## CONTENTS

FOREWORD.....	3
1 Scope.....	5
2 Normative references.....	5
3 Terms, definitions and abbreviations .....	5
3.1 Terms and definitions .....	5
3.2 Abbreviations .....	5
4 General measurement conditions .....	5
4.1 Standard atmospheric conditions for LED BLU .....	5
4.2 Measuring setup .....	6
4.3 Warm-up time .....	6
5 Measurement methods.....	7
5.1 Electrical measurement methods .....	7
5.1.1 Conditions .....	7
5.1.2 Current .....	7
5.1.3 Voltage .....	7
5.1.4 Power consumption.....	7
5.2 Optical measurement methods .....	7
5.2.1 Conditions .....	7
5.2.2 Luminance .....	8
5.2.3 Luminance uniformity or non-uniformity .....	9
5.2.4 Spectral power distribution .....	10
5.2.5 Chromaticity.....	10
5.2.6 Colour uniformity.....	10
5.2.7 Angular luminance uniformity .....	11
5.2.8 Angular colour uniformity.....	11
5.2.9 Measurement methods of block-wise BLUs .....	11
Bibliography .....	16
Figure 1 – Example of measuring setup for LED BLU.....	6
Figure 2 – Example of warm-up characteristic of BLU .....	7
Figure 3 – Definition of zenith angle $\theta$ and azimuth angle $\phi$ .....	8
Figure 4 – Examples of measurement point layout.....	10
Figure 5 – Angular luminance uniformity measurement .....	11
Figure 6 – Example of checkerboard pattern (8 segments $\times$ 10 segments) for block-wise BLU .....	12
Figure 7 – Example of single block white pattern .....	12
Figure 8 – Example of single block black pattern .....	13
Figure 9 – Example of incoherent point spread function .....	13

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**DISPLAY LIGHTING UNIT –****Part 2-1: Electro-optical measuring methods  
of LED backlight unit**

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62595-2-1 has been prepared by IEC Technical Committee 110: Electronic display devices.

This first edition cancels and replaces the first edition of IEC 62595-2 published in 2012. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) changed the series title in order to cover frontlight unit;
- b) added the detailed measurement procedures particularly for block-wise BLU;
- c) deleted Annex A;
- d) revised Figure 1 and Figure 2 and some editorial errors.

The text of this standard is based on the following documents:

FDIS	Report on voting
110/731A/FDIS	110/743A/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 62595 series, published under the general title *Display lighting unit*, can be found on the IEC website.

Future standards in this series will carry the new general title as cited above. Titles of existing standards in this series will be updated at the time of the next edition.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## DISPLAY LIGHTING UNIT –

### Part 2-1: Electro-optical measuring methods of LED backlight unit

#### 1 Scope

This part of IEC 62595 specifies the standard measurement conditions and measuring methods for determining the electrical and optical parameters of LED backlight units for liquid crystal displays.

#### 2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 61747-30-1, *Liquid crystal display devices – Part 30-1: Measuring methods for liquid crystal display modules – Transmissive type*

IEC 62595-1-2, *Display lighting unit – Part 1-2: Terminology and letter symbols* <sup>1</sup>

---

<sup>1</sup> To be published.
