

## Table of Contents

### Paper Session I: Components, converter modelling and topologies, design and low-level control

<b>1.1 Transient Measurement Setup for the Output Characteristics with Focus on the Ohmic Region for Si-MOSFETs and GaN-HEMTs .....</b>	<b>7</b>
Sophia Rösel, Daniel Breidenstein, Thomas Duerbaum	
<b>1.2 Topology Comparison to Generate Output Currents of Specific Shape .....</b>	<b>12</b>
Sagar Kunadiya, Bikash Sah, Steffen Isfort, Moritz Mondre, Marco Jung	
<b>1.3 Design of Calorimetric Measurement System for Determination of the Power Losses in Magnetic Components.....</b>	<b>18</b>
Oliver Frahnert, Moritz Mondre, Bikash Sah, Marco Jung, Fabian Schnabel	
<b>1.4 A three-level GaN-based gate driver with reduced loss by stepwise charging .....</b>	<b>24</b>
Daniel Grieshaber, Richard Reiner, Michael Basler, Rüdiger Quay, Stefan Mönch	

### Paper Session II: Power electronics for storage systems and hydrogen applications

<b>2.1 Using a High-frequency Switching Power Converter for Online Electrochemical Impedance Spectroscopy on an Electrolyser System.....</b>	<b>29</b>
Dhruval Mewada, Bikash Sah, Marco Jung	
<b>2.2 Influence of Initialisation Parameter in Extended Kalman Filter on State of Charge Estimation.....</b>	<b>35</b>
Jana Geßner, Bikash Sah, Marco Jung	
<b>2.3 Review and Selection of Bidirectional DC-DC Power Converter for Green Energy Systems .....</b>	<b>41</b>
Martin Nowakowski, Bikash Sah, Luis Gabriel Sievers, Marco Jung	

### Paper Session III: Power electronics for e-mobility

<b>3.1 Principle for a Boost-Converter Derived Three-Phase-PFC-Rectifier for Charging Stations and Industrial Applications .....</b>	<b>47</b>
Aaron Fessler, Lothar Schmidt, Josef Kallo	
<b>3.2 On the Advantages of Delta-Sigma Modulation in Current Ripple Driven Design of Filter Inductors for Dynamic Power Converters.....</b>	<b>53</b>
Philipp Czerwenka, Jannik Maier, Eckhard Hennig	
<b>3.3 Efficiency study of different DCDC-converter designs for use in EV prototypes .....</b>	<b>59</b>
Jan Behrendt, Marcel Thürmer, Jonas Heinemann, Steffen Isfort	

## **Paper Session IV: Control strategies for renewable energy systems**

- 4.1 A Study of Cable Models as an Interface for Connecting Real-Time Simulators for Large Electrical System Simulations ..... 64**  
Pouya Mostashar, Florian Hans
- 4.2 Influence of Machine-Side Converter Diode Selection on the Lifetime of Type-4 Wind Turbine Power Converters ..... 70**  
Ibrahim Alisar, Erhan Demirok, Aydin Akan
- 4.3 Design of a Current Control System for Generating Various Current Forms..... 75**  
Moritz Mondre, Jörg Kirchof, Bikash Sah, Marco Jung
