CONTENTS

FOREWORD	3
1 Scope	5
2 Normative references	5
3 Terms, definitions and abbreviated terms	5
3.1 Terms and definitions	5
3.2 Abbreviated terms	6
4 Standard measurement conditions	6
5 Measurement systems	6
5.1 Standard coordinate system	6
5.2 Measurement equipment	6
5.2.1 2D imaging LMD	6
5.2.2 Stage conditions	6
5.2.3 Setup conditions	6
5.3 Test patterns	7
5.3.1 General	7
5.3.2 Checkerboard pattern	7
5.3.3 4 % colour window signal patterns	7
5.4 Measuring points	8
6 Measurement methods for screen door effect	9
6.1 General	9
6.2 Preparations	9
6.3 Measurement procedures	10
6.4 Calculation	10
6.5 Report	12
Annex A (informative) Moving window average (MWA)	14
Annex B (informative) Contrast modulation and visibility	18
Annex C (informative) Examples of non rectangular pixel layout	19
Bibliography	20
Figure 1 – Example of 5 × 5 checkerboard pattern	7
Figure 2 – Example of 4 % white window signal pattern	7
Figure 3 – Example of measuring points for the centre and multi-point measurements	8
Figure 4 – Example of measuring points in azimuth and elevation angles	9
Figure A.1 – Example of pseudo code of MWA	15
Figure A.2 – Example of MWA conversion of 2D luminance data (image)	16
Figure A.3 – Example of the horizontal cross section	17
Figure B.1 – Example of MWA image and contrast modulation	18
Figure B.2 – Visibility under various spatial frequency and contrast	18
Figure C.1 – Example of non rectangular pixel layout	19
Table 1 – Example of report table	13

INTERNATIONAL ELECTROTECHNICAL COMMISSION

EYEWEAR DISPLAY –**Part 21-20: Specific measurement methods
for VR image quality – Screen door effect**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 63145-21-20 has been prepared by IEC technical committee 110: Electronic displays. It is an International Standard.

The text of this International Standard is based on the following documents:

Draft	Report on voting
110/1433/FDIS	110/1444/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

A list of all parts in the IEC 63145 series, published under the general title *Eyewear display*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

EYEWEAR DISPLAY –

Part 21-20: Specific measurement methods for VR image quality – Screen door effect

1 Scope

This part of IEC 63145 specifies the standard measurement conditions and measurement methods for determining the screen door effect (SDE), which is one of the image quality aspects of eyewear displays of virtual reality (VR) type.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
