## CONTENTS

FOREWORD.....	51
1 Scope.....	53
2 Normative references .....	53
3 Terms, definitions and abbreviated terms .....	54
3.1 Terms and definitions.....	54
3.2 Abbreviated terms.....	55
4 Relation with other CIM standards .....	56
4.1 Deprecation .....	57
5 Version information for the CGMES profiles.....	57
5.1 Core equipment profile.....	57
5.2 Operation profile .....	58
5.3 Short-circuit profile .....	58
5.4 Steady state hypothesis profile .....	58
5.5 Topology profile .....	59
5.6 State variables profile .....	59
5.7 Diagram layout profile.....	59
5.8 Geographical location profile.....	60
5.9 Dynamics profile .....	60
5.10 Equipment boundary profile .....	61
6 Package CoreEquipmentProfile .....	61
6.1 General.....	61
6.2 (abstract) EarthFaultCompensator .....	83
6.3 (abstract) EnergyArea .....	84
6.4 (abstract) EnergyConnection.....	84
6.5 EnergyConsumer .....	85
6.6 EnergySchedulingType .....	86
6.7 TapSchedule.....	86
6.8 EnergySource .....	87
6.9 (abstract) Equipment.....	88
6.10 (abstract) EquipmentContainer.....	89
6.11 (abstract) ACDCConverter .....	90
6.12 ACDCConverterDCTerminal.....	91
6.13 (abstract) ACDCTerminal .....	92
6.14 ACLineSegment.....	93
6.15 ActivePowerLimit .....	94
6.16 ApparentPowerLimit.....	95
6.17 AsynchronousMachine .....	95
6.18 (abstract) AuxiliaryEquipment .....	96
6.19 BaseVoltage .....	97
6.20 (abstract) BasicIntervalSchedule.....	97
6.21 BatteryUnit.....	98
6.22 Bay .....	99
6.23 (European) BoundaryPoint.....	99
6.24 Breaker.....	101
6.25 BusbarSection .....	102
6.26 BusNameMarker .....	103

6.27	CAESPlant.....	103
6.28	Clamp.....	104
6.29	ConformLoadSchedule.....	105
6.30	CogenerationPlant.....	105
6.31	CombinedCyclePlant.....	106
6.32	(abstract) ConductingEquipment.....	106
6.33	(abstract) Conductor.....	107
6.34	ConformLoad.....	108
6.35	ConformLoadGroup.....	108
6.36	ConnectivityNode.....	109
6.37	(abstract) ConnectivityNodeContainer.....	110
6.38	(abstract) Connector.....	110
6.39	ControlArea.....	111
6.40	ControlAreaGeneratingUnit.....	112
6.41	CsConverter.....	112
6.42	CurrentLimit.....	114
6.43	CurrentTransformer.....	114
6.44	(abstract) Curve.....	115
6.45	CurveData root class.....	116
6.46	Cut.....	116
6.47	DayType.....	117
6.48	(abstract) DCBaseTerminal.....	118
6.49	DCBreaker.....	118
6.50	DCBusbar.....	119
6.51	DCChopper.....	120
6.52	(abstract) DCConductingEquipment.....	120
6.53	DCConverterUnit.....	121

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

---

**ENERGY MANAGEMENT SYSTEM APPLICATION  
PROGRAM INTERFACE (EMS-API) –**
**Part 600-2: Common Grid Model Exchange Standard (CGMES) –  
Exchange profiles specification**
**FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61970-600-2 has been prepared by IEC technical committee 57: Power systems management and associated information exchange.

This first edition cancels and replaces IEC TS 61970-600-2 published in 2017. This edition constitutes a technical revision.

The text of this international standard is based on the following documents:

FDIS	Report on voting
57/2361/FDIS	57/2373/RVD

Full information on the voting for the approval of this international standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all the parts in the IEC 61970 series, published under the general title *Energy Management System Application Program Interface (EMS-API)*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## ENERGY MANAGEMENT SYSTEM APPLICATION PROGRAM INTERFACE (EMS-API) –

### Part 600-2: Common Grid Model Exchange Standard (CGMES) – Exchange profiles specification

#### 1 Scope

This part of IEC 61970-600 defines the profiles included in the Common Grid Model Exchange Standard (CGMES) that are based on IEC 61970-450-series and IEC 61968-13 profiles. This document refers to the IEC 61970-450-series and IEC 61968-13 profiles only in cases where they are identical. If the referenced profile is not yet published, this document includes the profile definition and related constraints' definitions. In the case where a CGMES profile makes restriction on the referenced profile, the restriction is defined in this document.

The equipment boundary profile (EQBD) is the only profile that is not part of IEC 61970-450-series and IEC 61968-13 profiles. This profile is deprecated as modifications have been made to align between EQBP and the equipment profile (EQ). Although the updated EQBD is addressing the requirement that boundary also can be located inside a substation, which will be the case for many Distribution System Operators (DSOs), additional information would need to be exchanged. For instance, system integrity protection schemes, that can be shared by multiple utility would require another way of boundary handling. In this document EQBD is included in CGMES only to create better backwards compatibility with previous version of the CGMES.

The machine-readable documentation that supports model driven development of the profiles defined in this part are generated as Resource Description Framework Schema (RDFS) according to IEC 61970-501:2006 (with some extension) and IEC 61970-501:ED2 when published.

#### 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

## COMMISSION ÉLECTROTECHNIQUE INTERNATIONALE

**INTERFACE DE PROGRAMMATION D'APPLICATION  
POUR SYSTÈME DE GESTION D'ÉNERGIE (EMS-API) –****Partie 600-2: Norme pour l'échange  
de modèle de réseau commun (CGMES) –  
Spécification des profils d'échange**

## AVANT-PROPOS

- 1) La Commission Electrotechnique Internationale (IEC) est une organisation mondiale de normalisation composée de l'ensemble des comités électrotechniques nationaux (Comités nationaux de l'IEC). L'IEC a pour objet de favoriser la coopération internationale pour toutes les questions de normalisation dans les domaines de l'électricité et de l'électronique. A cet effet, l'IEC – entre autres activités – publie des Normes internationales, des Spécifications techniques, des Rapports techniques, des Spécifications accessibles au public (PAS) et des Guides (ci-après dénommés "Publication(s) de l'IEC"). Leur élaboration est confiée à des comités d'études, aux travaux desquels tout Comité national intéressé par le sujet traité peut participer. Les organisations internationales, gouvernementales et non gouvernementales, en liaison avec l'IEC, participent également aux travaux. L'IEC collabore étroitement avec l'Organisation Internationale de Normalisation (ISO), selon des conditions fixées par accord entre les deux organisations.
- 2) Les décisions ou accords officiels de l'IEC concernant les questions techniques représentent, dans la mesure du possible, un accord international sur les sujets étudiés, étant donné que les Comités nationaux de l'IEC intéressés sont représentés dans chaque comité d'études.
- 3) Les Publications de l'IEC se présentent sous la forme de recommandations internationales et sont agréées comme telles par les Comités nationaux de l'IEC. Tous les efforts raisonnables sont entrepris afin que l'IEC s'assure de l'exactitude du contenu technique de ses publications; l'IEC ne peut pas être tenue responsable de l'éventuelle mauvaise utilisation ou interprétation qui en est faite par un quelconque utilisateur final.
- 4) Dans le but d'encourager l'uniformité internationale, les Comités nationaux de l'IEC s'engagent, dans toute la mesure possible, à appliquer de façon transparente les Publications de l'IEC dans leurs publications nationales et régionales. Toutes divergences entre toutes Publications de l'IEC et toutes publications nationales ou régionales correspondantes doivent être indiquées en termes clairs dans ces dernières.
- 5) L'IEC elle-même ne fournit aucune attestation de conformité. Des organismes de certification indépendants fournissent des services d'évaluation de conformité et, dans certains secteurs, accèdent aux marques de conformité de l'IEC. L'IEC n'est responsable d'aucun des services effectués par les organismes de certification indépendants.
- 6) Tous les utilisateurs doivent s'assurer qu'ils sont en possession de la dernière édition de cette publication.
- 7) Aucune responsabilité ne doit être imputée à l'IEC, à ses administrateurs, employés, auxiliaires ou mandataires, y compris ses experts particuliers et les membres de ses comités d'études et des Comités nationaux de l'IEC, pour tout préjudice causé en cas de dommages corporels et matériels, ou de tout autre dommage de quelque nature que ce soit, directe ou indirecte, ou pour supporter les coûts (y compris les frais de justice) et les dépenses découlant de la publication ou de l'utilisation de cette Publication de l'IEC ou de toute autre Publication de l'IEC, ou au crédit qui lui est accordé.
- 8) L'attention est attirée sur les références normatives citées dans cette publication. L'utilisation de publications référencées est obligatoire pour une application correcte de la présente publication.
- 9) L'attention est attirée sur le fait que certains des éléments de la présente Publication de l'IEC peuvent faire l'objet de droits de brevet. L'IEC ne saurait être tenue pour responsable de ne pas avoir identifié de tels droits de brevets.

La Norme internationale IEC 61970-600-2 a été établie par le comité d'études 57 de l'IEC: Gestion des systèmes de puissance et échanges d'informations associés.

Cette première édition annule et remplace l'IEC TS 61970-600-2 parue en 2017. Cette édition constitue une révision technique.

La présente version bilingue (2022-02) correspond à la version anglaise monolingue publiée en 2021-06.

La version française de cette norme n'a pas été soumise au vote.

Le présent document a été rédigé selon les Directives ISO/IEC, Partie 2.

Une liste de toutes les parties de la série IEC 61970, publiées sous le titre général *Interface de programmation d'application pour système de gestion d'énergie (EMS-API)*, se trouve sur le site web de l'IEC.

Le comité a décidé que le contenu de cette publication ne sera pas modifié avant la date de stabilité indiquée sur le site web de l'IEC sous "<http://webstore.iec.ch>" dans les données relatives à la publication recherchée. A cette date, la publication sera

- reconduite,
- supprimée,
- remplacée par une édition révisée, ou
- amendée.

**IMPORTANT – Le logo "colour inside" qui se trouve sur la page de couverture de cette publication indique qu'elle contient des couleurs qui sont considérées comme utiles à une bonne compréhension de son contenu. Les utilisateurs devraient, par conséquent, imprimer cette publication en utilisant une imprimante couleur.**

# INTERFACE DE PROGRAMMATION D'APPLICATION POUR SYSTÈME DE GESTION D'ÉNERGIE (EMS-API) –

## Partie 600-2: Norme pour l'échange de modèle de réseau commun (CGMES) – Spécification des profils d'échange

### 1 Domaine d'application

La présente partie de l'IEC 61970-600 définit les profils inclus dans la Norme pour l'échange de modèle de réseau commun (CGMES) et qui reposent sur les profils de la série IEC 61970-450 et de l'IEC 61968-13. Le présent document fait référence aux profils de la série IEC 61970-450 et de l'IEC 61968-13 uniquement lorsqu'ils sont identiques. Si le profil référencé n'est pas encore publié, le présent document inclut sa définition et les définitions des contraintes associées. Lorsqu'un profil de la CGMES impose une restriction sur le profil référencé, cette restriction est définie dans le présent document.

Le profil d'équipement frontière (EQBD) est le seul profil qui ne fait pas partie des profils de la série IEC 61970-450 et de l'IEC 61968-13. Ce profil est déconseillé, des modifications ayant été apportées pour aligner l'EQBP sur le profil d'équipement (EQ). Bien que l'EQBD mis à jour réponde à l'exigence selon laquelle la frontière peut également se trouver à l'intérieur d'un poste, ce qui est le cas pour de nombreux opérateurs de réseaux de distribution (DSO), il est nécessaire d'échanger des informations supplémentaires. Par exemple, les plans de protection de l'intégrité système, qui peuvent être partagés par plusieurs entreprises de services publics, exigent une autre manière de gérer les frontières. Dans le présent document, l'EQBD n'est inclus dans la CGMES que pour améliorer la rétrocompatibilité avec la version antérieure de la CGMES.

La documentation lisible par une machine qui vient à l'appui du développement piloté par modèle des profils définis dans la présente partie est produite sous forme de schéma RDF (RDFS) selon l'IEC 61970-501:2006 (avec des extensions) et l'IEC 61970-501:ED2 après publication.

### 2 Références normatives

Les documents suivants sont cités dans le texte de sorte qu'ils constituent, pour tout ou partie de leur contenu, des exigences du présent document. Pour les références datées, seule l'édition citée s'applique. Pour les références non datées, la dernière édition du document de référence s'applique (y compris les éventuels amendements).
