## CONTENTS

FOREWORD.....	3
INTRODUCTION.....	5
1 Scope.....	6
2 Normative references .....	6
3 Terms and definitions .....	6
4 General approach to adult AAL care recipient safety .....	8
4.1 General.....	8
4.2 Risk assessment.....	9
4.2.1 General .....	9
4.2.2 Preventing and reducing harm .....	10
4.2.3 Risk control measures .....	10
5 Hazards related to adult AAL care recipient .....	10
5.1 General.....	10
5.2 Fall hazards .....	11
5.3 Bodily personal injury hazards .....	11
5.4 Suffocation hazards .....	11
5.5 Strangulation hazards .....	11
5.6 Fire hazards.....	12
5.7 Thermal hazards .....	12
5.8 Drowning hazards .....	12
5.9 Chemical hazards .....	12
5.10 Electric shock hazards .....	12
5.11 Radiation hazards .....	13
5.12 Hazards from noise (sound pressure).....	13
5.13 Biological hazards.....	13
5.14 Explosion and fire flash hazards .....	13
5.15 Exertion hazards.....	13
6 Adequacy of safeguards .....	14
6.1 General.....	14
6.2 Product safeguards.....	14
6.3 Installation safeguards .....	14
6.4 Personal safeguards .....	14
6.5 Behavioural safeguards .....	15
6.6 Instructional safeguards.....	15
Bibliography.....	16

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**SAFETY ASPECTS – GUIDELINES FOR ADULT AAL CARE RECIPIENTS IN STANDARDS AND OTHER SPECIFICATIONS**

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC SRD 63408 has been prepared by IEC SyC AAL: Systems Committee on Active Assisted Living. It is a Systems Reference Deliverable.

The text of this Systems Reference Deliverable is based on the following documents:

Draft	Report on voting
SyCAAL/370/DTS	SyCAAL/374/RVDTS

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Systems Reference Deliverable is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at [www.iec.ch/publications](http://www.iec.ch/publications).

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under [webstore.iec.ch](http://webstore.iec.ch) in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

**IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## INTRODUCTION

As the world population continues to experience increases in physical and cognitive limitations, a thorough understanding of the special needs/concerns of the active assisted living (AAL) care recipients is important so that these aspects can be considered in the development of technology and service standards. Ensuring the safety of an AAL user is a shared responsibility. Injury prevention can be addressed through design, engineering, manufacturing controls, legislation, education and raising awareness. These guidelines aim to provide information for consideration by providing specifications related to areas identified based on an extensive series of AAL use cases.

# SAFETY ASPECTS – GUIDELINES FOR ADULT AAL CARE RECIPIENTS IN STANDARDS AND OTHER SPECIFICATIONS

## 1 Scope

This document supports the experts in identifying hazards when developing and revising standards, specifications, and similar publications that deal with products and services for adult AAL care recipients. This document aims to address potential sources of bodily harm to adult AAL care recipients from products they use or are likely to contact, even if not explicitly intended for adult AAL care recipients.

This document provides valuable information for stakeholders in the absence of a specific standard.

Stakeholders can include auditors, safety inspectors, product designers, architects, interior home designers, installers, etc.

## 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60050-871, *International Electrotechnical Vocabulary – Part 871: Active assisted living (AAL)* (available at [www.electropedia.org](http://www.electropedia.org))

IEC TS 63134, *Active assisted living (AAL) use cases*
