CONTENTS

FOREWORD.....	4
1 Scope.....	6
2 Normative references	6
3 Terms and definitions	6
4 Measuring conditions.....	7
4.1 Standard measuring environmental conditions	7
4.2 Standard lighting conditions	7
4.2.1 Darkroom conditions.....	7
4.2.2 Ambient illumination conditions.....	7
4.2.3 Ambient illumination spectra	8
4.3 Standard setup conditions.....	8
4.3.1 Starting conditions of measurements	8
4.3.2 Conditions of measuring equipment	9
5 Measuring methods of transparent properties	10
5.1 Measuring methods of transmission performance.....	10
5.1.1 Hemispherical transmittance factor with specular included.....	10
5.1.2 Transmitted haze under hemispherical illumination	12
5.1.3 Directional transmittance factor	14
5.1.4 Measurement method of purity.....	16
5.1.5 Colour variation caused by a transparent display	19
5.2 Measuring methods of on-screen performance in a darkroom.....	20
5.2.1 Luminance and its uniformity	20
5.2.2 Chromaticity and colour non-uniformity	23
5.2.3 Darkroom contrast ratio	24
5.2.4 Grey scale and gamma characteristics	25
5.2.5 Colour gamut.....	27
5.2.6 Directional optical characteristics	29
6 Measuring methods of reflection properties	30
6.1 Hemispherical reflectance factor with specular included.....	30
6.1.1 Purpose.....	30
6.1.2 Measuring conditions.....	30
6.1.3 Measuring method	30
6.2 Directional reflectance factor	31
6.2.1 Purpose.....	31
6.2.2 Measuring conditions.....	31
6.2.3 Measuring method	31
7 Optical on-screen performance under ambient illumination	31
7.1 Ambient contrast ratio.....	31
7.1.1 Purpose.....	31
7.1.2 Measuring conditions.....	32
7.1.3 Measuring method	32
7.2 Display ambient colour measurement.....	33
7.2.1 Purpose.....	33
7.2.2 Measuring conditions.....	33
7.2.3 Measuring method	34

Annex A (normative) Alternative method for measuring the hemispherical transmittance factor of a transparent OLED display	36
A.1 Purpose	36
A.2 Measuring conditions	36
A.3 Measuring the transmittance	36
Bibliography.....	39
Figure 1 – Layout diagram of measurement setup	9
Figure 2 – Side view of measuring concept for the hemispherical transmittance factor measurement with specular included or excluded	12
Figure 3 – Schematic arrangement of haze measurement.....	14
Figure 4 – Side view of measuring concept for the hemispherical transmittance factor measurement with specular included or excluded	16
Figure 5 – Measuring configuration for purity measurement	18
Figure 6 – Test patterns for purity measurement.....	18
Figure 7 – Test pattern for 4 % window luminance	21
Figure 8 – Example of luminance loading measurement.....	22
Figure 9 – Measurement locations	23
Figure 10 – Measuring patterns for gamma measurement.....	26
Figure A.1 – Measurement geometry using a sampling sphere.....	37
Table 1 – Standard ambient conditions	8
Table 2 –Measuring conditions of the ports.....	14
Table 3 – Measured example for purity	19
Table 4 – Working example for colour variation index	20
Table 5 – Worked example for luminance loading	22
Table 6 – Example of luminance non-uniformity	23
Table 7 – Example of colour uniformity measurement	24
Table 8 – Example of gamma measurement.....	26
Table 9 – Reference areas for the colour reproduction range	28
Table 10 – Example of measurement for the colour gamut variation ratio.....	28
Table 11 – Example of measurement for the directional electro-optical characteristic	30

INTERNATIONAL ELECTROTECHNICAL COMMISSION

ORGANIC LIGHT EMITTING DIODE (OLED) DISPLAYS –

Part 6-4: Measuring methods of transparent properties

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62341-6-4 has been prepared by IEC technical committee 110: Electronic display devices.

The text of this International Standard is based on the following documents:

FDIS	Report on voting
110/843/FDIS	110/866/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 62341 series, published under the general title *Organic light emitting diode (OLED) displays*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

ORGANIC LIGHT EMITTING DIODE (OLED) DISPLAYS –

Part 6-4: Measuring methods of transparent properties

1 Scope

This part of IEC 62341 specifies the standard measurement conditions and measuring methods for determining the optical performance of transparent properties of organic light emitting diode (OLED) display panels and modules. This document includes the display performance under darkroom conditions, and front and back illumination.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
