## CONTENTS

FOREWORD.....	4
INTRODUCTION.....	6
1 Scope.....	7
2 Normative references .....	7
3 Terms and definitions .....	7
4 Abbreviated terms .....	8
5 Navigation tool .....	9
5.1 Objective .....	9
5.2 Definition .....	9
5.3 Expected value .....	9
5.4 Related information.....	9
6 Relationships among related activities developing IT tools in IEC.....	9
6.1 General.....	9
6.2 Categorization of functionalities .....	10
7 Requirements for navigation tools.....	10
Annex A (informative) Unified Reference Model – Map and Methodology (URM-MM) .....	13
A.1 Background.....	13
A.2 Overview.....	13
A.3 Usage .....	14
A.4 Practical use case.....	14
A.5 Illustration of relevant international standards mapping.....	18
Annex B (informative) Smart Grid Standards Map .....	21
B.1 Overview.....	21
B.2 Usage .....	22
Annex C (informative) Examples of maps developed using the Mapping Platform .....	23
C.1 Overview.....	23
C.2 IEC 61850.....	23
C.3 Cybersecurity publications inventory .....	24
C.4 TC 5 standards inventory .....	25
C.5 Smart grid map .....	26
Annex D (informative) Example of practical development scheme of IT tool .....	27
D.1 General.....	27
D.2 Discussion on digital transformation at IEC .....	27
D.3 Mapping Platform supporting the development of mapping tools .....	28
D.3.1 General .....	28
D.3.2 Technology overview .....	29
D.3.3 Project overview .....	30
Annex E (informative) Investigation of requirements of IT platforms .....	32
E.1 Two development phases of an IT tool.....	32
E.2 Analysis between navigation tools and applications based on the Mapping Platform .....	32
E.3 Functionality required in the IT platform for the navigation tools.....	33
E.4 Responsibility .....	34
Bibliography.....	35

Figure 1 – Example of an assumed IEC service system configuration .....	10
Figure A.1 – Unified Reference Model – Map and Methodology (URM-MM).....	13
Figure A.2 – Diagram of Canvas of an example production system with dynamic optimization .....	15
Figure A.3 – Diagram of Use-case of an example production system with dynamic optimization .....	15
Figure A.4 – Diagram of Function of an example production system with dynamic optimization .....	16
Figure A.5 – Diagram of Data of an example production system with dynamic optimization (first half) .....	17
Figure A.6 – Diagram of Data of an example production system with dynamic optimization (second half) .....	18
Figure A.7 – Example of "Canvas" mapping of relevant International Standards.....	19
Figure A.8 – Example of "Data" mapping of relevant International Standards .....	20
Figure B.1 – Architecture view of Smart Grid Standards Map .....	22
Figure C.1 – Collection of released maps as developed using the Mapping Platform.....	23
Figure C.2 – Draft IEC 61850 map .....	24
Figure C.3 – Draft ACSEC map.....	25
Figure C.4 – Draft TC 5 standards inventory .....	26
Figure C.5 – Smart grid map .....	26
Figure D.1 – The SMB Ad-Hoc Groups (as of 2020-10-21).....	27
Figure D.2 – Organization of SG 12 recommended by ahG 86 [2] .....	28
Figure D.3 – Examples of visual representations of objects.....	29
Figure D.4 – Example of use of objects and links .....	30
Figure D.5 – Example of the use of a tab and its elements.....	30
Figure D.6 – Management structure of masterplan implementation plans .....	31
Figure E.1 – Hypothesis of relationship between the Mapping Platform and activities in SyCs.....	33
Table 1 – Functional requirements of navigation tools.....	11
Table 2 – Non-functional requirements of navigation tools .....	11
Table 3 – Expectations for interfaces between navigation tools and domain-neutral functionalities .....	12
Table D.1 – Timetable of the Mapping Platform project .....	31
Table E.1 – A comparison result between navigation tools [NT] and applications based on the Mapping Platform [MP].....	32
Table E.2 – Mapping Platform analysis results for navigation tool implementation.....	33
Table E.3 – Analysis of responsible committees for software components during four phases.....	34

# INTERNATIONAL ELECTROTECHNICAL COMMISSION

## NAVIGATION TOOLS FOR SMART MANUFACTURING

### FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC SRD 63456 has been prepared by IEC systems committee SM: Smart Manufacturing. It is a Systems Reference Deliverable.

The text of this Systems Reference Deliverable is based on the following documents:

Draft	Report on voting
SyCSM/81/DTS	SyCSM/89/RVDTS

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Systems Reference Deliverable is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at [www.iec.ch/standardsdev/publications](http://www.iec.ch/standardsdev/publications).

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under [webstore.iec.ch](http://webstore.iec.ch) in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## INTRODUCTION

This document aims to describe external requirements in terms of navigation tools for smart manufacturing to assist the development of manufacturing systems and international standards through linking reference models, use cases, architecture, and standards. Some of the requirements mentioned in this document (including annexes) refers to additional IEC internal IT support.

With this motivation, this document contains the following clauses; Clause 5 describes an outline of the navigation tool for smart manufacturing. Clause 6 presents a view of relationships between the navigation tool and related IT resources in IEC. And Clause 7 defines external requirements. Besides, annexes show a practical example of an IT tool having similar characteristics to the navigation tool, prior works as IT tools developed in IEC, an example of a practical development scheme of IT tool in IEC, and an outline of a potential development scheme for the navigation tool through a comparative analysis with the Mapping Platform.

## **NAVIGATION TOOLS FOR SMART MANUFACTURING**

### **1 Scope**

This document describes requirements in terms of navigation tools for smart manufacturing.

### **2 Normative references**

There are no normative references in this document.
