CONTENTS

FOREWORD.....	3
INTRODUCTION.....	5
1 Scope.....	6
2 Normative references.....	6
3 Terms and definitions	6
4 Overview of the sheet music market.....	6
4.1 Market relevance	6
4.2 Use cases for the sheet music market	7
4.3 Use cases for the digital sheet music market	8
4.4 Market structure and impact of digitization	9
5 Elements of digital sheet music infrastructure.....	9
5.1 General.....	9
5.2 Music notation markup language	10
5.2.1 General	10
5.2.2 Symbolic music representation (SMR)	10
5.2.3 Standard music description language (SMDL).....	10
5.2.4 The music encoding initiative (MEI)	10
5.2.5 MusicXML.....	11
5.2.6 LilyPond	11
5.3 Metadata for sheet music	11
5.3.1 General	11
5.3.2 The Dublin Core metadata element set.....	11
5.3.3 Music metadata style guide	11
5.3.4 The music ontology	11
5.4 Musical font and font layout.....	12
5.4.1 General	12
5.4.2 Standard Music Font Layout (SMuFL) and compliant fonts	12
5.5 Digital rights management.....	12
5.6 Reflowable sheet music.....	12
5.7 Annotation	12
6 Conclusion	12
Bibliography	13
Figure 1 – Market structure and impact of digitization	9

Table 2 – List of stakeholders	8
Table 3 – Additional use cases for digital sheet music	8

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**DIGITAL SHEET MUSIC – MARKET, USE CASES,
AND RELATED TECHNOLOGIES**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

The main task of IEC technical committees is to prepare International Standards. However, a technical committee may propose the publication of a technical report when it has collected data of a different kind from that which is normally published as an International Standard, for example "state of the art".

IEC TR 63020, which is a technical report, has been prepared by technical area 10: Multimedia e-publishing and e-book technologies, of IEC technical committee 100: Audio, video and multimedia systems and equipment.

The text of this technical report is based on the following documents:

Enquiry draft	Report on voting
100/2540/DTR	100/2648/RVC

Full information on the voting for the approval of this technical report can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

Music notation was invented more than 3 000 years ago. As it was with books, the first and biggest technological change was introduced by the invention of the letterpress in the 14th century. Since then, sheet music technology has changed only insofar as the information age and the rise of digital media have changed all media. Specific applications of technology to sheet music are still in the very early stages. Various technologies and standards exist or have been proposed as standards. Some technology, such as MusicXML [3]¹, succeeded in introducing the concept of interoperability and data compatibility to the industry, but most technologies provided little consideration for interoperability, compatibility with data and processes, or standardization for quality. In this context, the sheet music industry hasn't yet been able to offer mature digital sheet music to the market.

This Technical Report starts by reviewing the current industry and the use cases around sheet music. It then catalogues the technologies currently available in the area of digital sheet music. Finally, the report combines these two aspects to illustrate the huge potential to improve digital sheet music technology as well as the added value that standardization offers.

¹ Numbers in square brackets refer to the Bibliography.

DIGITAL SHEET MUSIC – MARKET, USE CASES, AND RELATED TECHNOLOGIES

1 Scope

This Technical Report (TR) provides information related to digital sheet music. It starts with a brief overview of the sheet music market and then explains the use cases for traditional sheet music as well as additional use cases for digitized sheet music (digital sheet music). Finally, it shows examples of each area of technology areas.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO/IEC 10744:1997, *Information technology – Hypermedia/Time-based Structuring Language (HyTime)*

ISO/IEC 14496-23:2008, *Information technology – Coding of audio-visual objects – Part 23: Symbolic Music Representation*

ISO 8879:1986, *Information processing – Text and office systems – Standard Generalized Markup Language (SGML)*

ISO 15836:2009, *Information and documentation – The Dublin Core metadata element set*
