

Table of Contents

Preface	III
----------------------	------------

Special Session 1

01 Grid-Serving Control Methods in Home Energy Management Systems: Case Study in an Urban Grid Using Agent-Based Modeling	1
Jiahe Chu, Markus Doepfert, Thomas Hamacher and Matthias Huber	
02 Hydrogen for Long-duration Energy Storage in a Fully Renewable Island Power System: A Case Study of Reunion Island.....	7
Mirabelle Scholten, Agnès François, Robin Roche, Dominique Grondin and Halima Ikaouassen	
03 Integrated Planning of Multi-Energy Systems: A Graph-Theoretical Framework	13
Daniel Wenser, Marwan Mostafa, Payam Teimourzadeh Baboli and Christian Becker	
04 Evaluation of a Decentral Grid-Oriented Demand Side Management Algorithm for Low Voltage Grids in Special Grid Situations	19
Konstantin Wagner, Veronika Barta, Georg Kerber and Stephanie Uhrig	

Special Session 2

05 Definition of NTL Zones Using Georeferenced Data and Dimensionality Reduction with UMAP	25
Natalia Bastos de Sousa, Leonardo Silva, Daniel Bernardon, Vinicius Jacques Garcia and Martin Wolter	
06 Integration of PV and V2G Technology in an Island Grid: A Real-Time Simulation Study of Kastellorizo.....	31
Lampros Konstantellos, Anurag Mohapatra, Theodoros Kavvathas, George Konstantopoulos and Thomas Hamacher	
07 Enhancing Reinforcement Learning for Home Energy Management via Policy Transfer and Prioritized Level Replay	37
Christoph Bley and Vedran Perić	
08 A Reproducible Open-Data Pipeline for Synthetic Low-Voltage Grid Generation in Germany ..	43
Beneharo Reveron Baecker, Kadir Kalkan, Patrick Buchenberg, Anurag Mohapatra and Thomas Hamacher	
09 Field-Dependent Dielectric Relaxation in Oil-Pressboard Insulation Systems	49
Deniz Targitay, Markus Bier, Markus H. Zink, Maja Kobus, René Manger, Lisa Roth, Hans-Peter Ötting, Michael Geißler, Stefan Jauffer, Christian Schmied and Balz Schlittler	
10 Privacy-Preserving Data Aggregation for Smart Meters under a Mixed Adversary Model	55
Jan Popanda, Lasse Nitz, Avikarsha Mandal and Stefan Decker	

Technical Session 1 – Modeling, Simulation & Analysis

- 11 Reinforcement Learning for Cost-Efficient Energy Management under Dynamic Pricing: CoSES Building Case Study 61**
Zoé Nézet, Milad Kazemi, Christina Papadimitriou and Anurag Mohapatra
- 12 Small-Signal Stability Assessment of Multi-Inverter Medium-Voltage Grids Using Impedance-Based Methods 67**
David Sören da Cruz, Johannes Leugner and Johanna Timmermann
- 13 Lightweight AI-Based Fault Locator for Renewable Based Power Systems..... 73**
Juan David Suarez Gutierrez, Niels Blaauwbroek, Matias Cardaci, Phuong Nguyen and Ara Panosyan
- 14 Overview of Model Reduction Techniques for Power System Time Domain Simulation 79**
Shane Karunaratne, Angela Popova and Soupayan Bose
- 15 Load Behavior Analysis of a University AC Charging Infrastructure for Electric Vehicles 85**
Tom Scheppan, Tine Fischer, Julian Metag, Dirk Lehmann, Mario Schenk and Kaveh Malekian
- 16 A Novel Transformerless Topology for Grid-Connected Photovoltaic Inverters with Mitigated Common-Mode Current 91**
Caíque Creomenes Almeida de Carvalho, Lucas Elias dos Santos and José Antenor Pomilio

Technical Session 2 – Techno-Economics, Markets & Forecasts

- 17 Proposing an Optimization Model for a techno-economic Evaluation of Energy Storage Systems..... 97**
Andreas Stadler, Hermann Kraus and Oliver Brückl
- 18 Co-optimizing aFRR Energy Bidding and Intraday Trading for Battery Energy Storage Systems..... 103**
Leon Tadayon and Georg Frey
- 19 Challenges and Approaches for Long-Term Reactive Power Forecasting in Power Systems 109**
Marion Hinterreiter, Oliver Brückl and Johannes Rauch
- 20 Reactive Power Management at the T–D Interface by DSO 115**
Dimitrios Kritikos, Anna Shuvarina, Phuong H. Nguyen, Johan Morren and Ana Roxana Ciupuliga

Technical Session 3 – Grid Operation & Flexibility

- 21 Distribution System State Estimation: A Comparison of Data-Driven Neural Networks and Model-Based Weighted Least Squares Method..... 121**
Sebastian Storch, Michael Finkel, Martin Uhrig, Michael Kreißl and Marcus Röttel
- 22 Distributed congestion management in an agent-based discrete-event simulation framework ... 127**
Marius Staudt, Daniel Feismann, Sebastian Peter, Johannes Bao, Ulf Häger and Christian Rehtan
- 23 Review and classification of Topology Path Identification methods for the Low Voltage network 133**
Yann Komenan, Jan Steggemann and Thomas Koller

24	Physics-Informed Neural Network for Modeling and Simulation of Phase-Locked Loop Dynamics	139
	Hussein Jaffal, Haitian Liu and Andreas Ulbig	

Technical Session 4 – Data-Driven Methods & Applications

25	Parameter Modeling and Analysis of HF Signal Transmission in Low-Voltage Networks for BPLC.....	145
	Amirali Mahjoob, Erik Wichmann, Philipp Lutat, Irina Zettl and Andreas Ulbig	
26	Comparative Analysis of Power System Operation Comparing Angle-based Control and Load Frequency Control from Operational Perspective.....	151
	Shahriar Sheybani, Hassan Alhomsy and Dirk Westermann	
27	Investigating the Impact on Low-Voltage Grids when Providing Frequency Containment Reserve from Home Storage Systems and Electric Vehicles	157
	Philipp Zoremba, Hendrik Maschke and Steffen Kortmann	
28	Unlocking distribution grid flexibility through low-temperature district heating: A literature-based assessment.....	163
	Farina Sadrai, Christoph Andres and Martin Wolter	
29	Global Voltage Control in Medium-Voltage Grids Using On-Load Tap-Changers and Artificial Neural Networks.....	169
	Tobias Ferreira, Georg Kordowich and Ilya Burlakin	
30	Integration of E-Mobility and Decentralized Generators in Distribution Grids: Analysis of Future Scenarios and Recommendations.....	175
	Bennett Sattler, Mauro dos Santos Ortiz, Christoph Andres and Martin Wolter	

Technical Session 5 – Monitoring, Control & Optimization

31	A Two-Stage Surrogate Framework for Optimizing EV–PV Integrated Distribution Grids	181
	Mehedi Hassan, Shuvo Dev, Md. Rabiul Islam, Mahfujur Rahman and Asif Islam	
32	Unity Game Engine as a Simulation Platform: Voltage Regulation in 3D Low-Voltage Networks.....	187
	Samip Poudel, Pallavi Ghimire, Anurag Mohapatra, Hepeng Li, Donald Hummels and Reinaldo Tonkoski	
33	Evaluation of Dynamic Equivalent in Renewable-Integrated Power Systems.....	193
	Muhammad Fahad Naveed and Carolina Tranchita	
34	Fast Extremum-Seeking Based Robust State Estimation and Control for Frequency Support of Low-Inertia Microgrids	199
	Ahsan Iqbal, Pallavi Ghimire, Samip Poudel, Timothy M. Hansen and Reinaldo Tonkoski	
35	State-Space Modeling and C-HIL Validation of a VSM: Virtual-Resistance Effects Across Grid Strengths.....	205
	Jesus Flores Huaman, Lucas Eilas dos Santos, Jose Carlos Ugaz Pena and Reinaldo Tonkoski
