Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives or www.iec.ch/members_experts/refdocs).

ISO and IEC draw attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents and <https://patents.iec.ch>. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html. In the IEC, see www.iec.ch/understanding-standards.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 35, *User interfaces*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html and www.iec.ch/national-committees.

Introduction

For a serviced office that is defined as a part of third workplace (i.e. non-home, non-office), there are a variety of service forms and usage patterns. When users look for a serviced office from websites or by search application, it is convenient if there are icons that represent available services of serviced offices. In such a case, it is important to maintain consistency between icon representation for a service of a serviced office and the perceived service of the icon user. This document defines icons for use on websites or applications for searching for serviced offices.

Information technology — User interfaces — Icons for representing services in serviced offices

1 Scope

This document provides the icons to specify the function and to indicate status of the serviced offices and their services. The icons are used as the user interfaces for searching, booking, and advertising applications for serviced offices. This document specifies basic icons that define the functions of all serviced offices, and also specifies additional and miscellaneous icons that indicate other services. The functions specified by the icons include facilities, equipment and services for fulfilling various user needs such as working style, tools, amenities, language and accessibility needs, including older persons, etc.

2 Normative references

There are no normative references in this document.
