

Table of Contents

Opening Session

Chairs: ICLP 2024 Conference Chairs

Lightning Protection of Composite Aircraft Structures..... 1

Christian Karch and Albertino Arteiro

Lightning – Physics, Discharge, Attachment and Environment – 1

Chairs: Alexander Kern; Farhad Rachidi

The Role of negative Corona, Trichel Pulses, and Free Electrons in Ball Lightning Creation..... 8

Herbert Friedrich Boerner

Lightning location system strokes as ball lightning triggers – A followup study. 15

Alexander G. Keul, Hannes Pichler Gerhard Diendorfer

Design and Development of a Rocket-Triggered Lightning Facility in Malaysia 21

Ahmad Rifhan Salman, Mohd Riduan Ahmad, Muhammad Haziq Mohammad Sabri, Mohd Zafri Baharuddin, Yuji Takayanagi, Muhammad Uwais Farihin Fauzi, Mohamad Zoinol Abidin Abd Aziz, Farhan Hanaffi, Takeshi Morimoto, Kazuo Yamamoto, Farah Hani Nordin, Azrul Mohd Ariffin, Maryam Huda Ahmad Phesal, Azwadi Mohamad and Noradlina Abdullah

Blue Corona Discharges Detected by ASIM 27

Dongshuai Li, Torsten Neubert, Lasse Skaaning Husbjerg, Olivier Chanrion, Alejandro Luque, Francisco J. Gordillo-Vázquez, Francisco J. Pérez-Invernón, Krystallia Dimitriadou, Nikolai Østgaard and Víctor Reglero

Acoustic Pressure Signals Observed at 90 m and 130 m from the Return Strokes of Rocket-triggered Lightning..... 33

Jinxin Cao, Jianguo Wang, Li Cai, Mi Zhou, Yadong Fan and Muzi Li

Evaluating the Lightning Protection System Design of the Zalongo Monument in Greece based on Stochastic Modeling of Lightning Attachment 39

Alexios Ioannidis, Pantelis Mikropoulos, Thomas Tsovilis and Nikolaos Kokkinos

Power System Protection and Analysis – 1

Chairs: Grzegorz Maslowski; Maik Koch

Method for Estimating Overvoltage at Distribution Boards in Building using TT System Struck Directly by Lightning 46

Yasui Shinji, Nakamura Hisho, Liu Qianling, Nakagawa Masaya and Yamamoto Tatsuya

Considerations about the Voltage Magnification at the End of Low- Voltage Cables ... 52

Michael Rock, Stefan Jugelt, Martin Hannig and Ralph Brocke

Measures Against Lightning Damage on Power Distribution Lines by One-phase Lightning Protection System..... 59

Hideki Honda and Shozo Sekioka

Characterization and Modeling of Transient Grounding Responses for a 100 kW wind turbine at Iwaki-no-sato Onigajo in the mountains of Fukushima, Japan..... 63

Yuya Toriyama, Eduard Shulzhenko and Kazuo Yamamoto

<i>Revisiting The Importance of Air Terminal Shapes for Lighting Protection Systems...69</i> Adonis Leal, Chloe Avitia, Lauren Hall, Olivia Cantrell, Jacob Wemhoner and Richard Sonnenfeld	
<i>High-Frequency Modeling of a Surge Isolation Transformer Based on Time-Domain Parameter Extraction76</i> Davi Gabino C. Moreiraa, Alberto De Conti and Kazuo Yamamoto	
Protection of Transmission and Distribution Lines – Earthing – 1 Chairs: Alexandre Piantini; Fridolin Heidler	
<i>Accuracy Verification of Analytical Expressions for the Calculation of the Ground-Return Parameters of Underground Cables83</i> Alberto De Conti, Naiara Duarte and Rafael Alipio	
<i>Flashover Analysis for Medium-Voltage Line Considering Frequency and Current Dependent Grounding Resistance90</i> Shozo Sekioka	
<i>Multi-Chamber Arrester with Impulse Arc Quenching for Protection 13.8 kV Overhead Lines95</i> Georgy Podporkin, Urij Kretov, Alexander Sotnikov and Sergey Rummyantsev	
<i>ATP-EMTP modelling of the negative lightning impulse flashover of a 24 kV silicone line pin insulator..... 100</i> Pantelis N. Mikropoulos and Petros P. Tsouris	
<i>Direct Lightning Performance Assessment of Distribution Lines Considering Degradation of Insulation Strength owing to Salt Pollution..... 106</i> Kazuyuki Ishimoto, Akifumi Yamanaka and Tomoyuki Sato	
<i>Influence of Grounding Resistance of Surge Arrester on Direct Lightning Performance of Distribution Lines over Lossy Ground Considering LEMP Impact.... 113</i> Tomohiro Maeda, Akifumi Yamanaka and Kazuyuki Ishimoto	
LEMP – Applications, Return Stroke Modelling – 1 Chairs: Marcos Rubinstein; Daniele Mestriner	
<i>Comparative analysis of calculations of induced voltage in low voltage installations caused by lightning current..... 120</i> Konrad Sobolewska and Katarzyna Bartnik	
<i>Field-Induced Voltages and Currents on Buried Cables: Accurate Assessment of Lossy Ground Effects 1208</i> Naiara Duarte, Rafael Alipio and Farhad Rachidi	
<i>Assessment of Energy Absorption by Surge Protective Devices in Low Voltage Lines Exposed to Indirect First and Subsequent Lightning Strokes..... 126</i> F. Napolitano, F. Tossani, A. Borghetti, S. Lilla and C.A. Nucci	
<i>Estimation of Lightning Phenomenon Causative of Surge on Overhead Power Transmission Line through Surge Measurement..... 132</i> Koji Michishita, Shigeru Yokoyama, Masahiro Asano, Masahito Shimizu, Kazuki Kokui and Hideaki Ariya	
<i>Test and Validation of a Methodology for Calculating Lightning-Induced Voltages in Electromagnetic Transient Programs 137</i> Alberto De Conti and Osis E. S. Leal	

<i>Inclined and Tortuous Lightning Channel Impact on Lightning Performance Assessment of Distribution Lines with a Shield Wire.....</i>	144
Akifumi Yamanaka, Kazuyuki Ishimoto and Akiyoshi Tatematsu	

Lightning – Physics, Discharge, Attachment and Environment – 2

Chairs: Christian Paul; Rafael Alipio

<i>Characterizing the Preceding Discharges of the Positive Cloud-to-Ground Lightning First Strokes in Winter Thunderstorms in Japan.....</i>	151
Qingliu Yang, Daohong Wang, Ting Wu, Junchen Yang, Nobuyuki Takagi and Takeshi Morimoto	
<i>On the Probability of Thunderstorms Self-triggering Upward Lightning from Tall Towers.....</i>	157
Diego Rodríguez Nova, Marley Becerra and Francisco Román Campos	
<i>Closed current flow during a lightning discharge.....</i>	162
Ludwig Herrnböck, Dr. Martin Hannig and Ralph Brocke	
<i>Error Correction Model of Lightning Impulse Voltage Using Deconvolution Techniques.....</i>	171
Peerawut Yutthagowith, Virat Pongpitak and Yoshihiro Baba	
<i>Branching Behavior of Continuous Leaders in Positive Laboratory Long Air Discharges.....</i>	176
Lili Guo, He Wang, Junjia He and Zhi Zhang	
<i>Influence of Marangoni effect on direct damage effects of materials inflicted by lightning sweeping arc.....</i>	181
Cien Xiao, Yakun Liu, Zeyang Zhao and Zhenyu Wei	

Power System Protection and Analysis – 2

Chairs: Ralph Brocke; Marek Loboda

<i>An Investigation on Withstand Capability of Surge Arresters for Pole-Mounted Switches on Distribution Lines in Hokuriku Area of Japan.....</i>	185
Susumu Matsuura and Kenichi Kanatani	
<i>Parasitic Inductance of Surge Protective Devices for a Wide Frequency Range.....</i>	191
Alexandros Hadjicostas, Andreas Chrysochos and Thomas Tsovilis	
<i>Establishing a bypass route for surge current using SPD and SIT.....</i>	198
Yasuharu Yamada	
<i>Effect of surge protective devices at adjacent poles on faults at lightning striking pole on actual distribution line.....</i>	204
Chiharu Sakakibara, Koji Michishita, Shigeru Yokoyama, Koji Taka and Hidehiro Nakata	
<i>Discharge Performance of Lightning Current Arresters used in Lowvoltage Power Supply Systems under the Influence of Multiple Lightning Current Events.....</i>	209
Gernot Finis, Markus Philipp, Thomas Meyer and Hannes Sagebiel	
<i>Lightning Surge Insulation Characteristics of Polymer Insulators for 6.6kV Power Distribution Lines.....</i>	216
Yasuaki Yoneda, Yoshiyasu Koga, Tomoyuki Sato and Takafumi Kuno	

Flash, Strokes and Ground Strikes – 1

Chairs: Joan Montanyà; Mohd Riduan Ahmad

<i>Eleven Years of Total Lightning Insights From Belgium’s Ground-Based Lightning Location System BELLS</i>	223
Dieter Roel Poelman	
<i>On the continuing current duration of negative downward lightning measured in different regions</i>	230
Istvan Kereszy, Tamas Kereszy, John Kern, Giovanna Pedro, Caroline Comeau, Paulo Victorino, Dorottya Fuzy, Krisztian Pomazi, Imre Bartos, Miguel Guimarães, Listz Simões, Karine Teixeira, Gustavo Barbosa, Lucas Guimarães, Matheus Drumond, Marcelo Arcanjo, Colleen Bryant, Marta Yebra, Li Zhao, Geoff Cary, Matthias Boer, Rachael Nolan, Ryan Lawrey, Ailish Milner, Adam Leavesley and Meaghan Jenkins	
<i>Analysis of Lightning Parameters and Precipitation Associated with Lightning-Ignited Wildfire in the Contiguous United States</i>	236
Yanan Zhu, Jeff Lapierre and Elizabeth DiGangi	
<i>High-Speed Video Camera and Geostationary Lightning Mapper Measured Signatures of Cloud-to-Ground Strokes with and without Significant Continuing Current</i>	242
Megan D. Mark, Amitabh Nag, Kenneth L. Cummins, Mathieu N. Plaisir, Dylan J. Goldberg, Abdullah Y. Imam and Hamid K. Rassoul	
<i>Recurrent Lightning Spots with Different Lightning Return Period</i>	249
Gloria Sola, Jesús Alberto López, Joan Montanyà and Nicolau Pineda	
<i>Research on Extracting Lightning Ground Flash Trajectories Based on Clustering Algorithm</i>	253
Qianyong Lv , Xianyin Mao, Lu Qu, Wei Niu, Minchuan Liao, Huaifei Chen and Yuzhe Chen	
Down Conductors and Earthing – Modelling of Soil Resistivity – 1	
Chairs: Maria Teresa Correia De Barros; Hendri Geldenhuys	
<i>Impact of Inaccuracies in Defining the Transient Step Voltage Due to Impulse Currents on Grounding Grids</i>	258
Pedro H. N. Vieira, Rodolfo A. R. Moura, Marco Aurélio O. Schroeder, Antônio C. S. Lima, and Fernando A. Assis	
<i>On the parameters for representing tower-footing electrodes in studies of the lightning performance of transmission lines</i>	266
Silverio Visacro and Roberto L. C. Ribeiro	
<i>On Transient Impedance Measurements for Various Grounding Systems</i>	273
Alexandre Sellier, François Grange, Sébastien Journet and Farid Paul Dawalibi	
<i>A Comparison between Full-wave and Quasi-static PEEC for Transmission Towers under Very Fast Electromagnetic Transient Excitation</i>	280
Xiaobing Xiao, Yue Li, Yongxiang Cai, Lei Jia, Xipeng Chen, Ruihan Qi, Yuxuan Ding and Yaping Du	
<i>On the correction of the transient ground resistance at early times in lightning surge propagation studies</i>	1226
Hannes Kohlmann, Farhad Rachidi, Wolfgang Schulz and Dmitry Kuklin	
<i>An EMTP-Compatible Frequency-Dependent Model for Vertical Grounding Rods for Transient Studies</i>	1219
Rafael Alipio, Naiara Duarte, Nagananthini Ravichandran, Amedeo Andreotti and Farhad Rachidi	

Flash, Strokes and Ground Strikes – 2

Chairs: Dieter Roel Poelman; Ken Nixon

<i>Climate Changes and Detailed Characterization of Lightning Activity: Impact on Lightning Performance of Transmission Lines.....</i>	284
Rafael Alipio, Ana Clara Marques, Pedro Regoto, Luciano Ritter, Thiago Ferreira and Fernando Diniz	
<i>Residual Neural Network applied to lightning classification in a modern lightning location network.....</i>	291
Gabriel A.V.S Ferreira, Adonis F.R. Leal, Elizabeth A. DiGangi, Jeff Lapierre and Yanan Zhu	
<i>Classifying Single versus Multiple Ground Strike Point Lightning Flashes from High-Speed Lightning Videos using Deep Learning.....</i>	297
Yaseen Essa, Hugh G. P. Hunt, Carina Schumann, Turgay Çelik, Kenneth J. Nixon, Marcelo M. F. Saba and Tom A. Warner	
<i>Prototype measurement system information correlation with LLS data.....</i>	303
Franjo Vuković, Božidar Filipović-Grčić, Nina Stipetić, Bojan Franc and Dirk Brändlein	

Down Conductors and Earthing – Modelling of Soil Resistivity – 2

Chairs: Michael Rock; Susana Naranjo-Villamil

<i>Corrosion of lightning protection system components placed in atmosphere (air) and in earth (soil)</i>	310
Robert Marciniak and Marek Loboda	
<i>Enhancing Lightning Resilience: Investigating High-Strength Conductive Aggregate</i>	318
Arunima Shukla and Sunil Saini	
<i>The use of gypsum to improve the resistance of an electrode in very high soil resistivity ground.</i>	325
Hendri Geldenhuys, Andreas Beutel and Jutas Maudu	
<i>Field measurements for determining the frequency dependence of electrical parameters of soil using a short cylindrical electrode</i>	330
Barbara Pereira, Laura C. S. Pires and Silverio Visacro	

Poster Session

Chairs: Konrad Sobolewski; Shinji Yasui

<i>Effect of Topographical Factors in Zoning of Lightning Disaster-causing Hazard</i>	336
Cheng Xiangyang	
<i>Temporal and spatial distribution characteristics of 2011—2021 lightning in Anhui..</i>	340
Ju Xiaoyu	
<i>Comparison and Analysis of Grounding Impedance Measurement for Power Plant Grounding Device</i>	344
Zhu Hao and Wang Yebin	
<i>Experimental and simulation studies on lightning surge responses of a scaled-DC converter station</i>	348
Lei Jia, Ruihan Qi, Xiaobing Xiao, Yue Li, Yu Fu, Chakhung Yeung and Xiangen Zhao	

<i>A low frequency 3D lightning mapping network in north China</i>	354
Zilong Ma, Mingli Chen, Rubin Jiang and Xiushu Qie	
<i>Measures to Suppress the Overvoltage of Low-Voltage Circuits Caused by Lightning Strikes on Communication Tower in Electric-Supply Stations</i>	359
Masanobu Yoshida, Yosuke Ogura, Hiroko Isaji and Masahito Shimizu	
<i>Algorithm for Generating Synthetic Datasets of Lightning Flashovers on Distribution Lines</i>	366
Petar Sarajcev	
<i>Similarity Theory as a Tool in the Analysis of Lightning-Induced Transient Phenomena</i>	372
Ralf Frentzel	
<i>Characteristics of spatiotemporal sizes of specific types of lightning flashes</i>	378
Yijun Zhang, Yun Pan, Dong Zheng and Gaopeng Lu	
<i>Evolution and Recent Improvements of High-speed Video Lightning Detection at Lightning Observatory in Rzeszow, Poland</i>	382
Grzegorz Karnas, Kamil Filik and Grzegorz Maslowski	
<i>Lightning Observation at Lightning Observatory in High Altitude Region of Tibet (LOHA)</i>	389
Zixin Guo, Weidong Shi, Ting Lei, Xiujuan Chen, Tiantian Lu, Xia Zhao, Yang Zhang, Weitao Lyu and Chang Li	
<i>Evaluation of location efficiency by comparing lightning faults on overhead transmission lines and Blitzortung</i>	394
Tomomi Narita	
<i>Optical and Electric Field Signatures of Space-Leader Evolution in Negative Cloud-to-Ground Lightning Stepped Leaders</i>	400
Dylan J. Goldberg, Amitabh Nag, Mathieu N. Plaisir, Kenneth L. Cummins, Alex Tempert, A. Tyler Brower, Christopher J. Biagi and Hamid K. Rassoul	
<i>Transient Analysis of Transmission Towers: Influence of Grounding System Topologies</i>	406
Walter Luiz Manzi de Azevedo, José Luciano Aslan D'Annibale, Wagner Costa da Silva, Anderson Ricardo Justo de Araújo, José Pissolato Filho and Behzad Kordi	
<i>Estimation of Lightning Incidence to the Cahora-Bassa HVDC Overhead Lines based on Stochastic Modelling of Lightning Attachment</i>	414
Alexios Ioannidis, Zacharias Datsios and Thomas Tsovilis	
<i>Surge Protection System for a 22 kV Pole-Mounted Transformer in a Region of High Lightning Density in South Africa</i>	421
Nhlakanipho Malinga, Shriram Sharma and Chandima Gomes	
<i>Computation Approach of Impulse Impedance of Wind Turbine Grounding System for Lightning First Return Stroke</i>	429
Walter Luiz Manzi de Azevedo, Anderson Ricardo Justo de Araújo, José Pissolato Filho and Manu Abderrahmane Haddad	
<i>Performance Evaluation for Hainan Island Lightning Location System Based on Lightning Channel Imager</i>	438
Fangcong Zhou, Ying Ma, Yi Gao, Weitao Lyu and Qiyuan Yin	

PERFORMANCE ANALYSIS OF SOLAR INVERTERS UNDER LIGHTNING-INDUCED SURGES	442
Gustavo O. Cavalcanti, Marcílio A. F. Feitosa, Luis A. G. Malagón, Lucas C. Sobral, Fernanda S. Silva, Lucas V. Barbalho, Douglas T. M. Lara, Samuel F. Pinto, Thiago F. Gomes, Renato J. Teixeira and Wagner A. Barbosa	
Impact of Using Underbuilt Wire on Overhead Transmission Lines Considering Physically Consistent Line Parameters	449
Jesus E. Guevara, Jaimis S. L. Colqui and Jose Pissolato Filho	
Impact of Generalize Formulation for Computing Earth-return Impedance and Admittance in Transient Studies for Underground Transmission Lines	456
Jesus E. Guevara, Jaimis S. L. Colqui and Jose Pissolato Filho	
Overshoot at Lines with High Resistive or Capacitive Termination and Fast Rising Clamped or Crowbarred Input Voltage	463
Stefan Jugelt, Michael Rock, Christian Drebenstedt and Eric Conrads	
Observation and Simulation of Lightning Strikes in an Offshore Wind Turbine Cluster	470
Yang Zhang, Mengjin Zou, Yongbo Tan and Lyuwen Chen	
Discharge Propagation in Sub-Meter Gaps of EGLA/Rod-Rod Parallel Electrodes under Short-tail Lightning Impulse Voltage for Multi-Phase Back-flashover Study	474
Ryuichi Nakane, Toru Miki and Megumu Miki	
Observation of Continuing Currents Produced by Negative Cloud-to-Ground Flashes of Tropical Thunderstorm	481
Muhammad Uwais Farihin Fauzi, Norbayah Yusop, Mohd Riduan Ahmad, Zikri Abadi Baharudin, Muhammad Haziq, Mohamad Sabri, Yuji Takayanagi, Ahmad Rifhan Salman, Takeshi Morimoto, Badrul Hisham Ahmad and Mohd Zafri Baharuddinc	
Observation of Attachment processes of Lightning Flashes Striking 500 kV Transmission lines with High-speed Video Cameras	487
Megumu Miki, Toru Miki, Mikihisa Saito, Ryuichi Nakane, Takahiro Tajiri and Masahito Shimizu	
Lightning occurrence on wind turbines	494
Tagianne P. da Silva, Marcelo M. F. Saba, Tom A. Warner, Rafael Alipio, Carina Schumann and José Claudio O. Silva	
Effective design of a two-stage surge protective device for AC low voltage system protection	501
Anantawat Kunakorn, Busayapol Paophan and Peerawut Yutthagowith	
Analyzing positive cloud-to-ground lightning flashes with two leader propagation types – with and without recoil leaders	505
Diego Rhamon R. da Silva, Tom A. Warner, Marcelo M. F. Saba, Rasha U. Abbasi, Tagianne P. da Silva, Carina Schumann, Paola B. Lauria, Giovane B. Suss and José Claudio O. e Silva	
Maximum Withstand and Types of Damage of Surge Protective Devices under Single and Multi-Pulse Stress	510
Maik Koch	
Side Discharges Involved in an Intracloud-Initiated Positive Cloud-to-Ground Lightning	517
Jiangwan Zhua, Shanfeng Yuan, Xiushu Qie, Rubin Jiang and Mingyuan Liu	
Comparison of Multiple Return Strokes and Multiple Ground Strike points Characteristics of CG Lightning over Areas with Different Surface Features	523
Liu Ze, Wang Yu, Gu Shanqiang, Li Jian Li Zhe, Zhang Lei and Li Fengquan	

<i>Differences in distribution characteristics between negative and positive CG lightning flashes in Guangzhou tall-objects region</i>	528
Weitao Lyu, Qi Qi, Bin Wu, Lyuwen Chen, Ying Ma, Ruijiao Jiang, Yue Zhang and Hengyi Liu	
<i>Development of A Transient Recorder for Lightning Impulse Voltage Measurement</i>	532
Punyavee Chaisiri, Sarawuth Pramualsingha and Peerawut Yutthagowith	
<i>A practical approach to determining lightning risk for Wind Turbine Generators as per IEC 61400-24</i>	538
Ivan Grobbelaar	
<i>Lightning Statistics in Hungary between 2002 and 2022</i>	548
Zoltán Tóth and Csilla Simon	
<i>Characteristics of stroke polarity in the central region of Colombia</i>	554
Aicardo Suárez-Balaguera, Fernando Díaz-Ortiz and Francisco Román	
<i>Lightning Threats to Electric Vehicles Charging Station</i>	559
Ahmed M. Khudhair and Siow Chun Lim	
<i>Research on the Transient Potential Rise Characteristics of Highspeed Railway Rail Lightning Strike and Its Impact on Trackside Signal Equipment</i>	565
Shulai Wang, Nianwen Xiang, Chaoqun Wang, Zengwei Lyu and Zhiwei Chen	
<i>Development of a remotely controlled measurement system for ultraviolet and infrared lightning emissions</i>	571
Miguel Guimarães, Listz Araújo, Túlio Carvalho, Deilton Gomes, Gustavo Barbosa, Lucas Guimarães, Matheus Drumond, Matheus Martins, Rasha Abbasi, Davide Mauzucco, Ny Kieu, Marcelo Arcanjo, Ivan Toucedo, Diego Rhamon and Marcelo Saba	
Lightning – Physics, Discharge, Attachment and Environment – 3	
Chairs: Koji Michishita; Ralph Brocke	
<i>Direct Measurements of Lightning-Induced Coupling to a Spacecraft Umbilical Cable</i>	576
Dustin Hill and Carlos Mata	
<i>The 4G Network Traffic Performance under Natural Lightning Electromagnetic Interference</i>	583
Antony Sumardi, Mohd Riduan Ahmad, Shamsul Ammar Shamsul Baharin, Muhammad Haziq Mohammad Sabri; Mohamad Zoinol Abidin Abd Aziz, Norbayah Yusop, Imran Mohd Ibrahim and Mardina Abdullah	
<i>Environmental Influences on Measurements with Electric Field Meters for Lightning Observation</i>	588
Julia Maier, Sebastian Schatz, Lukas Schwalt, Stephan Pack and Hannes Kohlmann	
<i>The amplitude decay with distance for return strokes and in-cloud pulses using lightning electromagnetic field pulses measured by JASA</i>	595
Baoyou Zhu, Feifan Liu, Dabao Wang, Wenwei Wang, Gaopeng Lu and Helin Zhou	
<i>Relationship between Lightning Flashes and Three Flash Flood Events in Malacca Malaysia</i>	599
Harry Sucitra Roslan, Mohd Riduan Ahmad, Anthony Sumardi, Shamsul Ammar Shamsul Baharin, Mawarni Mohamed, Yunus, Nor Azlan Mohd Aris, Ho Yih Hwaa, Hidayah, Mohd Zafri Baharuddin, Takeshi Morimoto, Yuji Takayanagi, Zen Kawasaki and Nor Hadizah Mohd Khalid	

<i>A Weighted Gridding Method for the Long-Range Lightning Location Network Accuracy Evaluation</i>	605
Lin Song, Jie Li, Qilin Zhang, Qingda Li and Jun Yang	

Power System Protection and Analysis – 3

Chairs: Carlo Alberto Nucci; Chandima Gomes

<i>Protection measures for backflow lightning of power systems based on observation results in wind farm on the coast of Sea of Japan</i>	615
--	------------

Yasuhiro Miyama, Tomoyuki Sato, Nobuyuki Honjo, Takashi Usui, Shigeru Yokoyama and Koji Michishita

<i>Optimization of Lightning Protection System Using Multi-Objective Optimization Techniques</i>	620
---	------------

Jia-Wen Tang, Chin-Leong Wooi, Wen-Shan Tan, Vernon Cooray, Mohd Zainal Abidin Ab Kadir and Hadi Nabipour Afrouzi

<i>On the Use of Lightning Location System Data to Evaluate the Lightning Performance of Overhead Distribution Lines</i>	626
---	------------

Martino Nicora, Daniele Mestiner, Massimo Brignone, Renato Procopio, Marina Bernardi, Elisabetta Fiori, and Alexandre Piantini

<i>Development of Calculation Method for the Occurrence Rate of Short-Circuit Following Multi-Phase Flashover due to Lightning in Medium-Voltage Distribution Lines</i>	633
--	------------

Ryota Mori, Tomo Tadokoro and Kazuyuki Ishimoto

<i>Accurate Mathematical Parameter Determination for Two-Exponential Lightning Impulse Waveforms with Specified Parameters</i>	639
---	------------

Peerawut Yutthagowith and Yoshihiro Baba

<i>On the Effect of Building Segmentation on the Induced Voltages of Urban Distribution Systems</i>	644
--	------------

Susana Naranjo-Villamil and Daniele Mestriner

Protection of Transmission and Distribution Lines – Earthing – 2

Chairs: Fernando H. Silveira; Amedeo Andreotti

<i>Analysis of lightning strike fault characteristics in data-driven dense channels of new power systems</i>	650
---	------------

Chaoqun Wang, Nianwen Xiang, Shulai Wang, Zengwei Lyu and Zhiwei Chen

<i>Discharge Test and Vertical Safe Distance of ± 800 kV UHVDC Line and 500 kV Line in Crossing Area</i>	656
--	------------

Maoheng Jing, Mr. Chun Li, Xiang Xiao, Huan Chen, Qiang Li, Xiuyi Li, Ye qiang Deng and Zhengxian Du

<i>Estimation of Lightning Overvoltages and Critical Backflashover Current of a 150 kV Overhead Line due to Subsequent Strokes</i>	662
---	------------

Zacharias G. Datsios, Diamantis G. Patsalis, Aggelos A. Gkougkogiannis, Anastasios G. Tsironis, Pantelis N. Mikropoulos and Thomas E. Tsovilis

<i>Performance of distribution networks with surge arresters considering lightning parameters in tropical zone</i>	669
---	------------

Camilo Barreto, Diego Casas and Edison Soto

On the choice of current wavefront parameters to assess the lightning performance of transmission lines: the use of correlation expressions and median parameters ... 676

Fernando H. Silveira, Laura C. S. Pires and Silverio Visacro

Experimental Research on Lighting Impulse Characteristics of the 500 kV Transmission Line Parallel Gap at High Altitude Area..... 683

Shanqiang Gu, Wei Cao, Jian Li, Xuesong Du, Zihao Liu and Hua Ren

LEMP – Applications, Return Stroke Modelling – 2

Chairs: Fridolin Heidler; Fabio Napolitano

Sensitivity Analysis on the Reconstruction of the Attenuation Function for Short Time-Windows Measurements 688

Riccardo Aramini, Massimo Brignone, Daniele Mestriner, Renato Procopio, Andrea Randazzo and Marcos Rubinstein

Data-driven classification model of lightning generated LF/VLF radiation electric field waveforms 694

Xiao Lilang, Chen Weijiang, Wang Yu, Bian Kai, Fu Zhong, Xiang Nianwen, He Hengxin and Cheng Yang

Simultaneous multi-parameter observation of long-gap discharge based on a scaled-down wind turbine model 699

Minchuan Liao, Lu Qu, Mr. Qianyong Lv, Huaifei Chen, Xianyin Mao, Wei Niu and Zeliang Wu

Exploring the Cooray-Diendorfer Return Stroke Model: Unraveling the Mechanism Behind the Diminished Propagation Speed of Electromagnetic Waves in Dielectric Media 1203

Vernon Cooray, Gerald Cooray, Farhad Rachidi and Marcos Rubinstein

Effect of Meshed Grounding Systems on the Magnetic Field Generated by a Direct Lightning Strike Inside a Reinforced Concrete Building 703

Susana Naranjo-Villamil and Julien Gazave

Frequency-domain Expressions of the Time-Windowed Electric Fields Radiated by a Lightning Flash..... 708

Riccardo Aramini, Massimo Brignone, Daniele Mestriner, Renato Procopio, Andrea Randazzo and Marcos Rubinstein

Protection of Transmission and Distribution Lines – Earthing – 3

Chairs: Istvan Kiss; Kazuyuki Ishimoto

Monte Carlo method procedure for evaluations of the lightning performance of transmission lines based on the concepts of critical and anti-critical currents 714

Frederico S. Almeida, Fernando H. Silveira and Silvério Visacro

Insights on the relevance of subsequent return strokes on lightningrelated outages of Transmission Lines 720

Silverio Visacro, Raquel Policarpo, Barbara Pereira, Fernando Henrique Silveira

On the Correlation Between Lightning Occurrences, Site Topography and Meteorological Data on a 500 kV Transmission Line in Peninsular Malaysia 727

N. Roslan, U. A. U. Amirulddin, M. Z. A Ab-Kadir and N. Abdullah

Statistical analysis of lightning strike faults in transmission lines based on distributed monitoring data 733

Yuan Zhou, Xiangyang Peng, Yazhou Fan, Rui Wang, Juncai Li Jintian Chen and Yeqiang Deng

Lightning Overvoltages due to Direct Strikes to a Hybrid Overhead Line 737
Luana Batista Moraes, Alexandre Piantini, Miltom Shigihara, Alberto Borghetti, Fabio Napolitano,
Carlo Alberto Nucci and Fabio Tossani

Assessing the impact of using an elaborate attractiveness model on the calculated lightning performance of transmission Lines 744
Silverio Visacro, Daniela C. S. Santos, Fernando H. Silveira

Protection of Renewable Energy Systems – 1

Chairs: Josef Birkli; Michael Rock

Lightning-Induced Current on Solar Photovoltaic Panels..... 750
Ganga Lokuhettige, Chandima Manathunga, Sidath Abegunawardana, Nilantha Sapumanage,
Sankha Nanayakkara, Mahendra Fernando and Vernon Cooray

Overvoltage transition model for a single-phase fault in a Wind-Photovoltaic-Battery hybrid system caused by a lightning strike 756
Donghuang Luo, Yakun Liu, Siyuan Shen, Yujun Li, Wei Hao and Zheng Liang

Modeling for Temperature Rise of Lithium-Ion Battery Cell in Energy Storage Under Overcurrent Incidence From Lightning..... 761
Li Yujun, Liu Yakun, Luo Donghuang, Shen Siyuan and Hao Wei

Lightning Protection Strategies for Ground-mounted PV Systems – Publicly Accessible or Enclosed Power Plant..... 765
Mario Kompacher, Lukas Schwalt and Stephan Pack

Lightning protection and PV roof systems in existing buildings..... 771
Josef Birkli, Björn Maiworm and Reyno Thormälen

An Approach in Rotor Blade Fast Transient Model Comparison During Lightning..... 777
Yarú Méndez, Héctor Candela, Raghavender Goud Deshagani, Pol Fontanes, Lars Bo Hansen,
Miguel Ángel Sepúlveda, Marcelo Arcaño Sousa and Florian Preis

Tall Tower Studies

Chairs: Wolfgang Schulz; Felicitas Modlinger

ICC of Negative Upward Flashes to the Peissenberg Tower, Germany..... 783
Felicitas Modlinger and Fridolin Heidler

Tall Structures as Recurrent Lightning Spots in the inner tropics 790
Steven Ardila, Jesús López, Glòria Solà and Joan Montanyà

Recent Update on Lightning Parameters for Downward and Upward Flashes Observed at Tokyo Skytree 798
Toru Miki, Ami Kudo and Mikihisai Saito

High-Speed Video Observations of Downward Negative Lightning Attachment to Tall Structures at the Kennedy Space Center 804
Dustin Hill and Carlos Mata

Application of the Smorgonskiy Method for the Estimation of Upward Lightning Incidence on Tall Towers Using WLLN Data-Preliminary Results..... 1196
Lucía Pini, Daiana M. Baissac; M. Gabriela Nicora, M. Florencia Barle , Ehsan Mansourie, Toma Oregel-Chaumont, Yasmin R. Velázquez, Constanza I. Villagrán Asiares, Daniel Pastafiglia,
Adrian Stacul, Farhad Rachidi and Marcos Rubinstein

<i>Trigger Mechanism of Upward Lightning by Positive Cloud-to-Ground Lightning in Beijing</i>	812
Shanfeng Yuan, Xiushu Qie, Rubin Jiang and Dongfang Wang	

Protection of Infrastructure, E-Vehicles and Railway Systems – 1

Chairs: Gernot Finis; Zacharias G. Datsios

<i>Surge Protection of Residential EV Charging Stations Against Direct Lightning Strikes</i>	817
Konstantinos Gektidis, Alexandros Hadjicostas, George D. Peppas, Zafiris Politis and Thomas Tsovilis	

<i>Cases of lightning damage to railway power equipment</i>	823
Taichi Hirano, Hitoshi Hayashiya, Hideki Yamazoe, Takao Ishimoto, Yuya Hagura, Masato Yoshikawa, Naomi Sato and Yuuki Mizumoto	

<i>Analysis of Direct Lightning Effects on Airborne Radomes using Simulation Techniques</i>	828
Sathya Skanda B M and Mrudula G	

<i>Role of Winglets in Lightning Attachment to Aircraft</i>	835
Soumyadeep Chowdhury, Sayantan Das and Udaya Kumar	

<i>Synchronous Measurements of Rocket-Triggered Lightning Induction for Cables Positioned at Various Locations</i>	842
Denglei Duan, Mi Zhou, Xinrui Zuo, Li Cai, Jianguo Wang, Jinxin Cao and Yadong Fan	

<i>Impedance Measurement of multidirectional carbon fiber reinforced polymer laminates with real-time simulated lightning impulse currents</i>	847
Zeyang Zhao, Yakun Liu, Cien Xiao, Zhenyu Wei and Minqi Xie	

Lightning – Physics, Discharge, Attachment and Environment – 4

Chairs: Carina Schumann; Hannes Kohlmann

<i>Successful Short-Term Prediction of First Cloud-to-Ground Lightning Strikes in Thunderstorm Events</i>	852
Sebastian Schatz, Lukas Schwalt, Julia Maier, Stephan Pack, Hannes Kohlmann and Hannes Pichler	

<i>Upward leaders competing to connect a downward leader during the attachment to a lightning rod</i>	858
Marcelo M. F. Saba, Paola B. Lauria, Carina Schumann and José Claudio O. Silva	

<i>Simultaneous Upward Lightning Events to Tall Towers – Luminosity and Current Measurement Analysis</i>	864
Carina Schumann, Tagianne P da Silva, Hugh GP Hunt, Marcelo MF Saba and Tom A Warner	

<i>Reduced order model for a streamer discharge in air</i>	870
Hasupama Jayasinghe, Liliana Arevalo, Richard Morrow and Vernon Cooray	

<i>Localization of Narrow Bipolar Events over Sumatra Island Based on VHF Interferometer and Magnetic Direction Finder Systems</i>	877
Muhammad Zuhair Bolqiah Edris, Mohd Riduan Ahmad, Nik Mohd Zarif Hashim, Shamsul Ammar Shamsul Baharin, Sani Irwan Salim, Masrullizam Bin Mat Ibrahim, Mohd Zafri Baharuddin, Yuji Takayanagi, Manabu Akita, Takeshi Morimoto and Zen Kawasaki	

<i>A Preliminary Study of the Audible Frequency Spectrum of Thunder Pertinent to Cloud to Ground discharges</i>	883
Sidath Abegunawardana, Ganga Lokuhettige, Mahendra Fernando, J A P Bodhika and Vernon Cooray	
Protection of Infrastructure, E-Vehicles and Railway Systems – 2	
Chairs: Koji Michishita; Martin Bischoff	
<i>Damage characteristics of oil pipelines under different lightning current components</i>	889
Xuan Liu, Xiaolei Bi, Changxiu Zhang, Yingjie Zhang, Bin Tao and Shiqiang Wang	
<i>Understanding the impact of Lightning Strikes on Buried Gas Pipelines: Mechanisms, Risk Assessment and Mitigation</i>	896
C.A. Charalambous, Andreas Dimitriou, Nikolaos Kokkinos, Nikolaos Kioupis and Theagenis Manolis	
<i>On the Computation of Currents Induced in Cables Routing Inside a Reinforced Concrete Duct by a Partial Lightning Current Flowing Through the Duct's Reinforcement</i>	903
Julien Gazave, Susana Naranjo-Villamil and Eric Piedallu	
<i>Damage Probability of Apparatus Powered by an HV/LV Line</i>	909
Giovanni Battista Lo Piparo, Marco Maccioni, Tomasz Kisielewitz and Carlo Mazzetti	
<i>Practical considerations for designing an economically feasible Lightning Protection System for utility scale PV plants</i>	915
Ivan Grobbelaar	
<i>The opportunities and risks of using a dynamic electro geometrical model in lightning protection</i>	925
Martin Hannig and Ralph Brocke	
Lightning Occurrence Characteristics – Nowcasting and AI – 1	
Chairs: Gerhard Diendorfer; Hannes Kohlmann	
<i>Classification of Direct Lightning Stroke according to its Polarity in Medium Voltage Networks based on Deep Learning Neural Networks</i>	932
Luis Perdomo, Andrés Alfonso, Boris Anillo, Francisco Santamaria and Nelson Vera	
<i>Neural Network Based Procedure for Lightning Localization</i>	938
Sami Barnada, Mauro Tucci, Massimo Brignone, Martino Nicora and Renato Procopio	
<i>Cloud-to-Ground Lightning Nowcasting from Remote Sensing and Numerical Weather Prediction Modeling Data</i>	943
Alice La Fata, Gabriele Moser, Renato Procopio, Marina Bernardi, Elisabetta Fiori and Martina Lagasio	
<i>Application of Convolutional Neural Networks for the Detection of Lightning in Weather Radar Data</i>	950
Lukas Schwalt, Sebastian Schatz, Friedrich Obenaus and Stephan Pack	
<i>Single-Sensor Machine-Learning-Based Lightning Localization using Lightning-Induced Voltages</i>	1189
Mostafa Asadi, Nagananthini Ravichandran, Siavash Rajabi, Toru Miki, Hamidreza Karami, Marcos Rubinstein, Farhad Rachidi and Amedeo Andreotti	

***Application of the Smorgonskiy Method for the Estimation of Upward Lightning Incidence on Tall Towers Using WWLLN Data - Preliminary Results* 1196**

Lucía Pínia, Daiana M. Baissac; Gabriela Nicora, Florencia Barle, Ehsan Mansouri, Toma Oregel-Chaumont, Yasmin R. Velázquez, Constanza I. Villagrán Asiares, Daniel Pastafiglia, Adrian Stacul. Farhad Rachidi and Marcos Rubinstein

Protection of Renewable Energy Systems – 2

Chairs: Yaru Mendez; Michael Rock

***An Analysis of the Estimation of Lightning Incidence to Wind Farms with Special Attention to Upward Flashes* 956**

Quanxin Li, Guohua Yang, Chaoyin Fang, Jun Xu, Chijie Zhuang, Qing Yang, Bo Zhang and Jinliang He

***Wind Turbine Blade Carbon Spar Cap Golden Reference for High Current Verification Test* 960**

Victor March, Olaf Götting, Vijay Kumar, João Martinho and Purim Ladpli

***A Combined Electrical and Mechanical Test Procedure for Use in LPS Blade Components for Lifetime Verification* 965**

Purim Ladpli, Harsha B Patil, Victor March, Olaf Götting and João Martinho

***A Study of Protection Range of Diverter Strips Used for Lightning Protection of Wind Turbine Blades* 971**

Kazuo Yamamoto

***Investigation of damage to wind turbine blades caused by atmospheric discharges in Croatia* 976**

Nikola Pletikosa, Viktor Milardić and Dominik Miloš

***Insulation Coordination between wind turbine blade LPS components when submitted to subsequent negative short stroke* 982**

João Martinho, Victor March, Olaf Götting and Tiago Campos

Lightning Occurrence Characteristics – Nowcasting and AI – 2

Chairs: Hugh Hunt; Lukas Schwalt

***Comparison of Lightning Flash Density Observed by LLS and Current Measurement in Japan in Winter* 989**

Koji Michishita, Shigeru Yokoyama, Michihiro Matsui, Yasuhiro Miyama, Nobuyuki Honjo and Takashi Usui

***Spatial and temporal evolution of a thunderstorm in the Pearl River Delta region* 995**

Muzi Li, Jianguo Wang, Li Cai, Jinxin Cao, Mi Zhou and Yadong Fan

***Assessment of Lightning Characteristics in Pakistan* 999**

Maryam Zahra, Zainab Fatima, Hanzla Zahid, Aown Abbas Shah, Noor Ul Ain and Farhan Mahmood

***GIS-Based Visualization of Lightning Activities in Peninsular Malaysia and Its Correlation With Monsoon Seasons* 1005**

Nur Azliza Ahmad, Mohd Zainal Abidin Ab. Kadir, Nik Norasma Che Ya, Ungku Anisa Ungku Amirulddin Nurzanariah Roslan

Protection of Renewable Energy Systems – 3

Chairs: Kazuo Yamamoto; Udaya Kumar

***Multi-physics Coupling Simulation Model of Corona Charge Distribution on Rotating Wind Turbine Blade Tip*..... 1011**

Qianhui Yanga, Yejiang Denga, Chaoyin Fang, Yu Wang, Lei Lana and Jun Xu

***Transient analysis of wind turbine grounding system: Comparison between interconnected overhead ground wire and underground bare conductor in wind farms*..... 1017**

Wagner Costa da Silva, Walter Luiz Manzi de Azevedo, Anderson Ricardo Justo de Araújo and José Pissolato Filho

***Upward flashes to wind turbines during winter observed from space by ISS-LIS and GLM*..... 1026**

J. Montanyà, A.R. Jara-Jiménez, O. van der Velde, J.A. López, N. Pineda, J. López, S. Vogel, S.F. Madsen, S. M. Steiger, E. C. Bruning, V. C. Chmielewski, J. Trostel and J.Losego

***Optimizing earth-termination systems in wind turbines for enhancing lightning current discharge efficiency in high resistivity soils*..... 1032**

Eduard Shulzhenko, Martin Hannig and Ralph Brocke

Safety – Human Safety, Case Studies, Statistics and Awareness – 1

Mary Ann Cooper; Mitchell Guthrie

***Modelling of a Human Being Using Lumped Elements to Simulate Heart Currents and Energy During Lightning Strikes*..... 1039**

Daniel Beetz

***GER and EU risk acceptance in fire safety engineering: Contradiction to IEC lightning protection risk management*..... 1046**

Björn Maiworm and Claudius Hammann

***Lightning-related Fatalities and Injuries in Mountainous Terrain*..... 1054**

Ronald L. Holle

***Contribution of Thunderstorm Warning Systems to reduce safety risks for human on wind turbines*..... 1060**

Stéphane Schmitt and Alain Rousseau

***Lightning Damage to Residences, A Guide to Homeowners*..... 1064**

Carlos Mata and Dustin Hill

***A new method to assess the probability of lightning causing wildfires*..... 1072**

Jose V. Moris, Davide Ascoli and Hugh G. P. Hunt

Testing – Laboratory Experiments, Standards – 1

Chairs: Pantelis Mikropoulos; Thomas Tsovilis

***Influence of Bandwidth, Resolution, and Oscillations on Lightning Current Measurement Accuracy*..... 1078**

Shaoyang Wang, Mingli Chen and Ya-ping Du

***Test verification of “Coordination between SPDs” and “Need for additional protection”*..... 1083**

Kensuke Kaito, Kazuhiro Kuroda and Tomohiro Oku
