# Table of Contents

**Introduction** ............................................................................................................................................... VII

**Editorial** .................................................................................................................................................... VIII

**Responsive Landscapes** ............................................................................................................................. 1

*Adrienne Grêt-Regamey (Keynote at DLA 2017)*  
Six Key Conditions for Successfully Implementing a Responsive Landscape Planning Approach .......................................................... 2

*Zihao Zhang*  
Human Factors in Responsive Landscapes: Importance and Method ......................................................... 10

*Tadej Bevk, Nieves Mestre Martinez, Patrick Brereton, Marija Lalošević, Milica Perić*  
Iterative Digital Photo-based Assessment for Rural Landscape Perception: A Small Experiment from County Wicklow, Ireland ......................................................................................... 18

*Serhat Cengiz, Sevgi Görmüş, Şermin Tagil*  
Modelling the Interaction Between Urban Sprawl and Agricultural Landscape Around Denizli City, Turkey .......................................................................................................................... 28

*Thomas Roberts, Sareh Moosavi*  
Leveraging the Dredge Cycle at the Gippsland Lakes: Simulating with Autodesk CFD .......................................................... 42

*Artan Hysa, Fatma Ayçim Türer Başkaya*  
Landscape Fragmentation Assessment Utilizing the Matrix Green Toolbox and CORINE Land Cover Data .......................................................................................................................... 54

*Ping Xu*  
Fires and Postfire Debris/Mudflows Triggered by Landforms in the Colorado Front Range and the Subsequent Impact on and by Humans ................................................................. 63

**Geodesign and Smart Cities** ...................................................................................................................... 75

*Kirsten S. Kurland (Keynote at DLA 2017)*  
3D and Spatial Analysis for Smart and Healthy Cities .................................................................................. 76

*Guoping Huang*  
Protecting Urban River Views with Geodesign Approach ............................................................................ 85

*Lars Schütz, Susanne Raabe, Korinna Bade, Matthias Pietsch*  
Using Visual Analytics for Decision Making .............................................................................................. 94

| Joerg Schaller, Johannes Gnaedinger, Leon Reith, Sebastian Freller, Cristina Mattos  
GeoDesign: Concept for Integration of BIM and GIS in Landscape Planning | 102  |
| Eleanna Panagoulia  
Open Data and Human-Based Outsourcing Neighbourhood Rating: A Case Study of the San Francisco Bay Area Gentrification Rate | 113  |
| Olaf Schroth, Puyu Wang, Hrishikesh Ballal  
Geodesigning Climate Change Adaptation on a Regional Level through Shelterbelt Provision in the Jingjinji Area | 125  |
| Stefan Küspert, Roland Zink  
Concept of a Digital Communication Platform to Increase the Citizens’ Interest in Spatial Planning | 136  |
| Yalcin Yildirim  
Measuring Sounds with a Grid Method for Supporting the Design of Public Spaces | 144  |
| Saviour Formosa  
The SIntegraM Stairway to Integrative Spatialisation: Removing the Barriers to Access and Harmonisation | 152  |
| **Algorithmic Landscapes** | 161  |
| Yuan Yangyang, Cheng Yuning  
Road Planning for a Scenic Environment Based on the Dijkstra Algorithm: Case Study of Nanjing Niushou Mountain Scenic Spot in China | 162  |
| Mona Ghandi  
Landscape as a Networked Ecological System: The Role of Data and Emerging Technologies in Rethinking Site Remediation | 174  |
| Agnieszka Ozimek, Paweł Ozimek  
Viewshed Analyses as Support for Objective Landscape Assessment | 190  |
| Philip Paar, Timm Dapper, Jan Walter Schliep  
Development of an Interactive 3D Herbaceous Bed Designer | 198  |
| Reto Spielhofer, Sara Irina Fabrikant, Matthias Vollmer, Johannes Rebsamen, Adrienne Grêt-Regamey, Ulrike Wissen Hayek  
3D Point Clouds for Representing Landscape Change | 206  |
| Siqing Simon Chen  
Designing with Phenology: Tree Canopy Dynamics and Its Effects on Solar Exposure for a Residential Building | 214  |
| Caroline Westort, Zhongzhe Shen  
Robot in the Garden: Preliminary Experiments Programming an On-site Robot Ball Assistant to the Landscape Architect | 223  |
Augmented and Virtual Reality in Landscape Architecture .......... 235

James Palmer, Vincent Vanderheyden, Gisele Alves, Georgia Sismani
Best Focal Length to Represent a Landscape View Using a Single-Frame
Photograph ....................................................................................................................... 236

Toomaj Goudarznia, Matthias Pietsch, René Krug
Testing the Effectiveness of Augmented Reality in the Public Participation Process:
A Case Study in the City of Bernburg ............................................................................. 244

Benjamin H. George, Ole R. Sleipness, Andrew Quebbeman
Using Virtual Reality as a Design Input: Impacts on Collaboration in a University
Design Studio Setting ...................................................................................................... 252

Teaching Digital Landscape Architecture and Environmental Planning .......................................................... 261

James Melsom, Luis Fraguada, Ilmar Hurkxkens
Onsite Analysis: Developing a Flexible Software Field-kit for Landscape
Architecture and Spatial Design ...................................................................................... 262

Michele Campagna
Geodesign A-to-Z: Evolution of a Syllabus for Architects and Engineers ................. 271

Mintai Kim
Teaching Coastal Resilience Using Geodesign: A Study of Virginia Beach .............. 279

Acknowledgements ...................................................................................................... 287

Early Conference Announcement & Call for Papers for the International Conference “Digital Landscape Architecture DLA 2018”...... 291
