## CONTENTS

FOREWORD.....	4
1 Scope.....	6
2 Normative references .....	6
3 Terms, definitions, symbols and abbreviated terms.....	7
3.1 Terms and definitions.....	7
3.2 Symbols and abbreviated terms .....	10
4 List of measurements .....	10
5 Test conditions, materials and reagents.....	10
5.1 General information .....	10
5.2 General purpose and procedure.....	11
5.3 Test conditions .....	11
5.3.1 General requirements .....	11
5.3.2 Ambient conditions .....	11
5.3.3 Water conditions.....	11
5.4 Test equipment and material.....	12
5.4.1 Load .....	12
5.4.2 Test machine .....	12
5.4.3 Ballast soil.....	12
5.4.4 Detergent .....	13
5.4.5 Rinse aid .....	13
5.4.6 Salt.....	13
5.4.7 General microbiological laboratory equipment .....	14
5.4.8 Specific microbiological equipment.....	15
5.4.9 Measuring equipment for assessing temperature profile .....	18
5.4.10 Measuring equipment for assessing water consumption.....	19
6 Tests .....	19
6.1 Test programme.....	19
6.2 Load .....	19
6.2.1 Composition of the test load .....	19
6.3 Test machine .....	22
6.3.1 Conditioning of new test machines.....	22
6.3.2 Cleaning of test machines.....	22
6.4 Preparation of bio indicators .....	22
6.4.1 Preculture and preparation of bacteria suspension .....	22
6.4.2 Preparation of the embedding matrix .....	22
6.4.3 Cleaning and conditioning of stainless steel strips/bio indicators .....	23
6.4.4 Contamination of stainless steel strips.....	23
6.5 Determination of microbial load.....	23
6.5.1 Determination of the initial cell count .....	23
6.5.2 Determination of the remaining count .....	24
6.6 Loading and operating .....	24
6.6.1 Loading .....	24
6.6.2 Operating .....	24
7 Evaluation .....	25
7.1 General requirements .....	25
7.2 Determination of microbial reduction – Calculation of the reduction factor.....	25

7.3	Results .....	25
7.3.1	Expression of results .....	25
7.3.2	Evaluation of results .....	25
8	Test report.....	25
8.1	Documentation.....	25
8.2	Data in the test report .....	26
Annex A (informative)	Prediction of microbial inactivation .....	27
A.1	General information and purpose .....	27
A.1.1	General information .....	27
A.1.2	Purpose .....	27
A.1.3	Background .....	27
A.2	Calculation of MIE unit .....	28
A.2.1	Requirements .....	28
A.2.2	Calculation .....	29
A.2.3	Results .....	29
Annex B (informative)	Test report .....	30
Annex C (informative)	Addresses of suppliers .....	31
Bibliography.....		32

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**ELECTRIC DISHWASHERS FOR HOUSEHOLD USE –  
METHODS FOR MEASURING THE MICROBIOLOGICAL  
EFFICACY OF THE DISHWASHING PROCESS**

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC TS 63331 has been prepared by subcommittee 59A: Electric dishwashers, of IEC technical committee 59: Performance of household electrical appliances. It is a Technical Specification.

The text of this Technical Specification is based on the following documents:

Draft	Report on voting
59A/262/DTS	59A/267/RVDTS

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Technical Specification is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at [www.iec.ch/publications](http://www.iec.ch/publications).

Words in **bold** in the text are defined in Clause 3.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under [webstore.iec.ch](http://webstore.iec.ch) in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

**IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

# ELECTRIC DISHWASHERS FOR HOUSEHOLD USE – METHODS FOR MEASURING THE MICROBIOLOGICAL EFFICACY OF THE DISHWASHING PROCESS

## 1 Scope

This document applies to electric **dishwashers** for household and similar use that are supplied with hot and/or cold water.

This document deals with measurement procedures regarding the reduction of microbial contamination resulting from the use of electric **dishwashers** for household and similar use.

This document specifies methods that enable reproducible measurements. These derived measurement results can only be used for a relative statement. Absolute statements, i.e. health-related claims or conclusions about prevention or treatment of a disease or health improvement, are reserved for explicit regulatory action after a medical assessment.

This document does not apply to appliances intended to be used in medical, veterinary, or pharmaceutical applications.

This document does not address sanitization, disinfection or sterilization measures.

The dishwashing process is a complex **operation** consisting of cleaning dish items and cleaning the **dishwasher** itself. This document only focusses on the dish items to be cleaned.

## 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60436:2015, *Electric dishwashers for household use – Methods for measuring the performance*

IEC 60436:2015/AMD1:2020<sup>1</sup>

ISO 607:1980, *Surface active agents and detergents – Methods of sample division*

ISO 15883-1:2006, *Washer-disinfectors – Part 1: General requirements, terms and definitions and tests*

ISO/TS 15883-5:2005<sup>2</sup>, *Washer-disinfectors – Part 5: Test soils and methods for demonstrating cleaning efficacy*

ISO 19458:2006, *Water quality – Sampling for microbiological analysis*

NSF/ANSI 184-2019, *Residential Dishwashers*

---

<sup>1</sup> A consolidated version of this document exists, comprising IEC 60436:2015 and IEC 60436:2015/AMD1:2020.

<sup>2</sup> This standard has been revised by ISO 15883-5:2021 but the listed edition applies.

EN 10088-1:2014<sup>3</sup>, *Stainless steels – Part 1: List of stainless steels*

---

<sup>3</sup> Withdrawn.
