## Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives) or [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs)).

ISO and IEC draw attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents) and <https://patents.iec.ch>. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

## Information technology — Universal Coded Character Set (UCS) —AMENDMENT 2: Todhri, Garay, Tulu-Tigalari, Sunuwar, Gurung Khema, Kirat Rai, and other characters

### Clause 2, Normative references

Insert the new reference:

Unicode Standard Version 16.0 Unicode Egyptian Hieroglyph Database (Unikemet)

<https://www.unicode.org/reports/tr57/tr57-3.html>

and update all Unicode reference to their Unicode version 16.0 version

### 17.6.2

In the first paragraph, update the link with the following:

<https://standards.iso.org/iso-iec/10646/ed-6/en/amd/2/UCSVariants.txt>

### 24.1

In the list of Hanzi G sources, update the GIDC entry as follows:

GIDC      Supplementary Characters of the Public Security Population Information Special Font (公安人口信息专用字库补充汉字) of PRC; the value is the original PUA code point in hexadecimal.

In the list of Hanzi G sources, insert the following entry:

GIDC23      ID system of the Ministry of Public Security of China, 2023

### 24.2

In the first paragraph, update the link with the following:

<https://standards.iso.org/iso-iec/10646/ed-6/en/amd/2/CJKSrc.txt>

In Table 5, for the kIRG\_GSource row, in the third field format column, update the GIDC format and add a new entry for GIDC23. For the kRSUnicode row, update the third field format column content as shown below. Update the first sentence of the explanation concerning the Radical-Stroke index as shown below. The updated values and the new kIRG\_GSource entry are described in the following table:

Tag Value	Third field format
kIRG_GSource	(GIDC-hhhh) , (GIDC23-ddd)
kRSUnicode	((d{1,3}'{0,3}.d{1,2})) (<space> (((d{1,3}'{0,3}.d{1,2})))) *
The Radical-Stroke index ((d{1,3}'{0,3}.d{1,2})) (<space> (((d{1,3}'{0,3}.d{1,2})))) * is a field that contains one or more of the following space separated construct: a radical index (one to three digits), optionally followed by one apostrophe for Chinese simplified radicals, two apostrophes for first other simplified radicals, three apostrophes for second other simplified radical, followed by a full stop, and ending by one or two digits for the stroke count.	

## 24.3.1

Replace the first sentence of second paragraph as follows:

The graphic representation for the radical is shown immediately below the code point, along with the radical number, optionally followed by one apostrophe for Chinese simplified radicals, two apostrophes for first other simplified radicals, three apostrophes for second other simplified radicals, and the stroke count.

## 24.3.2

Replace the two first paragraph with following:

For the presentation of the CJK UNIFIED IDEOGRAPH block, the graphic representations for the Hanzi G, H, and T sources, the Kanji J source, the Hanja K and KP sources, and the ChuNom V source are shown in that order when present in a first row. That row is not shown if none of these sources are specified for that code point. An optional second row may be displayed to show the Hanzi M source, the Unicode U sources, the UK UK source, and the SAT S source. Because at least one of these eleven sources (G, H, T, J, K, KP, V, M, U, UK, and S) exists for any code point in that block, there is always one row visible for each code point in that block.

Figure 2 shows an example for characters 4E00-4E09 and 4E14-4E1C.

## 25.2

In the first paragraph, update the link with the following:

<https://standards.iso.org/iso-iec/10646/ed-6/en/amd/2/TangutSrc.txt>

Insert a new Clause 27 entitled "Source references for Egyptian hieroglyphs" and renumber following clauses accordingly.

## 27. Source references for Egyptian hieroglyphs

An Egyptian hieroglyph is always referenced by one or more source references and ancillary data. The source reference information and the ancillary data establish the character identity for Egyptian hieroglyphs characters. The ancillary data provided by the database define additional information such as a detailed description of the character, various sources, catalogue entries, and function. It also defines properties related to these hieroglyphs, such as belonging to a Core set, whether they rotate or not, and whether they mirror or not. The information is in accordance with the Unicode Egyptian Hieroglyph Database (Unikemet); see Clause 2.

35.5

Insert a new note after the first sentence:

NOTE – The full content of the repertoire (new and existing) is the same as the Unicode Standard version 16.0 available at:
