FOREWORD	15
9 INTRODUCTION	17
1 Scope	18
2 Normative references	19
3 Terms, definitions, symbols, abbreviated terms, and conventions	23
3.1 Terms and definitions	23
3.2 Symbols and abbreviated terms	30
3.3 Editorial conventions	31
3.4 Keywords	32
3.5 T10 Vendor ID	33
3.6 Sorting	33
3.6.1 Sorting alphabetic keys	33
3.6.2 Sorting numeric keys	34
3.7 Terminate communication	34
3.8 State machine notation	35
3.9 Using numbers in hash functions and concatenation functions	35
4 Structure and Concepts	37
4.1 Overview	37
4.2 FC-SP-2 Compliance	37
4.3 Fabric Security Architecture	37
4.4 Authentication Infrastructure	37
4.5 Authentication	38
4.6 Security Associations	39
4.7 Cryptographic Integrity and Confidentiality	39
4.7.1 Overview	39
4.7.2 ESP_Header Processing	40
4.7.3 CT_Authentication Processing	41
4.8 Authorization (Access Control)	43
4.8.1 Policy Definition	43
4.8.2 Policy Enforcement	43
4.8.3 Policy Distribution	44
4.8.4 Policy Check	44
4.9 Name Format	44
5 Authentication Protocols	45
5.1 Overview	45
5.2 Authentication Messages Structure	46
5.2.1 Overview	46
5.2.2 SW_ILS Authentication Messages	47
5.2.3 ELS Authentication Messages	48
5.2.4 Fields Common to All AUTH Messages	49
5.2.5 Vendor Specific Messages	50
5.3 Authentication Messages Common to Authentication Protocols	50
5.3.1 Overview	50
5.3.2 AUTH_Negotiate Message	51
5.3.3 Names used in Authentication	52
5.3.4 Hash Functions	53
5.3.5 Diffie-Hellman Groups	53
5.3.6 Accepting an AUTH_Negotiate Message	54

5.3.7	AUTH_Reject Message	54
5.3.8	AUTH_Done Message	57
5.4	DH-CHAP Protocol	58
5.4.1	Protocol Operations	58
5.4.2	AUTH_Negotiate DH-CHAP Parameters	60
5.4.3	DHCHAP_Challenge Message	61
5.4.4	DHCHAP_Reply Message	62
5.4.5	DHCHAP_Success Message	64
5.4.6	Key Generation for the Security Association Management Protocol	65
5.4.7	Reuse of Diffie-Hellman Exponential	65
5.4.8	DH-CHAP Security Considerations	65
5.5	FCAP Protocol	67
5.5.1	Protocol Operations	67
5.5.2	AUTH_Negotiate FCAP Parameters	70
5.5.3	FCAP_Request Message	71
5.5.4	FCAP_Acknowledge Message	74
5.5.5	FCAP_Confirm Message	76
5.5.6	Key Generation for the Security Association Management Protocol	76
5.5.7	Reuse of Diffie-Hellman Exponential	77
5.6	FCPAP Protocol	78
5.6.1	Protocol Operations	78
5.6.2	AUTH_Negotiate FCPAP Parameters	81
5.6.3	FCPAP_Init Message	82
5.6.4	FCPAP_Accept Message	83
5.6.5	FCPAP_Complete Message	83
5.6.6	Key Generation for the Security Association Management Protocol	84
5.6.7	Reuse of Diffie-Hellman Exponential	84
5.7	FCEAP Protocol	85
5.7.1	Protocol Operations	85
5.7.2	AUTH_Negotiate FCEAP Parameters	85
5.7.3	FCEAP_Request Message	86
5.7.4	FCEAP_Response Message	86
5.7.5	FCEAP_Success Message	87
5.7.6	FCEAP_Failure Message	87
5.7.7	AUTH_Reject Use	88
5.7.8	AUTH_ELS and AUTH_ILS Size Requirements	88
5.7.9	Supported EAP Methods	89
5.7.10	Key Generation for the Security Association Management Protocol	89
5.8	AUTH_ILS Specification	90
5.8.1	Overview	90
5.8.2	AUTH_ILS Request Sequence	91
5.8.3	AUTH_ILS Reply Sequence	92
5.9	B_AUTH_ILS Specification	92
5.9.1	Overview	92
5.9.2	B_AUTH_ILS Request Sequence	94
5.9.3	B_AUTH_ILS Reply Sequence	95
5.10	AUTH_ELS Specification	95
5.10.1	Overview	95
5.10.2	AUTH_ELS Request Sequence	97
5.10.3	AUTH_ELS Reply Sequence	98
5.10.4	AUTH_ELS Fragmentation	98
5.10.5	Authentication and Login	102
5.11	Re-Authentication	103
5.12	Timeouts	104

6	Security Association Management Protocol	105
6.1	Overview	105
6.1.1	General	105
6.1.2	IKE_SA_Init Overview	107
6.1.3	IKE_Auth Overview	107
6.1.4	IKE_Create_Child_SA Overview	108
6.2	SA Management Messages	108
6.2.1	General Structure	108
6.2.2	IKE_Header Payload	109
6.2.3	Chaining Header	110
6.2.4	AUTH_Reject Message Use	112
6.3	IKE_SA_Init Message	112
6.3.1	Overview	112
6.3.2	Security_Association Payload	113
6.3.3	Key_Exchange Payload	124
6.3.4	Nonce Payload	124
6.4	IKE_Auth Message	124
6.4.1	Overview	124
6.4.2	Encrypted Payload	126
6.4.3	Identification Payload	127
6.4.4	Authentication Payload	128
6.4.5	Traffic Selector Payload	128
6.4.6	Certificate Payload	130
6.4.7	Certificate Request Payload	131
6.5	IKE_Create_Child_SA Message	133
6.6	IKE_Informational Message	134
6.6.1	Overview	134
6.6.2	Notify Payload	136
6.6.3	Delete Payload	139
6.6.4	Vendor_ID Payload	140
6.7	Interaction with the Authentication Protocols	141
6.7.1	Overview	141
6.7.2	Concatenation of Authentication and SA Management Transactions	141
6.7.3	SA Management Transaction as Authentication Transaction	143
6.8	IKEv2 Protocol Details	144
6.8.1	Use of Retransmission Timers	144
6.8.2	Use of Sequence Numbers for Message_IDs	144
6.8.3	Overlapping Requests	145
6.8.4	State Synchronization and Connection Timeouts	145
6.8.5	Cookies and Anti-Clogging Protection	145
6.8.6	Cryptographic Algorithms Negotiation	145
6.8.7	Rekeying	145
6.8.8	Traffic Selector Negotiation	145
6.8.9	Nonces	146
6.8.10	Reuse of Diffie-Hellman Exponential	146
6.8.11	Generating Keying Material	146
6.8.12	Generating Keying Material for the IKE_SA	146
6.8.13	Authentication of the IKE_SA	146
6.8.14	Generating Keying Material for Child_SAs	147
6.8.15	Rekeying IKE_SAs using the IKE_Create_Child_SA exchange	147
6.8.16	IKE_Informational Messages outside of an IKE_SA	147
6.8.17	Error Handling	147
6.8.18	Conformance Requirements	147
6.8.19	Rekeying IKE_SAs when Refreshing Authentication	148

7	Fabric Policies	149
7.1	Policies Definition	149
7.1.1	Overview	149
7.1.2	Names used to define Policies	151
7.1.3	Policy Summary Object	153
7.1.4	Switch Membership List Object	154
7.1.5	Node Membership List Object	159
7.1.6	Switch Connectivity Object	163
7.1.7	IP Management List Object	164
7.1.8	Attribute Object	168
7.2	Policies Enforcement	170
7.2.1	Overview	170
7.2.2	Switch-to-Switch Connections	170
7.2.3	Switch-to-Node Connections	171
7.2.4	In-Band Management Access to a Switch	172
7.2.5	IP Management Access to a Switch	173
7.2.6	Direct Management Access to a Switch	174
7.2.7	Authentication Enforcement	175
7.3	Policies Management	175
7.3.1	Management Interface	175
7.3.2	Fabric Distribution	177
7.3.3	Relationship between Security Policy Server Requests and Fabric Actions	180
7.3.4	Policy Objects Support	180
7.3.5	Optional Data	184
7.3.6	Detailed Management Specification	185
7.4	Policies Check	193
7.4.1	Overview	193
7.4.2	CPS Request Sequence	193
7.4.3	CPS Reply Sequence	194
7.5	Policy Summation ELs	194
7.5.1	Overview	194
7.5.2	Fabric Change Notification Specification	194
7.6	Zoning Policies	195
7.6.1	Overview	195
7.6.2	Management Requests	195
7.6.3	Fabric Operations	198
7.6.4	Zoning Ordering Rules	204
7.6.5	The Client-Server Protocol	205
8	Combinations of Security Protocols	208
8.1	Entity Authentication Overview	208
8.2	Terminology	208
8.3	Scope of Security Relationships	209
8.3.1	N_Port_ID Virtualization	209
8.3.2	Nx_Port Entity to a Fabric Entity	209
8.3.3	Nx_Port Entity to Nx_Port Entity	210
8.4	Entity Authentication Model	210
8.5	Abstract Services for Entity Authentication	212
8.5.1	Overview	212
8.5.2	Authentication Service	212
8.5.3	Security Service	213
8.5.4	FC-2 Service	213
8.6	Nx_Port to Fabric Authentication (NFA) State Machine	218
8.6.1	Overview	218

8.6.2	NFA States	219
8.6.3	NFA Events	220
8.6.4	NFA Transitions	220
8.7	Fabric from Nx_Port Authentication (FNA) State Machine	226
8.7.1	Overview	226
8.7.2	FNA States	227
8.7.3	FNA Events	228
8.7.4	FNA Transitions	228
8.8	Nx_Port to Nx_Port Authentication (NNA) State Machine	236
8.8.1	Overview	236
8.8.2	NNA States	237
8.8.3	NNA Events	238
8.8.4	NNA Transitions	238
8.9	Additional Security State Machines	245
8.9.1	E_Port to E_Port Security Checks	245
8.9.2	B_Port Security Checks	246
8.9.3	Switch Security Checks with Virtual Fabrics	246
8.9.4	N_Port Security Checks with Virtual Fabrics	248
8.10	Impact on Other Standards	248
Annex A: FC-SP-2 Compliance Summary		
(normative)		249
A.1	Compliance Elements	249
A.1.1	Overview	249
A.1.2	FC-SP-2 Compliance	250
A.1.3	Conventions	250
A.2	Authentication Compliance Elements	251
A.2.1	AUTH-A	251
A.2.2	AUTH-B1	252
A.2.3	AUTH-B2	253
A.2.4	AUTH-B3	254
A.3	SA Management Compliance Elements	255
A.3.1	Algorithms Support	255
A.3.2	SA-A	257
A.3.3	SA-B	258
A.3.4	SA-C1	261
A.3.5	SA-C2	263
A.3.6	SA-C3	265
A.4	Policy Compliance Elements	267
A.4.1	POL-A1	267
A.4.2	POL-A2	268
A.4.3	POL-A3	269
A.4.4	POL-B3	270
Annex B: KMIP Profile for FC-SP-2 EAP-GPSK		
(Normative)		272
B.1	Overview	272
B.2	General	272
B.3	KMIP profile specification	272
B.3.1	FC-SP-2 EAP-GPSK Profile	272
B.3.2	FC-SP-2 EAP-GPSK Authentication Suite	272
B.3.3	FC-SP-2 EAP/GPSK Key Foundry and Server Conformance Clause	274
Annex C: Random Number Generation and Secret Storage		

(informative)	276
C.1 Random Number Generator	276
C.2 Secret Storage	276
Annex D: RADIUS Deployment	
(informative)	277
D.1 Overview	277
D.2 RADIUS Servers	277
D.2.1 Overview	277
D.2.2 Digest Algorithm	278
D.3 RADIUS Messages	278
D.3.1 Message Types	278
D.3.2 Radius Attributes	279
D.4 RADIUS Authentication	282
D.4.1 RADIUS Authentication Method	282
D.4.2 RADIUS Authentication with NULL DH algorithm	283
D.4.3 Bidirectional Authentication with RADIUS	285
D.4.4 RADIUS Authentication with DH option	286
Annex E: Examples of Proposals Negotiation for the SA Management Protocol	
(informative)	288
Annex F: Guidelines for Mapping Access Control Requirements to Fabric Policies	
(informative)	289
Annex G: Pre FC-SP-2 Fabric Policy Implementations	
(informative)	290
G.1 Overview	290
G.2 Fabric Management Policy Set	290
G.2.1 Fabric Management Policy Set Overview	290
G.2.2 FMPS Hierarchy Model	290
G.2.3 Policy Description	290
G.2.4 Policy Distribution	291
G.2.5 Signature, Version Stamp, and Timestamp	291
G.2.6 FMPS Object Structure	292
G.2.7 Fabric Initialization And Fabric Join Procedures	292
G.2.8 FMPS Payload Format	295
G.3 Fabric Binding	302
G.3.1 Fabric Binding Overview	302
G.3.2 Joining Switches	303
G.3.3 Managing User-Initiated Change Requests	303
G.3.4 Fabric Binding Objects	303
G.3.5 Fabric Binding Commands	303
G.3.6 Exchange Fabric Membership Data (EFMD)	304
G.3.7 Exchange Security Attributes (ESA)	306
G.3.8 Query Security Attributes (QSA) Version 1	308

INFORMATION TECHNOLOGY – FIBRE CHANNEL –

Part 432: Security Protocols - 2 (FC-SP-2)

FOREWORD

1. ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.
2. The formal decisions or agreements of IEC and ISO on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC and ISO National bodies.
3. IEC and ISO documents have the form of recommendations for international use and are accepted by IEC and ISO National bodies in that sense. While all reasonable efforts are made to ensure that the technical content of IEC and ISO documents is accurate, IEC and ISO cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
4. In order to promote international uniformity, IEC and ISO National bodies undertake to apply IEC and ISO documents transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC and ISO document and the corresponding national or regional publication shall be clearly indicated in the latter.
5. IEC and ISO do not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC and ISO marks of conformity. IEC and ISO are not responsible for any services carried out by independent certification bodies.
6. All users should ensure that they have the latest edition of this document.
7. No liability shall attach to IEC and ISO or their directors, employees, servants or agents including individual experts and members of its technical committees and IEC and ISO National bodies for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this ISO/IEC document or any other IEC and ISO documents.
8. Attention is drawn to the Normative references cited in this document. Use of the referenced publications is indispensable for the correct application of this document.
9. Attention is drawn to the possibility that some of the elements of this ISO/IEC document may be the subject of patent rights. IEC and ISO shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 14165-432 has been prepared by subcommittee 25: Interconnection of information technology equipment, of ISO/IEC joint technical committee 1: Information technology. It is an International Standard.

The text of this International Standard is based on the following documents:

Draft	Report on Voting
JTC1-SC25/2999/CDV	JTC1-SC25/3029/RVC

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1, available at www.iec.ch/members_experts/refdocs and www.iso.org/directives

A list of all parts in the ISO/IEC 14165 series, published under the general title *Information technology – Fibre Channel*, can be found on the IEC and ISO websites.

IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

This standard describes the protocols used to implement security in a Fibre Channel Fabric. This standard includes the definition of protocols to authenticate Fibre Channel entities, protocols to set up session keys, protocols to negotiate the parameters required to ensure frame-by-frame integrity and confidentiality, and protocols to establish and distribute policies across a Fibre Channel Fabric.

INFORMATION TECHNOLOGY – FIBRE CHANNEL –

Part 432: Security Protocols - 2 (FC-SP-2)

1 Scope

This part of 14165 is one of the Fibre Channel family of standards. This standard describes the protocols used to implement security in a Fibre Channel Fabric. This standard includes the definition of protocols to authenticate Fibre Channel entities, protocols to set up session keys, protocols to negotiate the parameters required to ensure frame-by-frame integrity and confidentiality, and protocols to establish and distribute policies across a Fibre Channel Fabric.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
