REDLINE VERSION

High-voltage direct current (HVDC) systems – Application of active filters

CONTENTS

FOREWORD.....	5
1 Scope.....	7
2 Normative references	7
3 Terms and definitions	7
3.1 Active and passive filters.....	8
3.2 Active filter topologies	8
shunt active filter	8
3.3 Power semiconductor terms	9
3.4 Converter topologies	9
4 Active filters in HVDC applications	10
4.1 General.....	10
4.2 Semiconductor devices available for active filters.....	11
5 Active d.c. filters.....	11
5.1 Harmonic disturbances on the d.c. side	11
5.2 Description of active d.c. filters.....	12
5.2.1 General	12
5.2.2 Types of converters available	12
5.2.3 Connections of the active d.c. filter.....	14
5.2.4 Characteristics of installed active d.c. filters	16
5.3 Main components in a d.c. active filter.....	17
5.3.1 General	17
5.3.2 Passive part	17
5.3.3 Current transducer	19
5.3.4 Control system	19
5.3.5 Amplifier.....	20
5.3.6 Transformer.....	20
5.3.7 Protection circuit and arrester.....	20
5.3.8 Bypass switch and disconnectors	20
5.4 Active d.c. filter control.....	20
5.4.1 General	20
5.4.2 Active d.c. filter control methods.....	21
5.5 Example – Performance of the Skagerrak 3 HVDC Intertie active d.c. filter.....	24
5.6 Conclusions on active d.c. filters	25
6 Active a.c. filters in HVDC applications.....	26
6.1 General.....	26
6.2 Harmonic disturbances on the a.c. side of a HVDC system.....	26
6.3 Passive filters.....	27
6.3.1 Conventional passive filters.....	27
6.3.2 Continuously tuned passive filters	27
6.4 Reasons for using active filters in HVDC systems.....	28
6.5 Operation principles of active filters.....	29
6.5.1 Shunt connected active filter.....	29
6.5.2 Series connected active filter.....	30
6.6 Parallel and series configuration	30
6.6.1 General	30
6.6.2 Hybrid filter schemes	30

6.7	Converter configurations	31
6.7.1	Converters.....	31
6.8	Active a.c. filter configurations.....	34
6.8.1	Active a.c. filters for low voltage application	34
6.8.2	Active a.c. filters for medium voltage application	34
6.8.3	Active a.c. filters for HVDC applications.....	34
6.9	Series connected active filters	36
6.10	Control system	36
6.10.1	General	36
6.10.2	Description of a generic active power filter controller	36
6.10.3	Calculation of reference current.....	37
6.10.4	Synchronous reference frame (SRF).....	38
6.10.5	Other control approaches	39
6.10.6	HVDC a.c. active filter control approach	39
6.11	Existing active a.c. filter applications	39
6.11.1	Low and medium voltage	39
6.11.2	High voltage applications.....	39
6.12	Overview on filter solutions for HVDC systems	40
6.12.1	Solution with conventional passive filters.....	40
6.12.2	Solution with continuously tuned passive filters	41
6.12.3	Solution with active filters	42
6.12.4	Solution with continuously tuned passive filters and active filters.....	42
6.12.5	Study cases with the CIGRÉ HVDC model.....	42
6.13	ACfilters for HVDC installations using VSC.....	44
6.14	Conclusions on active a.c. filters	45
	Bibliography.....	46

INTERNATIONAL ELECTROTECHNICAL COMMISSION

HIGH-VOLTAGE DIRECT CURRENT (HVDC) SYSTEMS – APPLICATION OF ACTIVE FILTERS

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

This consolidated version of the official IEC Standard and its amendment has been prepared for user convenience.

IEC TR 62544 edition 1.2 contains the first edition (2011-08) [documents 22F/242/DTR and 22F/250/RVC], its amendment 1 (2016-04) [documents 22F/377/DTR and 22F/381A/RVC] and its amendment 2 (2020-02) [documents 22F/519/DTR and 22F/525/RVDTR].

In this Redline version, a vertical line in the margin shows where the technical content is modified by amendments 1 and 2. Additions are in green text, deletions are in strikethrough red text. A separate Final version with all changes accepted is available in this publication.

The main task of IEC technical committees is to prepare International Standards. However, a technical committee may propose the publication of a technical report when it has collected data of a different kind from that which is normally published as an International Standard, for example "state of the art".

IEC/TR 62544, which is a technical report, has been prepared by subcommittee 22F: Power electronics for electrical transmission and distribution systems, of IEC technical committee 22: Power electronics.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of the base publication and its amendments will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

HIGH-VOLTAGE DIRECT CURRENT (HVDC) SYSTEMS – APPLICATION OF ACTIVE FILTERS

1 Scope

This technical report gives general guidance on the subject of active filters for use in high-voltage direct current (HVDC) power transmission. It describes systems where active devices are used primarily to achieve a reduction in harmonics in the d.c. or a.c. systems. This excludes the use of automatically retuned components.

The various types of circuit that can be used for active filters are described in the report, along with their principal operational characteristics and typical applications. The overall aim is to provide guidance for purchasers to assist with the task of specifying active filters as part of HVDC converters.

Passive filters are specifically excluded from this report.

INTERNATIONAL ELECTROTECHNICAL COMMISSION

HIGH-VOLTAGE DIRECT CURRENT (HVDC) SYSTEMS – APPLICATION OF ACTIVE FILTERS

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

This consolidated version of the official IEC Standard and its amendment has been prepared for user convenience.

IEC TR 62544 edition 1.2 contains the first edition (2011-08) [documents 22F/242/DTR and 22F/250/RVC], its amendment 1 (2016-04) [documents 22F/377/DTR and 22F/381A/RVC] and its amendment 2 (2020-02) [documents 22F/519/DTR and 22F/525/RVDTR].

This Final version does not show where the technical content is modified by amendments 1 and 2. A separate Redline version with all changes highlighted is available in this publication.

The main task of IEC technical committees is to prepare International Standards. However, a technical committee may propose the publication of a technical report when it has collected data of a different kind from that which is normally published as an International Standard, for example "state of the art".

IEC/TR 62544, which is a technical report, has been prepared by subcommittee 22F: Power electronics for electrical transmission and distribution systems, of IEC technical committee 22: Power electronics.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of the base publication and its amendments will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

HIGH-VOLTAGE DIRECT CURRENT (HVDC) SYSTEMS – APPLICATION OF ACTIVE FILTERS

1 Scope

This technical report gives general guidance on the subject of active filters for use in high-voltage direct current (HVDC) power transmission. It describes systems where active devices are used primarily to achieve a reduction in harmonics in the d.c. or a.c. systems. This excludes the use of automatically retuned components.

The various types of circuit that can be used for active filters are described in the report, along with their principal operational characteristics and typical applications. The overall aim is to provide guidance for purchasers to assist with the task of specifying active filters as part of HVDC converters.

Passive filters are specifically excluded from this report.
