## Chapter 3 Power Systems Planning, Optimization, and Management

- 3.1 Constructing heating networks from GIS data: A framework for editing and converting line topologies into calculable grids** ..... 63  
 Constantin Völzel<sup>1\*</sup>, Niklas Schug<sup>2</sup>, Michel Textor<sup>1</sup>, Stefan Lechner<sup>1</sup>  
<sup>1</sup> THM - University of Applied Sciences Hessen, Wiesenstrasse 14, 35390 Giessen, Germany  
<sup>2</sup> TransMIT GmbH, Kerkrader Strasse 3, 35394 Giessen, Germany
- 3.2 Mathematical Model of the impact of climate change on the energy security of the Republic of Tajikistan** ..... 71  
 Alfiya Akhrorova, Nigina Kamilova, Shahlo Saidova\*  
 Tajik Technical University named after Academician M.S. Osimi, Dushanbe, Tajikistan  
 Analysis of Complementary Load Profiles for Optimal Use of Power
- 3.3 Flow Controllers in Low-Voltage Grid Areas** ..... 77  
 Jonathan Mader\*, Michael Suriyah, Thomas Leibfried  
 Karlsruhe Institute of Technology (KIT), Institute of Electric Energy Systems and High-Voltage Technology (IEH), Karlsruhe, Germany
- 3.4 Estimation of Aggregated Distribution Grid Flexibilities Using Linear and Nonlinear Machine Learning Algorithms** ..... 83  
 Tamim Jaouni\*, Neelotpal Majumdar, Lutz Hofmann  
 Electric Power Engineering Section, Institute of Electric Power Systems,  
 Leibniz University Hannover, Hannover, Germany
- 3.5 Optimizing soil-based microbial fuel cells: From parameter tuning to practical power generation** ..... 91  
 Vanesa Condric<sup>1,2\*</sup>, Axel Wellm<sup>1</sup>, and Ali Sanayeri<sup>2</sup>  
<sup>1</sup> Schülerforschungszentrum Hamburg, Germany  
<sup>2</sup> Albrecht-Thaer-Gymnasium, Hamburg, Germany

## Chapter 4 Grid Stability and Advanced Control

- 4.1 Uncertainty in the Assessment of Harmonic Voltages and Currents in Sequence Domain** .... 101  
 Max Domagk<sup>1\*</sup>, Olga Zyabkina<sup>1</sup>, Jan Meyer<sup>1</sup> and Marco Lindner<sup>2</sup>  
<sup>1</sup>TUD Dresden University of Technology, Dresden, Germany  
<sup>2</sup>TransnetBW, Stuttgart, Germany
- 4.2 Damping of voltage harmonics and transient voltage distortions with a STATCOM** ..... 107  
 Klaus Vennemann<sup>1\*</sup>, Volker Staudt<sup>2\*</sup>, Tobias Hennig<sup>1</sup>  
<sup>1</sup> Amprion GmbH, Dortmund, Germany  
<sup>2</sup> Ruhr University Bochum, Bochum Germany
- 4.3 Advanced Control Strategies for Doubly-Fed Induction Generators in Variable-Speed Wind Turbines** ..... 113  
 Sina Beydaghi<sup>1\*</sup>, Hesam Rahbarimagham<sup>2\*</sup>, Gevork B. Gharehpetian<sup>1</sup>, and Sevda Beydaghi<sup>3</sup>  
<sup>1</sup> Electrical Engineering Department, Amirkabir University of Technology, Tehran, Iran  
<sup>2</sup> Department of Electrical and Computer Engineering, Raf.C., Islamic Azad University, Rafsanjan, Iran  
<sup>3</sup> Industrial Design Department, Faculty of Art, Alzahra University, Tehran, Iran
- 4.4 A structured analysis of grid scenarios and power market data to establish requirements for hydrogen storage power plants** ..... 119  
 Mirco Fabian Woidelko, M. Sc.\*<sup>1</sup>, Christian Becker, Prof. Dr.-Ing.,<sup>1</sup>  
<sup>1</sup>Institute of Electrical Power and Energy Technology, Hamburg University of Technology, Hamburg, Germany

|                                                                                                                                                                                                                                                  |            |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>4.5 DSSE-Based Training Data Generation for Probabilistic Time Series Forecasting in Distribution Grids with Changing Topologies .....</b>                                                                                                    | <b>125</b> |
| Marcel Dipp <sup>1,2*</sup> , and Marco Pau <sup>1</sup>                                                                                                                                                                                         |            |
| <sup>1</sup> Fraunhofer IEE, Grid Planning and Grid Operation, Kassel, Germany                                                                                                                                                                   |            |
| <sup>2</sup> University of Kassel, Department of Sustainable Electrical Energy Systems, Kassel, Germany                                                                                                                                          |            |
| <b>4.6 Reduce the Operating Costs and Carbon Emissions of Data Centers by using LNG Cold Utilization from Small-scale Liquefied Naturalgas (LNG) Terminal .....</b>                                                                              | <b>132</b> |
| Maytungkorn Sermsuk <sup>1</sup> , Surapong Siripongdee <sup>1</sup> , Amnuay Saengnoree <sup>1</sup> , Woranat Sangmanee <sup>1</sup> , and Montri Wiboonrat <sup>1,2*</sup>                                                                    |            |
| <sup>1</sup> College of Innovation and Industrial Management, King Mongkut's Institute of Technology Ladkrabang, Bangkok 10520, Thailand                                                                                                         |            |
