AMENDMENT 34
2014-12-01

**Information technology — Coding of
audio-visual objects —**

**Part 5:
Reference software**

**AMENDMENT 34: Reference software of
the multi-resolution frame compatible
stereo coding of AVC**

*Technologies de l'information — Codage des objets audiovisuels —
Partie 5: Logiciel de référence*

*AMENDEMENT 34: Logiciel de référence du cadre multirésolution
compatible avec le codage stéréo de l'AVC*

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of the joint technical committee is to prepare International Standards. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 14496-5:2001 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 29, *Coding of audio, picture, multimedia and hypermedia information*.

In this Amendment, additional text of the reference software for the MFC High profile in ITU-T Rec. H.264 | ISO/IEC 14496-10 is specified.

Information technology — Coding of audio-visual objects —

Part 5:

Reference software

AMENDMENT 34: Reference software of the multi-resolution frame compatible stereo coding of AVC

At the end of Clause 4 “Visual reference software”, add the following lines:

video/natural/MFC_software	MFC extension of AVC: visual decoder in C includes support of MFC High profile
----------------------------	--

At the end of Clause A.2 “Visual encoding software”, add the following lines:

video/natural/MFC_software	MFC extension of AVC: visual encoder in C includes support of MFC High profile
----------------------------	--
