

# Inhaltsverzeichnis

## Teil 1: Bauelemente

<b>1</b>	<b>Hauptvortrag: Power Devices for energy efficiency and carbon emission reduction .....</b>	<b>7</b>
	Josef Lutz, Thomas Basler (Technische Universität Chemnitz)	
<b>2</b>	<b>A Si IGBT Review and Outlook in Competition to WBG Power Devices.....</b>	<b>15</b>
	Thomas Laska (Infineon Technologies, Neubiberg)	
<b>3</b>	<b>Developments and trends for Silicon Carbide based power devices.....</b>	<b>23</b>
	Aly Mashaly, Dr. Igor Kasko, Dr. Christian Felgemacher (ROHM Semiconductor, Willich)	
<b>4</b>	<b>Modern High Voltage GaN FETs – Power Applications and Impact of Packaging Technology ..</b>	<b>31</b>
	Sebastian Klötzer (Nexperia, Hamburg), Jim Honea (Nexperia, Santa Barbara)	
<b>5</b>	<b>Mission Profile Requirements for Power Electronic Modules and Design Solution .....</b>	<b>39</b>
	Oliver Schilling (Infineon Technologies, Warstein)	
<b>6</b>	<b>Trends in Power Module Packaging and Impact of Wide Bandgap Semiconductors .....</b>	<b>47</b>
	Peter Beckedahl, Matthias Spang (Semikron-Danfoss, Nürnberg) Jacek Rudzki (Semikron-Danfoss, Flensburg)	
<b>7</b>	<b>What Challenges are Near-Ideal Switches to Inductive Components in Power Electronics? .....</b>	<b>55</b>
	Peter Zacharias (Universität Kassel)	
<b>8</b>	<b>Power Capacitors – state of the art technology review and an outlook into the future.....</b>	<b>63</b>
	Thomas Ebel, William Greenbank (Centre for Industrial, University of Southern Denmark, Sønderborg, Denmark)	
<b>9</b>	<b>SiC and GaN – Beyond simple SiC-MOSFETs and GaN-HEMTs .....</b>	<b>71</b>
	Nando Kaminski (Institute for El. Drives, Power Electronics, and Devices, University of Bremen) Oliver Hilt (Ferdinand-Braun-Institut gGmbH, Leibniz-Institut für Höchstfrequenztechnik, Berlin)	
<b>10</b>	<b>Robust Power Module for Higher Power Density.....</b>	<b>83</b>
	Olga Siwak, Freerik Forndran, Dr. Andreas Greif, Dr. Markus Leicht, Petra Mönius, Erik Teuber (Vitesco Technologies, Nürnberg) Matthias Hammerl (Vitesco Technologies, Regensburg)	
<b>11</b>	<b>Lateral GaN Power Devices and Integrated GaN Power Circuits: Status and Recent Progress ..</b>	<b>89</b>
	Michael Basler, Richard Reiner, Stefan Moench, Patrick Waltereit, Fouad Benkhelifa, Michael Mikulla, Rüdiger Quay (Fraunhofer (IAF), Freiburg)	

## Teil 2: Anwendungen

- 12 Hauptvortrag:**  
**Offene Potentiale und Chancen für SiC in der Mittelspannung ..... 97**  
 Dirk Kranzer, Michael Geiss, Andreas Hensel, Jürgen Thoma, David Derix, Corentin Gasser  
 (Fraunhofer ISE Freiburg)
- 13 Entwicklungstendenzen bei Stromrichtern für elektrische Energieübertragungsnetze ..... 106**  
 Herbert Gambach, Max Beuermann, Carsten Bartzsch, Jörg Dorn, Marcus Wahle Rodrigo Alvarez,  
 Martin Pieschel (Siemens, Erlangen)
- 14 Current and future activities in energy-efficient industrial drives ..... 114**  
 Peter Köllensperger, Savvas Tsotoulidis (Siemens, Erlangen)
- 15 Water Electrolysis Power Supply: Status & Future Trends..... 122**  
 Sven Schumann, Thibaut Runser, Fabian Herzig, Bogdan Craciun (Siemens Energy, Erlangen)
- 16 Einsatz von Leistungshalbleitern in Windumrichtern zur Verringerung der  
 Stromgestehungskosten ..... 129**  
 Christian Wessels (Nordex Energy, Hamburg), Daniel Lexow ((Nordex Energy, Rostock)
- 17 Power Density Increase of Photovoltaic and Battery Inverters..... 136**  
 Klaus Rigbers, Uwe Stickelmann, Julia Schmahl, Stefan Engel, Henrik Wolf,  
 Gerrit Braun (SMA Solar Technology, Niestetal)
- 18 Hauptvortrag:**  
**Leistungselektronik für die stationäre Ladeinfrastruktur ..... 146**  
 Jochen von Bloh, Stephan Thomas (AixControl GmbH, Aachen)
- 19 Power Electronics for Automotive Electric Drivetrains – Design and Optimization..... 155**  
 Maximilian Hepp, Jörg Weigold, Michael Ebli, Alexander Nisch, Michael Saur,  
 Wolfgang Wondrak, Marcus Heller (Mercedes-Benz AG, Research & Development, Böblingen)
- 20 Leitungselektronik in der Elektrifizierung von Fahrzeugen**  
**Früher – Heute – Ausblick auf Morgen**  
 Rainer Fleischer (Volkswagen, Wolfsburg) *Beitrag lag nicht vor*
- 21 Technology Trends in Switched Mode Power Conversion..... 165**  
 Peter Wallmeier (AEG Power Solutions, Warstein-Belecke)
