## CONTENTS

FOREWORD.....	5
INTRODUCTION.....	7
1 Scope.....	8
2 Normative references .....	8
3 Terms and definitions .....	8
4 Reference model of smart television service .....	8
4.1 Description of general smart television service .....	8
4.1.1 General .....	8
4.1.2 Service industrial chain.....	9
4.1.3 Hierarchical architecture .....	11
4.1.4 Model of service data .....	13
4.1.5 General classification of service .....	15
4.2 Architecture of smart television service management system .....	18
4.2.1 General description .....	18
4.2.2 Service management objects .....	18
4.2.3 Service management function framework.....	19
4.3 Smart television service operations platform .....	21
4.4 Smart television content operations platform.....	21
5 Reference model of smart television service pattern .....	22
5.1 General framework of service pattern.....	22
5.2 Logic layers of smart television service pattern .....	23
5.2.1 Overview .....	23
5.2.2 Front-end user layer .....	24
5.2.3 Service layer .....	24
5.2.4 Data layer.....	24
6 Content interface of smart television service pattern.....	24
6.1 Interface specification of smart television platform .....	24
6.1.1 General architecture of platform interface .....	24
6.1.2 Electronic program list data .....	25
6.1.3 Framework of content broadcast.....	26
7 Technical requirements for smart television terminal performance .....	27
7.1 Service technical requirements .....	27
7.1.1 Communications service capacity .....	27
7.1.2 Information service capacity .....	27
7.1.3 Language input capacity .....	27
7.1.4 System setting capacity .....	28
7.2 Requirements for media processing .....	28
7.2.1 Audio and video.....	28
7.2.2 Picture .....	29
7.3 Network requirements .....	30
7.3.1 Network interface and network configuration.....	30
7.3.2 QoS strategy .....	30
7.3.3 Performance indices .....	30
Annex A (informative) Typical application scenarios of smart television .....	32
A.1 Overview.....	32
A.2 Scenario description .....	32

A.2.1	Home office scenario .....	32
A.2.2	Public media scenario .....	32
A.2.3	Game entertainment scenario .....	32
A.3	Interactive mode .....	32
A.4	Discovery mode .....	33
A.5	Connection mode .....	33
Annex B (informative)	Typical smart interaction mode of smart television .....	34
B.1	Overview .....	34
B.2	Description of interaction mode .....	34
B.2.1	Interaction via remote control .....	34
B.2.2	Interaction via voice .....	34
B.2.3	Interaction via smart touch .....	34
Annex C (informative)	Model for general service context of smart television .....	36
C.1	Overview .....	36
C.2	Definition of model .....	36
C.3	Classification of general service context of smart television .....	37
Annex D (informative)	Service model of smart television application store .....	38
D.1	Overview .....	38
D.2	Features .....	38
D.3	Model of service industrial chain .....	38
Annex E (informative)	Typical technical application of smart television .....	40
E.1	Multi-screen interaction technology .....	40
E.2	DLNA technology .....	40
Annex F (informative)	Classified identity of smart television programme list .....	42
Bibliography	.....	44
Figure 1	– Model of service industrial chain .....	10
Figure 2	– Model of hierarchical architecture .....	11
Figure 3	– Smart television service classification .....	16
Figure 4	– Relation model of service management objects .....	18
Figure 5	– Architecture of service management system .....	19
Figure 6	– Service operations platform .....	21
Figure 7	– Content operations platform .....	22
Figure 8	– Framework of service pattern .....	23
Figure 9	– Service pattern framework .....	24
Figure 10	– General architecture of platform interface .....	25
Figure 11	– Content broadcast of smart television .....	26
Figure C.1	– Definition of context model .....	36
Figure D.1	– Architecture of application store .....	39
Figure E.1	– Multi-screen interaction .....	40
Table 1	– Category grouping .....	13
Table 2	– Electronic programme list .....	26
Table 3	– Format of audio and video media .....	28
Table 4	– Audio parameters and indices .....	28

Table 5 – Video file parameters (played locally) .....	29
Table 6 – Video file parameters (played online) .....	29
Table 7 – Picture format.....	29
Table 8 – Type of picture files and parameters.....	30
Table A.1 – Home office scenario .....	32
Table A.2 – Public media scenario .....	32
Table A.3 – Game entertainment scenario .....	32
Table C.1 – Classified code of programme list content.....	37
Table E.1 – DLNA functional components .....	41
Table E.2 – Supported formats .....	41
Table F.1 – Classified code of programme list content .....	42

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

## SMART TELEVISION –

## Part 2: Framework of integrated service on smart television

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

The main task of IEC technical committees is to prepare International Standards. However, a technical committee may propose the publication of a technical report when it has collected data of a different kind from that which is normally published as an International Standard, for example "state of the art".

IEC/TR 63122-2, which is a technical report, has been prepared by subcommittee TA 1: Terminals for audio, video and data services and contents, of IEC technical committee 100: Audio, video and multimedia systems and equipment.

The text of this technical report is based on the following documents:

Enquiry draft	Report on voting
100/2904/DTR	100/3054/RVDTR

Full information on the voting for the approval of this technical report can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all the parts in the IEC 63122 series, published under the general title *Smart television*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## INTRODUCTION

This Technical Report is formulated based on the current state of the industrialization of smart television and regards open innovation, vertical integration of chain and in-depth incorporation of technology and service as fundamental principles. The intention of this document is to strengthen the innovation of smart television in terms of technology, service mode and system mechanism, to advance compatibility of smart television products, and to speed up the expansion of the application market, thereby putting forward a relevant conceptual model and standardized demand for smart television. This document applies to guide service operations and service mode implementation of smart television.

## **SMART TELEVISION –**

### **Part 2: Framework of integrated service on smart television**

#### **1 Scope**

This part of IEC 63122 specifies the service pattern conceptual model and standardized demand of smart television, illustrates the terms and related to smart television, and describes service reference model of smart television, the reference model of the service pattern as well as interfaces between various platforms.

#### **2 Normative references**

There are no normative references in this document.
