## CONTENTS

FOREWORD .....	16
INTRODUCTION .....	18
1 Scope .....	19
2 Normative references .....	19
3 Terms and definitions .....	19
3.1 Information technology .....	19
3.2 Urban .....	20
3.3 Systems approach .....	21
3.4 Digital transformation .....	26
3.5 Architecting .....	28
4 Abbreviated terms .....	29
5 Linking the IEC SyC Smart Cities scope with the SCRAM and SCRA .....	30
5.1 Methodology .....	30
5.2 Problem space description .....	31
5.3 Problem space specifics .....	32
5.4 Stakeholders classification .....	33
5.5 Stakeholders and their estimated concerns .....	33
5.6 Dependency matrix "Stakeholders classification" versus "Stakeholders" .....	35
5.7 Dependency matrix "Problem space description" versus "Stakeholders" .....	35
5.8 Stakeholders' aggregated concerns .....	36
5.9 Mission statement .....	36
5.10 Dependency matrix "Problem space description" and "Problem space specifics" versus "Mission statement" .....	37
5.11 Dependency matrix "Stakeholders" versus "Mission statement" and "Stakeholders' aggregated concerns" .....	38
5.12 Vision statement .....	38
5.13 Dependency matrix "Mission statement" and "Stakeholders' aggregated concerns" versus "Vision statement" .....	39
5.14 Strategic goals .....	39
5.15 Dependency matrix "Vision statement" vs "Strategic goals" .....	40
5.16 Solution space constraints .....	40
5.17 Essential desirable characteristics of the solution space .....	41
5.18 Dependency matrix "Strategic goals" and "Solution space constraints" versus "Essential desirable characteristics" .....	41
5.19 Architecture principles of the solution space .....	42
5.19.1 Digital orientation .....	42
5.19.2 Platform-enabled agile solutions orientation .....	44
5.19.3 Capabilities, functions and processes orientation .....	48
5.19.4 Services, microservices and APIs orientation .....	50
5.19.5 Common engineering practices orientation .....	52
5.19.6 Crosscutting aspects orientation .....	54
5.19.7 Common governance, management and operations practices orientation .....	55
5.19.8 Existing knowledge orientation .....	55
5.20 Dependency matrix "Essential desired characteristic" versus "Architecture principles" .....	56
5.21 All dependencies together .....	56
6 Outline of the SCRAM .....	57

6.1	SCRAM data schema .....	57
6.2	How the SCRA will be created by the SCRAM.....	58
6.3	Tailoring the SCRAM and SCRA .....	59
6.4	Using the SCRA.....	59
7	SCRAM viewpoints .....	60
7.1	General.....	60
7.2	Value viewpoint.....	60
7.2.1	General description .....	60
7.2.2	List of associated model-types.....	61
7.3	Big picture viewpoint.....	61
7.3.1	General description .....	61
7.3.2	List of associated model-types.....	61
7.4	System-solution engineering viewpoint .....	62
7.4.1	General description .....	62
7.4.2	Architectural considerations.....	62
7.4.3	List of associated model-types.....	62
7.5	Platform engineering viewpoint .....	62
7.5.1	General description .....	62
7.5.2	List of associated model-types.....	62
7.6	Platform component engineering viewpoint .....	63
7.6.1	General description .....	63
7.6.2	List of associated model-types.....	63
7.7	Solution engineering viewpoint.....	63
7.7.1	General description .....	63
7.7.2	List of associated model-types.....	63
7.8	Crosscutting aspects engineering viewpoint.....	64
7.8.1	General description .....	64
7.8.2	List of associated model-types.....	64
7.9	Corporate viewpoint.....	64
7.9.1	General description .....	64
7.9.2	List of associated model-types.....	64
7.10	Risk management viewpoint.....	64
7.10.1	General description .....	64
7.10.2	List of associated model-types.....	64
7.11	Software factory viewpoint .....	65
7.11.1	General description .....	65
7.11.2	List of associated model-types.....	65
7.12	Standards viewpoint.....	65
7.12.1	General description .....	65
7.12.2	List of associated model-types.....	65
8	SCRAM model-types .....	65
8.1	General.....	65
8.2	Problem space description .....	66
8.2.1	General description .....	66
8.2.2	Techniques.....	66
8.2.3	Primary generated artefact-types .....	66
8.3	Problem space terminology .....	66
8.3.1	General description .....	66
8.3.2	Techniques .....	66

8.3.3	Smart cities example .....	66
8.4	Problem space specifics nomenclature .....	66
8.4.1	General description .....	66
8.4.2	Techniques .....	66
8.4.3	Primary generated artefact-types .....	67
8.4.4	Smart cities example .....	67
8.5	Problem space classifications nomenclature .....	67
8.5.1	General description .....	67
8.5.2	Techniques .....	67
8.5.3	Smart cities example .....	67
8.6	Stakeholders nomenclature .....	67
8.6.1	General description .....	67
8.6.2	Techniques .....	68
8.6.3	Primary generated artefact-types .....	68
8.7	Stakeholders' concerns nomenclature .....	68
8.7.1	General description .....	68
8.7.2	Techniques .....	69
8.7.3	Primary generated artefact-types .....	69
8.7.4	Smart cities example .....	70
8.8	Dependencies between generic stakeholders, stakeholders, stakeholders' concerns and categories of concerns model-type .....	70
8.8.1	General description .....	70
8.8.2	Techniques .....	70
8.8.3	Primary generated artefact-types .....	70
8.8.4	Smart cities example .....	70
8.9	High-level requirements nomenclature .....	71
8.9.1	General description .....	71
8.9.2	Techniques .....	71
8.9.3	Recommended activities .....	72
8.9.4	Smart cities example .....	72
8.10	High-level stories nomenclature .....	72
8.10.1	General description .....	72
8.10.2	Techniques .....	73
8.10.3	Recommended activities .....	73
8.11	High-level use cases nomenclature .....	73
8.11.1	General description .....	73
8.11.2	Techniques .....	73
8.11.3	Recommended activities .....	74
8.11.4	Primary generated artefact-types .....	74
8.12	Problem space coverage by the high-level use cases .....	74
8.12.1	General description .....	74
8.12.2	Techniques .....	75
8.13	The mission statement .....	75
8.13.1	General description .....	75
8.13.2	Techniques .....	75
8.13.3	Primary generated artefact-types .....	75
8.13.4	Smart cities example .....	75
8.14	The vision statement .....	75
8.14.1	General description .....	75

8.14.2	Techniques .....	75
8.14.3	Primary generated artefact-types .....	75
8.14.4	Smart cities example .....	76
8.15	The strategic goals nomenclature .....	76
8.15.1	General description .....	76
8.15.2	Techniques .....	76
8.15.3	Smart cities example .....	76
8.16	Solution space boundaries .....	76
8.16.1	General description .....	76
8.16.2	Techniques .....	76
8.16.3	Primary generated artefact-types .....	77
8.17	Solution space terminology .....	77
8.17.1	General description .....	77
8.17.2	Techniques .....	77
8.17.3	Smart cities example .....	77
8.18	Solution space constraints nomenclature .....	77
8.18.1	General .....	77
8.18.2	Techniques .....	77
8.18.3	Smart cities example .....	77
8.18.4	Primary generated artefact-types .....	78
8.19	Solution space classifications nomenclature .....	78
8.19.1	General .....	78
8.19.2	Techniques .....	78
8.20	Solution space essential desired characteristics nomenclature .....	78
8.20.1	General .....	78
8.20.2	Techniques .....	78
8.20.3	Primary generated artefact-types .....	78
8.20.4	Smart cities example .....	78
8.21	Dependency matrix of problem space essential high-level requirements and solution space constraints versus solution space essential desired characteristics .....	79
8.21.1	General .....	79
8.21.2	Techniques .....	79
8.21.3	Primary generated artefact-types .....	79
8.22	Solution space architecture principles nomenclature .....	79
8.22.1	General .....	79
8.22.2	Techniques .....	80
8.22.3	Smart cities example .....	80
8.22.4	Primary generated artefact-types .....	80
8.23	Dependency of between solution space essential desired characteristics versus solution space architecture principles .....	80
8.23.1	General .....	80
8.23.2	Techniques .....	80
8.23.3	Primary generated artefact-types .....	80
8.24	High-level illustrative diagrams .....	81
8.24.1	General .....	81
8.24.2	Techniques .....	81
8.24.3	Smart cities example .....	81
8.25	High-level business map .....	81
8.25.1	General .....	81

8.25.2	Techniques .....	82
8.25.3	Smart cities example .....	82
8.26	Beneficiaries' journeys nomenclature .....	82
8.26.1	General description .....	82
8.26.2	Techniques .....	83
8.26.3	Primary generated artefact-types .....	83
8.27	High-level reference capability map .....	83
8.27.1	General .....	83
8.27.2	Techniques .....	83
8.27.3	Primary generated artefact-types .....	83
8.27.4	Smart cities example .....	83
8.28	High-level process map .....	84
8.28.1	General .....	84
8.28.2	Techniques .....	84
8.28.3	Primary generated artefact-types .....	84
8.29	High-level architecture .....	84
8.29.1	General .....	84
8.29.2	Techniques .....	85
8.30	Capability map .....	85
8.30.1	General description .....	85
8.30.2	Techniques .....	85
8.30.3	Primary generated artefact-types .....	85
8.31	Low-level use cases nomenclature .....	85
8.31.1	General description .....	85
8.31.2	Techniques .....	85
8.31.3	Primary generated artefact-types .....	85
8.32	Function map .....	86
8.32.1	General description .....	86
8.32.2	Techniques .....	86
8.32.3	Primary generated artefact-types .....	86
8.33	Partners nomenclature .....	86
8.33.1	General description .....	86
8.33.2	Techniques .....	86
8.33.3	Primary generated artefact-types .....	86
8.34	Services nomenclature .....	86
8.34.1	General description .....	86
8.34.2	Techniques .....	86
8.34.3	Primary generated artefact-types .....	87
8.34.4	Smart cities example .....	87
8.35	Process map .....	87
8.35.1	General description .....	87
8.35.2	Techniques .....	87
8.35.3	Primary generated artefact-types .....	87
8.36	Decisions nomenclature .....	88
8.36.1	General description .....	88
8.36.2	Techniques .....	88
8.36.3	Primary generated artefact-types .....	88
8.37	Events nomenclature .....	88
8.37.1	General description .....	88

8.37.2	Techniques .....	88
8.37.3	Primary generated artefact-types .....	88
8.38	Data schemas nomenclature .....	88
8.38.1	General description .....	88
8.38.2	Techniques .....	88
8.38.3	Primary generated artefact-types .....	89
8.39	Information flows nomenclature .....	89
8.39.1	General description .....	89
8.39.2	Techniques .....	89
8.39.3	Primary generated artefact-types .....	89
8.40	Document/content classifications nomenclature .....	89
8.40.1	General description .....	89
8.40.2	Techniques .....	89
8.40.3	Primary generated artefact-types .....	89
8.41	Key performance indicators nomenclature .....	89
8.41.1	General description .....	89
8.41.2	Techniques .....	90
8.41.3	Primary generated artefact-types .....	90
8.42	Reports nomenclature .....	90
8.42.1	General description .....	90
8.42.2	Primary generated artefact-types .....	90
8.43	Platforms nomenclature .....	90
8.43.1	General description .....	90
8.43.2	Primary generated artefact-types .....	90
8.44	Platform overview .....	90
8.44.1	General description .....	90
8.44.2	Techniques .....	90
8.44.3	Primary generated artefact-types .....	91
8.45	Platform terminology .....	91
8.45.1	General description .....	91
8.45.2	Techniques .....	91
8.46	Platform components nomenclature .....	91
8.46.1	General description .....	91
8.46.2	Primary generated artefact-types .....	91
8.47	Platform solutions nomenclature .....	91
8.47.1	General description .....	91
8.47.2	Primary generated artefact-types .....	91
8.48	Standards and norms nomenclature .....	91
8.48.1	General description .....	91
8.48.2	Primary generated artefact-types .....	92
8.49	Platform software factory configuration .....	92
8.49.1	General description .....	92
8.49.2	Techniques .....	92
8.49.3	Primary generated artefact-types .....	92
8.50	Platform governance, management and operations manual .....	92
8.50.1	General description .....	92
8.50.2	Techniques .....	92
8.50.3	Primary generated artefact-types .....	92
8.51	Platform component overview .....	92

8.51.1	General description .....	92
8.51.2	Techniques .....	93
8.51.3	Primary generated artefact-types .....	93
8.52	Platform component terminology .....	93
8.52.1	General description .....	93
8.52.2	Techniques .....	93
8.53	Platform component capability map .....	93
8.53.1	General description .....	93
8.53.2	Techniques .....	93
8.53.3	Primary generated artefact-types .....	93
8.54	Platform component function map .....	93
8.54.1	General description .....	93
8.54.2	Techniques .....	93
8.54.3	Primary generated artefact-types .....	94
8.55	Platform component process map .....	94
8.55.1	General description .....	94
8.55.2	Techniques .....	94
8.55.3	Primary generated artefact-types .....	94
8.56	Platform component business specifications .....	94
8.56.1	General description .....	94
8.56.2	Techniques .....	94
8.56.3	Primary generated artefact-types .....	94
8.57	Platform component information specifications .....	95
8.57.1	General description .....	95
8.57.2	Techniques .....	95
8.57.3	Primary generated artefact-types .....	95
8.58	Platform component application specifications .....	95
8.58.1	General description .....	95
8.58.2	Techniques .....	95
8.58.3	Primary generated artefact-types .....	96
8.59	Platform component data specifications .....	96
8.59.1	General description .....	96
8.59.2	Techniques .....	96
8.59.3	Primary generated artefact-types .....	96
8.60	Platform component infrastructure specifications .....	96
8.60.1	General description .....	96
8.60.2	Techniques .....	96
8.60.3	Primary generated artefact-types .....	97
8.61	Platform component security specifications .....	97
8.61.1	General description .....	97
8.61.2	Techniques .....	97
8.61.3	Primary generated artefact-types .....	97
8.62	Platform component services and APIs nomenclature .....	97
8.62.1	General description .....	97
8.62.2	Techniques .....	97
8.62.3	Primary generated artefact-types .....	97
8.63	Platform component software factory configuration .....	97
8.63.1	General description .....	97
8.63.2	Techniques .....	98

8.63.3	Primary generated artefact-types .....	98
8.64	Platform component management and operations manual.....	98
8.64.1	General description .....	98
8.64.2	Techniques .....	98
8.64.3	Primary generated artefact-types .....	98
8.65	Solution overview.....	98
8.65.1	General description .....	98
8.65.2	Techniques .....	98
8.65.3	Primary generated artefact-types .....	98
8.66	Solution terminology .....	98
8.66.1	General description .....	98
8.66.2	Techniques .....	99
8.67	Solution capability map .....	99
8.67.1	General description .....	99
8.67.2	Techniques .....	99
8.67.3	Primary generated artefact-types .....	99
8.68	Solution function map .....	99
8.68.1	General description .....	99
8.68.2	Techniques .....	99
8.68.3	Primary generated artefact-types .....	99
8.69	Solution process map.....	99
8.69.1	General description .....	99
8.69.2	Techniques .....	99
8.69.3	Primary generated artefact-types .....	100
8.70	Solution business specifications.....	100
8.70.1	General description .....	100
8.70.2	Techniques .....	100
8.70.3	Primary generated artefact-types .....	100
8.71	Solution information specifications .....	100
8.71.1	General description .....	100
8.71.2	Techniques .....	101
8.72	Solution application specifications .....	101
8.72.1	General description .....	101
8.72.2	Techniques .....	101
8.72.3	Primary generated artefact-types .....	101
8.73	Solution data specifications .....	101
8.73.1	General description .....	101
8.73.2	Techniques .....	101
8.74	Solution infrastructure specifications.....	102
8.74.1	General description .....	102
8.74.2	Techniques .....	102
8.74.3	Primary generated artefact-types .....	102
8.75	Solution security specifications .....	102
8.75.1	General description .....	102
8.75.2	Techniques .....	102
8.75.3	Primary generated artefact-types .....	102
8.76	Solution services and APIs nomenclature .....	102
8.76.1	General description .....	102
8.76.2	Techniques .....	103

8.76.3	Primary generated artefact-types .....	103
8.77	Solution software factory configuration .....	103
8.77.1	General description .....	103
8.77.2	Techniques .....	103
8.77.3	Primary generated artefact-types .....	103
8.78	Solution management and operations manual .....	103
8.78.1	General description .....	103
8.78.2	Techniques .....	103
8.78.3	Primary generated artefact-types .....	103
8.79	Interoperability aspect .....	104
8.79.1	General description .....	104
8.79.2	Techniques .....	104
8.79.3	Primary generated artefact-types .....	104
8.80	Security aspect .....	104
8.80.1	General description .....	104
8.80.2	Techniques .....	104
8.80.3	Primary generated artefact-types .....	104
8.81	Privacy aspect .....	105
8.81.1	General description .....	105
8.81.2	Techniques .....	105
8.81.3	Primary generated artefact-types .....	105
8.82	Safety aspect .....	105
8.82.1	General description .....	105
8.82.2	Techniques .....	105
8.82.3	Primary generated artefact-types .....	106
8.83	Reliability and resilience management aspects .....	106
8.83.1	General description .....	106
8.83.2	Techniques .....	106
8.83.3	Primary generated artefact-types .....	106
8.84	Low cost of operations and time-to-market aspects .....	106
8.84.1	General description .....	106
8.84.2	Techniques .....	106
8.84.3	Primary generated artefact-types .....	106
8.85	Self-reference aspect .....	107
8.85.1	General description .....	107
8.85.2	Primary generated artefact-types .....	107
8.86	Organizational structure .....	107
8.86.1	General description .....	107
8.86.2	Techniques .....	107
8.86.3	Primary generated artefact-types .....	107
8.87	Governance structure .....	107
8.87.1	General description .....	107
8.87.2	Techniques .....	108
8.87.3	Primary generated artefact-types .....	108
8.88	Project management .....	108
8.88.1	General description .....	108
8.88.2	Techniques .....	108
8.88.3	Primary generated artefact-types .....	108
8.89	Corporate manual .....	108

8.89.1	General description .....	108
8.89.2	Techniques .....	108
8.89.3	Primary generated artefact-types .....	108
8.90	Independent evaluation .....	109
8.90.1	General description .....	109
8.90.2	Techniques .....	109
8.90.3	Primary generated artefact-types .....	109
8.91	Ethics, integrity and anti-corruption .....	109
8.91.1	General description .....	109
8.91.2	Techniques .....	109
8.91.3	Primary generated artefact-types .....	109
8.92	Environment and health .....	109
8.92.1	General description .....	109
8.92.2	Techniques .....	110
8.92.3	Primary generated artefact-types .....	110
8.93	Risk management aspect .....	110
8.93.1	General description .....	110
8.93.2	Techniques .....	110
8.93.3	Primary generated artefact-types .....	110
8.94	Compliance management aspect .....	110
8.94.1	General description .....	110
8.94.2	Techniques .....	110
8.94.3	Primary generated artefact-types .....	110
8.95	Regulatory management aspects .....	111
8.95.1	General description .....	111
8.95.2	Techniques .....	111
8.95.3	Primary generated artefact-types .....	111
8.96	Crime prevention and detection .....	111
8.96.1	General description .....	111
8.96.2	Techniques .....	111
8.96.3	Primary generated artefact-types .....	111
8.97	Auditing .....	111
8.97.1	General description .....	111
8.97.2	Techniques .....	112
8.97.3	Primary generated artefact-types .....	112
8.98	Independent investigation .....	112
8.98.1	General description .....	112
8.98.2	Techniques .....	112
8.98.3	Primary generated artefact-types .....	112
8.99	Crisis management .....	112
8.99.1	General description .....	112
8.99.2	Techniques .....	112
8.99.3	Primary generated artefact-types .....	112
8.100	Software factory overview .....	113
8.100.1	General description .....	113
8.100.2	Techniques .....	113
8.100.3	Primary generated artefact-types .....	114
8.101	Prototyping practices .....	114
8.101.1	General description .....	114

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**SMART CITIES REFERENCE ARCHITECTURE METHODOLOGY****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC SRD 63188, which is a Systems Reference Deliverable, has been prepared by IEC systems committee Smart Cities: Electrotechnical aspects of Smart Cities.

The text of this Systems Reference Deliverable is based on the following documents:

Draft	Report on voting
SyCSmartCities/229/DTS	SyCSmartCities/255/RVDTS

Full information on the voting for the approval of this systems reference document can be found in the report on voting indicated in the above table.

The language used for the development of this Systems Reference Deliverable is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at [www.iec.ch/standardsdev/publications](http://www.iec.ch/standardsdev/publications).

In this document, the following print types are used.

- In 5.3, 5.4, 5.5, 5.14, 5.16 and 5.17, bold is used for text fragments that will be used in some dependency matrix.
- In 8.7.2, 8.9.2, 8.10.2 and 8.11.2, various colours are used to link interrogatives and placeholders <> within questions.

This document contains attached files in the form of Excel spreadsheets. These files are intended to be used as a complement and do not form an integral part of the document. Three files are attached:

- "SCRAM Figures 1-8, 23 and 24.xlsm";
- "SCRAM Figure 26.xlsm";
- "SCRAM Figure 28.xlsm".

All these files contain some macros for generation of illustrations. However, these macros are not necessary for viewing illustrations.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under [webstore.iec.ch](http://webstore.iec.ch) in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

<p><b>IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.</b></p>
--

## INTRODUCTION

The Smart Cities Reference Architecture Methodology (SCRAM) is an adaptation of the summary of the IEC Systems Resource Group (SRG) work on systems approach (see Annex B) for the smart cities system domain. The purpose of the SCRAM is to provide a common methodology for developing the Smart Cities Reference Architecture (SCRA) which will be used as a common and tailorable template for architectures of, practically, any city system.

In 2017, when IEC SyC Smart Cities decided to work on the SCRAM, it was known that there were already various reference architectures for smart cities (see Annex C). However, the majority of these reference architectures were created under different and not publicly agreed methodologies, thus it is very difficult to make them work together. The scope of IEC SyC Smart Cities required the development of a reference architecture which is widely understood and widely used. Therefore, IEC SyC Smart Cities needed to develop the SCRAM as a publicly agreed way of doing this.

Although the primary responsibility of IEC SyC Smart Cities is electrotechnical aspects of smart cities, the SCRAM (and the SCRA) covers city systems as a whole because the electrotechnical aspects can only be properly understood in this wider context. The standardization of system elements defined by the SCRA will be done, depending on the nature of those system elements, within various SDOs. Thus, the SCRAM and the SCRA are not limited to electrotechnical aspects only.

The SCRAM provides a methodology for the SCRA to achieve necessary granularity of city system elements to allow the development of practical standards. This is governed by the scope of IEC SyC Smart Cities, which is defined by the IEC SMB as "To foster the development of standards in the field of electrotechnology to help with the integration, interoperability and effectiveness of city systems."

The SCRA covers stages 1 to 4 of summary of the SRG work on systems approach – domain analysis, system architecting, use case analysis and system modelling. Effectively, the SCRA will define for smart cities a set of capabilities, data structures, processes and interfaces which can be standardized to simplify implementation of various smart cities. This set will be used as an input for the stages 5 and 6 of the summary of the SRG work on systems approach – standards analysis and gap analysis – to map the existing standards to this set and to identify standardization opportunities to existing SyCs, TCs/SCs and other SDOs.

## SMART CITIES REFERENCE ARCHITECTURE METHODOLOGY

### 1 Scope

This document, which is a Systems Reference Deliverable, proposes a methodology that defines a coherent structure for developing Smart Cities Reference Architecture (SCRA). The Smart Cities Reference Architecture Methodology (SCRAM) reviews and defines the desired characteristics of Smart Cities, diverse SCRA viewpoints and corresponding SCRA model types in order to promote consistency and uniformity across architectures for various smart cities.

### 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
