

Table of Contents

AI and Machine Learning for Verification & Coverage

- 1 LLM-based Functional Coverage Generation and Auto-Evaluation Framework 1**
Jan Labuda, Marcela Zachariasova, Zdenek Matej

Formal & Symbolic Approaches to Digital Verification

- 2 Transformation-Aided Verification of MAC Designs using Symbolic Computer Algebra 8**
Lennart Weingarten, Kamalika Datta, Rolf Drechsler

Mixed-Signal and Power-Aware Verification

- 3 Performance Evaluation of a Phase-Locked Loop using Variation-Aware Behavioral Models 15**
Neha Chavan, Jan Rödel, Carna Zivkovic, Christoph Grimm

Functional Safety and Security

- 4 Minimally Intrusive Safety and Security Verification of Rust RTIC Applications 22**
Pawel Dzialo, Ivar Jönsson, Malte Münch, Erik Serrander, Johan Eriksson, Per Lindgren

Advances in Virtual Platform Integration

- 5 Integrating SystemC TLM into FMI 3.0 Co-Simulations with an Open-Source Approach..... 29**
Andrei Mihai Albu, Giovanni Pollo, Alessio Burrello, Daniele Jahier Pagliari, Sara Vinco, Cristian Tesconi, Loris Panaro, Dario Soldi, Fabio Autieri

Debugging and Formal Methods in Verification

- 6 DRAMPyML: A Formal Description of DRAM Protocols with Timed Petri Nets..... 36**
Derek Christ, Thomas Zimmermann, Philippe Barbie, Dmitri Saberi, Yao Yin, Matthias Jung

Coverage Reuse and Model Based UV

- 7 Efficient Coverage Optimization with Formal-Guided Testcase Generation in UVM Verification 43**
Yu-Shien Shen, Yean-Ru Chen, Yu-Tung Chen, En-Hsiang Lin

Virtual Prototyping and Digital Twin Applications

- 8 Leveraging RISC-V for Flexible and Adaptive Real-Time Radar Sequencing 49**
Michael Atzmüller, Rainer Findenig, Bernhard Greslehner-Nimmervoll, Wolfgang Ecker, Daniel Große
