

## Table of Contents

### Oral Presentations

#### Session 1: Power Systems Modeling

(Chair: Prof. Antonello Monti)

- |   |           |
|---|-----------|
| <b>1.1 Framework for scenario-based studies in the context of converter-dominated grids .....</b>   | <b>17</b> |
| Daniel Vahle, Volker Staudt, Institute for Power Systems Technology and Power Mechatronics,<br>Ruhr-Universität Bochum  |           |
| <b>1.2 Converter-based Control using Co-Simulation with a Power System Simulation Tool .....</b>  | <b>25</b> |
| Alexander Raab <sup>1</sup> , Christian Scheibe <sup>2</sup> , Anatoli Wellhoefer <sup>2</sup> , Thi Thanh-Thuy Nguyen <sup>1</sup> , Dominik<br>Frauenknecht <sup>1</sup> and Gert Mehlmann <sup>1</sup> |           |
| <sup>1</sup> Friedrich-Alexander University Erlangen-Nuremberg; <sup>2</sup> Siemens AG Smart Infrastructures Digital<br>Grid, Erlangen   |           |
| <b>1.3 Load- and Source-Based Impedance Measuring Methods: Comparing Concepts and<br/>Structural Limitations in a Laboratory Environment .....</b>  | <b>31</b> |
| Johannes Schräder, Patrick Möbius and Detlef Schulz, Helmut Schmidt University, Hamburg,<br>Germany   |           |
| <b>1.4 Modeling and Fault Ride-Through Control of a Photovoltaic-Based Grid Supporting<br/>Microgrid Using a Secondary Control DSC Algorithm .....</b>  | <b>37</b> |
| Elutunji Buraimoh, and Innocent E. Davidson, Durban University of Technology, Durban,<br>South Africa   |           |

#### Session 2: Power Systems and Energy Storage

(Chair: Dr. Hendrik Wust)

- |  |           |
|--|-----------|
| <b>2.1 Sizing BESS for a peak shaving and valley filling control strategy for residential consumers<br/>based on their load-duration curves .....</b>  | <b>47</b> |
| Robbert Claeys, Gianni De Greve, Jos Knockaert and Jan Desmet, EELab/Lemcko, Department<br>of Electromechanical, Systems and Metal Engineering, Ghent University, Kortrijk, Belgium  |           |
| <b>2.2 Potentials and Technical Requirements for the Provision of Ancillary Services in Future<br/>Power Systems with Distributed Energy Resources .....</b>   | <b>53</b> |
| Marc René Lotz <sup>1</sup> , Neelotpal Majumdar <sup>4</sup> , Vanessa Beutel <sup>2</sup> , Jana Gerlach <sup>3</sup> , Carsten Wegkamp <sup>1</sup> ,<br>Melanie Hoffmann <sup>1</sup> , Lily Kahl <sup>1</sup> , Jonas Wussow <sup>1</sup> , Henning Schlachter <sup>2</sup> , Carsten Agert <sup>2</sup> , Michael H.<br>Breitner <sup>3</sup> , Bernd Engel <sup>1</sup> , Stefan Geißendörfer <sup>2</sup> , Lutz Hofmann <sup>3</sup> , Martin Könemund <sup>4</sup> , Michael Kurrat <sup>1</sup> ,<br>Thomas Leveringhaus <sup>3</sup> and Karsten von Maydell <sup>2</sup><br><sup>1</sup> elenia, Technische Universität Braunschweig; <sup>2</sup> German Aerospace Center, Institute of Networked<br>Energy Systems, Oldenburg; <sup>3</sup> Leibniz Universität Hannover; <sup>4</sup> Ostfalia Hochschule für angewandte<br>Wissenschaften, Wolfenbüttel |           |
| <b>2.3 Simulation of a Congestion Management Method for a High Penetration of Electric Vehicles<br/>in the Low Voltage Distribution Grid .....</b>   | <b>61</b> |
| Sahar Darvish, Amra Jahic and Detlef Schulz, Helmut Schmidt University, Hamburg  |           |

<b>2.4 Potential analysis of EV and PHEV in weak low-voltage grids .....</b>	<b>68</b>
Sebastian Helm <sup>1</sup> , Muhammad Tayyab <sup>1</sup> , Ines Hauer <sup>1</sup> , Martin Wolter <sup>1</sup> , Stephan Balischewski <sup>2</sup> and Przemyslaw Komarnicki <sup>2</sup>	
<sup>1</sup> Otto von Guericke University Magdeburg, <sup>2</sup> Fraunhofer Institute for Factory Operation and Automation IFF	

### Session 3: Power Systems Planning and Operation

(Chair: Dr. Anne-Katrin Marten)

<b>3.1 Optimized supervisory control of a combined heat and power plant by mixed-integer nonlinear model predictive control .....</b>	<b>77</b>
Dimitri Bitner, Artyom Burda and Martin Grotjahn, Hannover University of Applied Sciences and Arts, Hannover	
<b>3.2 Electric Truck Energy Demand Modeling and Load Profile Regionalization for Electric Grid Planning .....</b>	<b>84</b>
Kathrin Walz and Krzysztof Rudion, University of Stuttgart, Stuttgart	
<b>3.3 Local Frequency Transients in the Future European Synchronous Transmission Grid .....</b>	<b>90</b>
Mariano Dominguez Librandi <sup>1</sup> , Thomas Würl <sup>1</sup> , Daniel Stenzel <sup>1</sup> , Rolf Witzmann <sup>1</sup> , Souayan Bose <sup>1</sup> , Jörg Michael Schmidt <sup>2</sup> , Vladimir Milic <sup>2</sup> and Ernest Tchagou <sup>2</sup>	
<sup>1</sup> Technical University of Munich, Munich; <sup>2</sup> TenneT TSO GmbH, Bayreuth	
<b>3.4 Interaction of European Network Development and Bidding Zone Re-Configuration: Investigation for European Power System in 2030 .....</b>	<b>97</b>
Maximilian Bornig, Niklas Honnef and Albert Moser, IAEW at RWTH Aachen University, Aachen	

### Session 4: Power System Identification Methods

(Chair: Dr. Hartmut Huang)

<b>4.1 State of Health estimation of Lithium-ion batteries using operational data .....</b>	<b>105</b>
Mustafa S. Calcuttawala <sup>1,2</sup> and Firas Alhaider <sup>1</sup>	
<sup>1</sup> Vattenfall Solar GmbH, Hamburg; <sup>2</sup> HAW Hamburg, Hamburg	
<b>4.2 Comparison of Convexified SQCQP and PSO for the Optimal Transmission System Operation based on Incremental In-Phase and Quadrature Voltage Controlled Transformers .....</b>	<b>113</b>
Marcel Sarstedt, Thomas Leveringhaus, Leonard Kluß and Lutz Hofmann, Leibniz Universität Hannover	
<b>4.3 Reducing the residential PV-BESS size by means of an LVDC backbone: Impact on voltage unbalance and energy efficiency .....</b>	<b>121</b>
Hakim Azaïoud <sup>1</sup> , Rémy Cleenwerck <sup>1</sup> , Jos Knockaert <sup>1</sup> , Lieven Vandervelde <sup>2,3</sup> and Jan Desmet <sup>1</sup>	
<sup>1</sup> Ghent University, Kortrijk, Belgium; <sup>2</sup> Ghent University, Ghent, Belgium; <sup>3</sup> Flanders Make, Ghent, Belgium	
<b>4.4 Determination of the damping and inertia time constant of grid form-ing inverters by laboratory measurements .....</b>	<b>127</b>
Florian Rauscher <sup>1</sup> , Maria Nuschke <sup>2</sup> and Bernd Engel <sup>1</sup>	
<sup>1</sup> Technische Universität Braunschweig; <sup>2</sup> Fraunhofer IEE, Kassel	

## Short Oral Presentations 1

- SOP1.1 Influence of Input Parameters on Artificial Neural Networks for Off-Grid Solar Photovoltaic Power Forecasting ..... 135**  
Aminu Bugaje, Akhilesh Yadav, Kedar Mehta, Felicia Ojinji, Mathias Ehrenwirth, Christoph Trinkl and Wilfried Zörner, Technische Hochschule Ingolstadt
- SOP1.2 Estimating Load Margins in Long-term Voltage Stability Analysis ..... 142**  
Christian Ziegler, Tahaguas Woldu and Martin Wolter, Otto von Guericke University, Magdeburg
- SOP1.3 Invenstigation of Multi Feed In of Active Infeed Converters for Indus-trial DC Micro Grids with Voltage Droop Control ..... 148**  
Jan-Niklas Koch, Raphael Otte and Holger Borcherding, OWL University of Applied Sciences and Arts, Lemgo
- SOP1.4 Device Type Independent Energy Management of Sector-Coupled Residential Energy Systems ..... 154**  
Stefan Arens, Sunke Schlüters, Benedikt Hanke, Karsten von Maydell and Carsten Agert, DLR Institute of Networked Energy Systems
- SOP1.5 An MPC-based energy management system using existing flexibility potentials ..... 161**  
Sebastian Schwarz and Andreas Rehkopf, Technische Universität Bergakademie Freiberg
- SOP1.6 Prospective Fault Currents in MVDC Distribution Grids – An Evaluation Methodology . 166**  
Nils Langenberg, Marvin Bendig, Philipp Wienkamp, Andre Würde and Albert Moser, IAEW at RWTH Aachen University, Aachen
- SOP1.7 Evaluation of W. Quade's time-domain power theory for analysis ap-plications in converter-dominated grids ..... 172**  
Daniel Vahle and Volker Staudt, Ruhr-Universität Bochum
- SOP1.8 LISA4CL – Development and Grid Integration of an Inductive Charging System for City Logistics. .... 180**  
Gian-Luca Di Modica<sup>1</sup>, Wai-Yee Choi<sup>1</sup>, Tim-Hendrik Dietrich<sup>2</sup>, Lukas Ebbert<sup>1</sup>, Ralf Effenberger<sup>3</sup>, Jürgen Meins<sup>2</sup>, Henning Schillingmann<sup>2</sup>, Jonas Wussow<sup>1</sup>, Bernd Engel<sup>1</sup>, Markus Henke<sup>2</sup>  
<sup>1</sup>elenia, Technische Universität Braunschweig; <sup>2</sup>Technische Universität Braunschweig;  
<sup>3</sup>INTIS – Integrated Infrastructure Solutions GmbH, Lathen
- SOP1.9 Sun Sensor Design for Position Detection and Intensity Measurement Using Light Depending Resistors..... 186**  
Patrick Buchenberg and Stephan Baur, Technische Universität München
- SOP1.10 Opportunities and Risks of a Power Quality Market - Viable business models not to be expected ..... 191**  
Benjamin Jacobsen and Jens Teuscher, Chemnitz University of Technology
- SOP1.11 Optimal operation of charging infrastructure and sector coupling technologies to supply residential units ..... 197**  
Janna Wortelker, Maik Heuer and Ines Hauer, Otto-von-Guericke University Magdeburg

<b>SOP1.12 Aggregating Residential Energy Storages and Electric Vehicles Through Peer-To-Peer Local Energy Markets in Low Voltage Distribution Grids .....</b>	<b>203</b>
Tariq Almomani, Stefan Englberger, Andreas Jossen and Rolf Witzmann, Technical University of Munich	
<b>SOP1.13 Filter Design for DC Grids with Distributed Link Capacitors .....</b>	<b>209</b>
Kevin Pilgrim, Patrick Lenzen and Martin Pfost, Technical University of Dortmund	

## Short Oral Presentation 2

<b>SOP2.1 Grid-friendly fallback strategy for prosumer households in case of widespread communication failures .....</b>	<b>217</b>
Edwin Ariel Rebak, Björn Oliver Winter and Bernd Engel, elenia Braunschweig	
<b>SOP2.2 New sizing methodology of energy storage and PV systems for electric vehicle charging stations considering voltage compensation in a low voltage grid .....</b>	<b>224</b>
Muhammad Tayyab <sup>1</sup> , Sebastian Helm <sup>1</sup> , Ines Hauer <sup>1</sup> and Leonardo Nogueira da Silva <sup>2</sup>	
<sup>1</sup> Otto von Guericke University Magdeburg; <sup>2</sup> Federal University of Santa Maria (UFSM), Brazil	
<b>SOP2.3 Investigation of transient stability during the application of curative measures in an AC-HVDC system. ....</b>	<b>230</b>
Franz Linke, Hassan Alhomsi, Tom Sennewald and Dirk Westermann, Technical University of Ilmenau	
<b>SOP2.4 Inclusion of Network Configurations in a Security Constrained Optimal Power Flow as a Mixed-Integer Quadratically Constrained Quadratic Program .....</b>	<b>236</b>
Leonard Kluß, Thomas Leveringhaus, Marcel Sarstedt and Lutz Hofmann, Leibniz University Hannover	
<b>SOP2.5 Analysis and Improvement of LVDC-Grid Stability using Circuit Simulation and Machine Learning – A Case Study.....</b>	<b>242</b>
Georg Roeder <sup>1</sup> , Leopold Ott <sup>1</sup> , André Meier <sup>1</sup> , Bernd Wunder <sup>1</sup> , Peter Wienzek <sup>1</sup> , Andreas Bärmann <sup>2</sup> , Frauke Liers <sup>2</sup> , Martin Schellenberger <sup>1</sup>	
<sup>1</sup> Fraunhofer IISB, Erlangen; <sup>2</sup> Friedrich-Alexander-Universität, Erlangen-Nürnberg	
<b>SOP2.6 Realization of a power distributing electric vehicle charging system.....</b>	<b>249</b>
Marvin Schwienheer, Katrin Schulte, Kersten Kröger and Jens Haubrock, University of Applied Sciences Bielefeld	
<b>SOP2.7 Analysis and simulation of the population driving behaviour and charging processes at different charging station types with electric vehicles .....</b>	<b>254</b>
Maksym Klitsman <sup>1</sup> , Oliver Brückl <sup>2</sup> , Johannes Eller <sup>2</sup>	
<sup>1</sup> Bavarian Centre for Applied Energy Research e.V. (ZAE), Hof; <sup>2</sup> Ostbayerische Technische Hochschule Regensburg	
<b>SOP2.8 Operation of thermal storage power plants under high renewable grid penetration.....</b>	<b>261</b>
Nils Handschuh, Dominik Stollenwerk, Jörg Borchert, Fachhochschule Aachen	
<b>SOP2.9 A Novel Hydrogen Storage Power Plant Structure for High Renewable Energy Penetration .....</b>	<b>266</b>
Nayeemuddin Ahmed and Harald Weber, University of Rostock	

<b>SOP2.10 Smart Grid Residential Load Modeling for Real-time Applications .....</b>	<b>272</b>
Edvard Avdevičius, Felix Heider, Mina Eskander and Detlef Schulz, Helmut Schmidt University, Hamburg	
<b>SOP2.11 Comparison of Best Practices for Evaluation of New Power Line Connections in     Automated Power Systems Planning .....</b>	<b>280</b>
Martin Hofmann <sup>1</sup> , Moritz Franz <sup>1</sup> , Thomas Stetz <sup>1</sup> and Martin Hajdu <sup>2</sup>	
<sup>1</sup> University of Applied Sciences, Gießen; <sup>2</sup> Mittelhessen Netz GmbH, Gießen	
<b>SOP2.12 Techno-economic analysis of reactive power sources.....</b>	<b>286</b>
Rebekka Götz, Johannes Rauch and Oliver Brückl, Ostbayerische Technische Hochschule Regensburg	
<b>List of Authors .....</b>	<b>292</b>
