for fast actuation	145
	Marco Citro, Salvatore Coco (SAES Group, Italy)	
B1.2	Alternating Current Activation of SMA Wires	149
	Tom Gorges (Center for Mechatronics and Automation Technologies (ZeMA gGmbH), Germany); Stefan Seelecke, Paul Motzki (Center for Mechatronics and Automation Technologies (ZeMA gGmbH) & Saarland University, Germany)	
B1.3	Self-locking SMA Actuator for Optical Zoom in Smartphones	152
	Michael Honold (University of Applied Sciences Aalen, Germany); Neven Bobic, Markus Koepfer (Actuator Solutions GmbH, Germany); Arif Kazi (Aalen University of Applied Sciences, Germany)	
B1.4	SMA actuators made from continuously rolled sheets	156
	Charles C. Castillo, Stefan Knoll (G. Rau GmbH & Co. KG, Germany)	
B1.5	SMA Microsprings for high stroke in tight geometries	159
	Luca Fumagalli, Matteo Zanella (SAES Getters SpA, Italy); Marco Citro (Saes Getters, Italy)	

B2: Shape Memory Actuators (2)

Chair: Giorgio Vergani (SAES Getters S.p.A., Italy)

- B2.1 Bending actuators based on SMA wires – designed for easy integration 160**
 Moritz Hübler, Nicolà Hammann, Nils Neblung (CompActive GmbH, Germany);
 Max Kaiser (Institut für Verbundwerkstoffe, Germany)
- B2.2 Evolution of a resettable Hold-Down and Release Actuator Based on SMA Technology.... 163**
 Marcelo Collado, Cayetano Rivera, Javier Inés (Arquimea Ingeniería, Spain)
- B2.3 Design of complex NiTi dampers trough subtractive and additive production processes:
 three case studies 167**
 Adelaide Nespoli, Enrico Bassani (Consiglio Nazionale delle Ricerche, Italy); Antonio Grande,
 Paolo Bettini (Politecnico di Milano, Italy); Elena Villa, Francesca Passaretti (Consiglio
 Nazionale delle Ricerche, Italy)
- B2.4 Numerical and experimental analysis of the discrete workspace of a prestressed planar
 mechanism driven by six SMA wires 171**
 Rym Boufayed, Xavier Balandraud, Frédéric Chapelle, Jean-François Destrebecq (Université
 Clermont Auvergne, CNRS, SIGMA Clermont, Institut Pascal, France)
- B2.5 Multistable proportional valve: An energy efficient approach for high temperature
 passive magnetic shape memory applications 175**
 Julius Happel, Emmanouel Pagounis, René Schnetzler, Jonas Heider, Markus Laufenberg
 (ETO MAGNETIC GmbH, Germany)
- B2.6 Effects of abnormal grain growth on shape memory characteristics of Cu-Al-Mn alloys ... 178**
 Benjamin Schelnberger, Robin Roj, Ralf Theiß, Peter Dültgen (Forschungsgemeinschaft
 Werkzeuge und Werkstoffe, Germany)

B3: Shape Memory Actuators (3)

Chair: Stefan Seelecke (Saarland University, Saarbrücken, Germany)

- B3.1 Development of a Bistable SMA Actuated Industrial Gripper Based on a Compliant
 Design 181**
 Dominik Scholtes (Center for Mechatronics and Automation Technologies (ZeMA gGmbH),
 Germany); Stefan Seelecke, Paul Motzki (Center for Mechatronics and Automation Technologies
 (ZeMA gGmbH) & Saarland University, Germany)
- B3.2 Surface Shape Control using a Shape Memory Actuator 185**
 Ali Berhil, Yves Bernard, Laurent Daniel (University Paris Saclay, CentraleSupélec & Sorbonne
 Université, CNRS, France)
- B3.3 Development of an SMA based End-effector Prototype for Material Handling in
 Manufacturing Processes 189**
 Lukas Zimmer (Center for Mechatronics and Automation Technologies (ZeMA gGmbH),
 Germany); Felix Welsch, Susanne-Marie Kirsch, Gianluca Rizzello, Stefan Seelecke (Saarland
 University, Germany); Paul Motzki (Center for Mechatronics and Automation Technologies
 (ZeMA gGmbH) & Saarland University, Germany)
- B3.4 Model-Based, Self-Sensing Actuator System based on antagonistic SMA Wires 192**
 Johannes Pechtl (Saarland University, Germany); Stefan Seelecke, Paul Motzki (Center for
 Mechatronics and Automation Technologies (ZeMA gGmbH) & Saarland University, Germany);
 Gianluca Rizzello (Saarland University, Germany)

B4: Shape Memory Actuators (4) / MSM

Chair: Emmanouel Pagounis (ETO MAGNETIC GmbH, Germany)

B4.1	Hybrid dynamical model for elastocaloric heating and cooling device based on Shape Memory Alloy wires	196
	Michele A. Mandolino, Felix Welsch, Susanne-Marie Kirsch, Nicolas Michaelis, Andreas Schütze (Saarland University, Germany); Stefan Seelecke, Paul Motzki (Saarland University & Center for Mechatronics and Automation Technologies (ZeMA gGmbH), Germany); Gianluca Rizzello (Saarland University, Germany)	
B4.2	Active Vibration Damping and Control using Shape Memory Alloy (SMA) Foil-based Devices	200
	Kiran Jacob, Vincent Sessner (Karlsruhe Institute of Technology (KIT), Germany); Shuichi Miyazaki (University of Tsukuba, Japan); Manfred Kohl (Karlsruher Institut für Technologie (KIT), Germany)	
B4.3	Modelling the Stress-dependent Hysteresis of Shape Memory Alloys	204
	Arif Kazi, Philip Frenzel (Aalen University of Applied Sciences, Germany); Neven Bobic (Actuator Solutions GmbH, Germany)	
B4.4	Fully coupled multiphysics simulation model of magnetic shape memory actuators	208
	Robert Courant, Jürgen Maas (Technical University of Berlin, Germany)	
B4.5	New Separation Processes for Fabrication of Magnetic Shape Memory Actuator Elements	212
	Andrea Böhm, Gunnar Meichsner, Jörg Schneider, Welf-Guntram Drossel (Fraunhofer IWU, Germany)	

B5: Magnetic Shape Memory Actuators

Chairs: Andrea Böhm (Fraunhofer IWU, Germany), Stefan Seelecke (Saarland University, Saarbrücken, Germany)

B5.1	A Combined Magneto-Mechanical Characterization Procedure for Magnetic Shape Memory Alloys	214
	Fabian Ehle, Peter Neumeister; Eric Haufe, Holger Neubert (Fraunhofer IKTS, Germany)	
B5.2	Experimental Investigation of an MSM controlled Reluctance Actuator	218
	Marco Hutter (University of Stuttgart, Germany); Arif Kazi (Aalen University of Applied Sciences, Germany); Bernd Gundelsweiler (University of Stuttgart, Germany)	

B6: Emerging Actuator Principles

Chair: Joost Lötters (Bronkhorst High-Tech B.V., The Netherlands)

B6.1	High force density actuators with inherent safety	222
	Wolfgang Zoels, Georg Bachmaier, Christopher McClanahan (MetisMotion GmbH, Germany)	
B6.2	Fully Parametrized Electromechanical Design Method and Toolchain for an Automotive Axial-Flux Synchronous Machine	225
	Tim Ließke, Folke Schwinning, Thorsten A. Kern (Hamburg University of Technology, Germany)	

B6.3	Effects of hydrogen treatment and substrate hardness on the negative magnetostrictive thin films and their coatings	229
	Ren Tokiwa, Shuntar Nakahiro, Seo Ono, Masato Kamiya, Ryota Gemma, Yoshihito Matsumura, Helmut Takahiro Uchida (Tokai University, Japan)	
B6.4	Stepwise Electrostatic Actuator System for THz Reflect Arrays	233
	Lisa Schmitt, Philip Schmitt, Jan Barowski, Martin Hoffmann (Ruhr University Bochum, Germany)	
B6.5	Bending of molecular crystals as mechanical response on the light excitation	237
	Michael Pavlovich Bubnov (G. A. Razuvaev Institute of Organometallic Chemistry of RAS, Russia)	

C1: Magnetostrictive Devices

Chair: Manfred Kohl (Karlsruher Institut für Technologie (KIT), Germany)

C1.1	Interfacial adhesion evaluation of magnetostrictive thin films applying electrochemical hydrogen loading technique	238
	Seo Ono, Ren Tokiwa, Yoshihito Matsumura, Helmut Takahiro Uchida (Tokai University, Japan)	
C1.2	Self-sensing Nanometric Magnetoelectric Actuator Based on Metglas/PZT Composites ...	242
	Yikun Yang, Haomin Wu, Bintang Yang (Shanghai Jiao Tong University, China)	
C1.3	Effect of in-situ substrate biases changes and ex-situ hydrogen loading on in-plane stress in Sm-Fe thin films	246
	Masato Kamiya, Kengo Yamaguchi, Ryuichi Kataoka, Ren Tokiwa, Seo Ono, Helmut Takahiro Uchida, R. Gemma, Yoshihito Matsumura (Tokai University, Japan)	
C1.4	Effect of hydrogen solution on the Young's modulus of Nickel	250
	Mutsuki Matsumoto, Ryoya Yamane, Ren Tokiwa, H. Odaka, Tomomi Adachi, A. Kaneko, Toshikio Takimoto, Akira Tonegawa, Hirotarou Tsuchiya, Helmut Takahiro Uchida (Tokai University, Japan)	

C2: Advanced Microactuators

Chair: Ulrike Wallrabe (Albert-Ludwigs-University Freiburg, Germany)

C2.1	Low powered Uni-directional actuator for wireless active enteroscopy	253
	Hamza Khan, Alfred Cuschieri (University of Dundee, United Kingdom)	
C2.2	Effect of hydrogen solution on the Young's modulus of rolled tungsten	257
	Ryoya Yamane, Ren Tokiwa, Arata Kaneko, Toshikio Takimoto, Tomomi Adachi, Hirotarou Tsuchiya, Akira Tonegawa, Helmut Takahiro Uchida (Tokai University, Japan)	
C2.3	Piezoelectric Motor Operated Both in Resonance and DC Modes	261
	Maxim Wischnewski, Buelent Delibas, Alexej Wischnewski (Physik Instrumente (PI) GmbH & Co. KG, Germany)	
C2.4	Miniaturized electric linear drive with permanent magnetic weight compensation	265
	Bela Schulte Westhoff, Abd Elkarim Masoud, Jürgen Maas (Technical University of Berlin, Germany)	

C2.5	Enhanced Low Harmonic Waveform for Low-bandwidth Inertia-drive Actuator	269
	Junyang Wei, Sergej Fatikow (Oldenburg University, Germany)	

C3: Actuator Control and Electronics

Chairs: Jürgen Maas (Technical University of Berlin, Germany), Takeshi Morita (The University of Tokyo, Japan)

C3.1	A Compact Control Unit for a Pneumatic Soft Colonoscope	273
	Luigi Manfredi (University of Dundee, United Kingdom)	
C3.2	Individually Tunable Array of Micro Fresnel Mirrors	277
	Binal Poyyathuruthy Bruno, Robert Schütze, Ulrike Wallrabe (University of Freiburg, Germany)	
C3.3	Low-scale HV Amplifier for driving thin-film DE Transducers	281
	Samuel Junglas, Jürgen Maas (Technical University of Berlin, Germany)	
C3.4	Flatness-based Control for Dielectric Elastomer Transducers	285
	Abd Elkarim Masoud, Andreas Hubracht, Samuel Junglas Jürgen Maas (Technical University of Berlin, Germany)	
C3.5	Training and Modelling the Non-Linear Behavior of an MR Brake by Using RNN and LSTM	290
	Mehmet Görkem Karabulut, Sefa Furkan Küçükoğlu, Mehmet İsmet Can Dede (Izmir Institute of Technology, Turkey)	

C4: Electromagnetic Actuators

Chairs: Roland Keller (Dr. Fritz Faulhaber GmbH & Co. KG, Germany), Wolfgang Amrhein (ACCM GmbH, Austria)

C4.1	Magnetic Levitation Positioning Stages for Molecular Cleanliness	294
	Rainer Gloess (Physik Instrumente (PI) GmbH & Co. KG, Germany)	
C4.2	Zero Boil Off Compressor based on MICA Actuators	298
	Gerald Aigouy, Steven Rowe, Patrick Meneroud, Frank Claeysen (CEDRAT Technologies, S.A. France); Nicolas Pouvesle, Bernhard Strauss (ET Energie Technologie, Germany); Celen Nil, Armin Isselhorst (Ariane Group, Germany); Moritz Branco, Jan Persson (ESA, The Netherlands)	
C4.3	Permanent magnet linear actuator: causal and non-linear modelling	302
	Kévin Lauzier (Air Liquide Advanced Technologies & University of Lyon, France); Federico Bribiesca-Argomodo, Jean-Yves Gauthier, Sylvie Sesmat, Xuefang Lin-Shi (University of Lyon, INSA Lyon & CNRS, Ampère Laboratory, France); Diogo Carvalho Lopes (Air Liquide Advanced Technologies, France)	
C4.4	Precise Position Control of Linear Motors using Stator Magnets as the Measurement Scale	306
	Rolf Slatter (Sensitec GmbH, Germany)	
C4.5	Large stroke Rotary Voice Coil Motor for cryogenic application	310
	Nabil Bencheikh, Gerald Aigouy, F. Claeysen (Cedrat Technologies, France)	

C5: Polymer-based Actuators

Chairs: Peter Krippner (Bürkert Werke GmbH & Co. KG, Germany), Aaron Price (Western University, Canada)

- C5.1 Actuation with Magnetoactive Polymers 314**
Holger Böse, Thomas Gerlach, Johannes Ehrlich (Fraunhofer ISC, Germany)
- C5.2 Self-Sensing Electroadhesive Polymer Gripper with Magnetically Controllable Surface Geometry 318**
Dirk Sindensberger, Nina Prem, Gareth Monkman (OTH Regensburg, Germany); Klaus Zimmermann (TU Ilmenau, Germany)
- C5.3 Electromechanical characterization and laser structuring of Ni-based sputtered metallic compliant electrodes for DE applications 321**
Jonas Hubertus (University of Applied Sciences of Saarland, Germany); Sipontina Croce, Julian Neu, Gianluca Rizzello, Stefan Seelecke, (Saarland University, Saarbrücken, Germany); Günter Schultes (University of Applied Science of Saarland, Germany)
- C5.4 Modelling and characterization of a Soft Inverse Pneumatic Artificial Muscle 325**
Lucrezia Lorenzon, Debora Zrinscak, Martina Maselli, Matteo Cianchetti (Scuola Superiore Sant'Anna, Italy)

C6: Special Solutions

Chair: Emmanuel Benjamin Vander Poorten (KU Leuven, Belgium)

- C6.1 Study of Gyro Monorail Production 329**
S. Amatani, Hirotarou Tsuchiya, A. Okuyama, Helmut Takahiro Uchida (Tokai University, Japan)
- C6.2 Automatic solver selection and solution for CPU based automotive HIL simulations with small step size requirements 333**
Dennis Kähler, Julius Harms, Thorsten A. Kern (Hamburg University of Technology, Germany)
- C6.3 Effect of Actuation Signal Variation on Single Stroke Volume in Metal Micro Diaphragm Pumps 337**
Thomas Thalhofer (Fraunhofer EMFT, Germany & Technical University of Munich, Germany); Agnes Bussmann (Fraunhofer EMFT, Germany); Claudia Patricia Durasiewicz (Fraunhofer EMFT, Germany); Oliver Hayden (Technical University of Munich, Germany)
- C6.4 Adaptive Beams with Integrated Thermal Actuator 341**
Timon Burghardt, Christian Kelleter, Matthias Bosch, Matthias Bachmann, Hansgeorg Binz, Lucio Blandini, Werner Sobek (University of Stuttgart, Germany)
- C6.5 Polymorphism of “bending” crystals of the dicarbonyl-o-semiquinonato rhodium complex 344**
Vladimir Cherkasov (G. A. Razuvaev Institute of Organometallic Chemistry of RAS, Russia)

D1: Dielectric Elastomer Actuators

Chair: Peter P. Pott (University of Stuttgart, Germany)

- D1.1 Industrializing silicone stack transducers for vehicles of the future 345**
Daniel Haefliger (SATECO XT AG, Switzerland)

D1.2	Concept and Fabrication of Silicone-based Rolled Dielectric Elastomer Actuators (RDEAs) for Soft Robots	349
	Julian Kunze, Johannes Prechtel, Daniel Bruch (Saarland University, Germany); Sophie Nalbach (Center for Mechatronics and Automation Technologies (ZeMA gGmbH), Germany); Paul Motzki, Stefan Seelecke (Saarland University, Germany & Center for Mechatronics and Automation Technologies (ZeMA gGmbH), Germany); Gianluca Rizzello (Saarland University, Germany)	
D1.3	Optimization of Electro-Zipping Actuators Using Dielectric Elastomers as Insulating Layer	353
	Michael J. Gareis, Jürgen Maas (Technical University of Berlin, Germany)	
D1.4	Influence of electrode design on actuation characteristics of cooperative DEAP actuators	357
	Rui Zhu (Furtwangen University, Germany & University of Freiburg, Germany); Ulrike Wallrabe, Peter Woias, Matthias C. Wapler (University of Freiburg, Germany); Ulrich M. Mescheder (Furtwangen University, Germany)	
D1.5	Soft Robotic Module Actuated by Silicone-Based Rolled Dielectric Elastomer Actuators – Modeling and Simulation	361
	Johannes Prechtel (Saarland University, Germany); Julian Kunze (Saarland University & Center for Mechatronics and Automation Technologies (ZeMA gGmbH), Germany); Stefan Seelecke (Saarland University, Saarbrücken, Germany); Gianluca Rizzello (Saarland University, Germany)	

D3: ER/MR Fluids

Chairs: Janusz Gołdasz (BWI Group, Technical Center Krakow, Poland), Thomas Sattel (Ilmenau University of Technology, Germany)

D3.1	Design and experimental evaluation of energy-efficient MRF-coupling elements with multiple shear gaps for enhancement of torque capacity	365
	Christian Hegger, Jürgen Maas (Technical University of Berlin, Germany)	
D3.2	Landing Efficiency of Aircraft Landing Gear System with MR Dampers	369
	Byung-Hyuk Kang, Seung-Bok Choi (INHA University, South Korea)	
D3.3	Magnetorheological Yaw Damper with Short Response Time for Railway Vehicle Bogie	373
	Michal Kubík, Zbyněk Strecker, Filip Jeniš (Brno University of Technology, Czech Republic); Ondřej Macháček, Matěj Přikryl (Strojírna Oslavany, Czech Republic); Petr Špalek (Škoda Transportation, Czech Republic)	
D3.4	A New Configuration of MR Damper with Pole Shape Function: Design and Analysis	377
	Bo-Gyu Kim, Seung-Bok Choi (INHA University, South Korea)	
D3.5	Impact of Material Properties on the Dynamics of MR Dampers	381
	Paweł Trębacz (Cracow University of Technology, Poland); Janusz Gołdasz (Cracow University of Technology, Poland & BWI Group, Poland); Bogdan Sapiński (AGH University of Science and Technology, Poland)	
D3.6	Parallel Field Segmentation Concept in ER/MR Dampers for a simpler Control System ..	385
	Aditya Suryadi Tan, Thomas Sattel, Oliver Radler (Ilmenau University of Technology, Germany)	

D4: Aerospace

Chair: Frank Claeysen (CEDRAT Technologies S.A., France)

- D4.1 FPSA & BSMA: Nanometric positioning actuators for ground and space applications 389**
François Barillot, Jocelyn Rebufa, Jonathan Stentz, Adrien Guignabert, Kevin Benoit, Gerald Aigouy, Frank Claeysen (CEDRAT Technologies S.A., France)
- D4.2 Magnetically actuated Fast Steering Mirrors 393**
Frank Claeysen, Gérald Aigouy, Xavier De Lepine, Clément Cote, Jocelyn Rebufa, Marc Fournier, Sylvain Duc, Olivier Sosnicki, Etienne Betsch, Adrien Guignabert, Pierre Personnat (CEDRAT Technologies S.A., France)
- D4.3 Modeling and Experiments of Additively-Manufactured Fluid Actuated Morphing Unit Structures 397**
Srinivas Vasista (German Aerospace Center DLR, Germany); Kathrin Büchner (German Aerospace Center DLR, Germany & WACKER Chemie AG, Germany); Maik Titze, Johannes Riemenschneider, Hans Peter Monner (German Aerospace Center DLR, Germany); Vera Seitz (WACKER Chemie AG, Germany)
- D4.4 Slipring rotor made by Additive Manufacturing: redesign, manufacturing and validation testing for space applications 403**
Lionel Kiener, Hervé Saudan, David Novo, Sebastien Lani, Gaëtan Bernard (CSEM, Switzerland); Mickaël Miler, Damien Bilbeau (RUAG Slip Rings SA, Switzerland)
- D4.5 Measurement by vibrating reed method of Young's modules of Carbon fiber reinforced plastics 407**
Eiichi Miura, Keisuke Takeda, Tomomi Adachi, Hideki Kimura, Yoshitake Nishi, Helmut Takahiro Uchida (Tokai University, Japan)

D5: Applications

Chair: Thomas Sattel (Ilmenau University of Technology, Germany)

- D5.1 The Influence of Boundary Condition and Collision Position on the Elastic Collision of Bar and Beam 409**
Hirotarou Tsuchiya, Helmut Takahiro Uchida, Ryoya Yamane, T. Narabayashi (Tokai University, Japan)
- D5.2 Road Noise Reduction inside car cabin using Active Structural Acoustic Control (ASAC) 413**
Hassan Hariri (Rafik Hariri University, Lebanon); Luc Frechette, Patrice Masson (Université de Sherbrooke, Canada)
- D5.3 Evaluation of low-cost inertial measurement units for application in high-volume autonomous vehicles 417**
Christoph Kolhoff, Markus Kemper, Manuel Olze (University of Applied Science Diepholz, Germany)
- D5.4 Compact 3D-printed z-positioning unit for high-throughput microscopy 421**
Sophie Weiland, Max B. Schäfer, Kent W. Stewart, Peter P. Pott (University of Stuttgart, Germany)
- D5.5 IRESA – Intelligent Redundant Spacecraft Actuator, Generation II 425**
Robin Roj, Ralf Theiß and Peter Dültgen (Forschungsgemeinschaft Werkzeuge und Werkstoffe, Germany); Florian Schummer (Technical University of Munich, Germany)

D6: DFG Priority Program KOMMMA

Chair: Manfred Kohl (Karlsruher Institut für Technologie (KIT), Germany)

D6.1	A Consistent View on Cooperative Multistage Electrostatic Actuation	431
	Peter Conrad, Martin Hoffmann (Ruhr University Bochum, Germany)	
D6.2	Bistable Actuators Based on Shape Memory Alloy/ Polymer Composites	435
	Sabrina Curtis (Kiel University, Germany & University of Maryland, USA), Duygu Dengiz, Prasanth Velvaluri, Lars Bumke, Justin Jetter, Eckhard Quandt (Kiel University, Germany)	
D6.3	Development of Co-Integrated Shape Memory Actuators for Silicon Micro- and Nanomechanics	436
	Zixiong Li, Gowtham Arivanandhan, Sanaz Rastjoo, Randy Fechner, Manfred Kohl (Karlsruhe Institute of Technology (KIT), Germany); Lars Bumke, Eckhard Quandt (Kiel University, Germany)	
D6.4	Design Concepts of Multistage Multistable Cooperative Electrostatic Actuation System with Scalable Stroke and Large Force Capability	438
	Hussam Kloub (Furtwangen University, Germany)	
D6.5	Design and characterization of polymeric domes as biasing elements for dielectric elastomer membrane actuators	442
	Julian Neu, Sipontina Croce (Saarland University, Germany); Jonas Hubertus (University of Applied Sciences of Saarland, Germany); Gianluca Rizzello (Saarland University, Germany); Günter Schultes (University of Applied Sciences of Saarland, Germany); Stefan Seelecke (Saarland University, Germany & Center for Mechatronics and Automation Technologies (ZeMA gGmbH), Germany)	
D6.6	Modeling and simulation of compliant biasing systems for dielectric elastomer membranes based on polymeric domes	446
	Sipontina Croce, Julian Neu (Saarland University, Germany); Jonas Hubertus (University of Applied Sciences of Saarland, Germany); Gianluca Rizzello (Saarland University, Germany); Stefan Seelecke (Saarland University, Germany & ZeMA gGmbH, Germany); Günter Schultes (University of Applied Sciences of Saarland, Germany)	
D6.7	Simulation of Static Pull-in Instability of Hybrid Levitation Micro-actuators	450
	Kirill Poletkin (Karlsruhe Institute of Technology (KIT), Germany)
