Foreword ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms, definitions, and abbreviated terms **1**
3.1 Terms and definitions 1
3.2 Abbreviated terms 3

4 Overview **3**
4.1 General 3
4.2 Haptic media 3
4.2.1 Structure of haptic media 3
4.2.2 MIHS streams 3
4.2.3 Temporal units and MIHS samples 4
4.3 Synchronization with other media 5
4.4 Summary of referenceable code points 5
4.4.1 Brands 5
4.4.2 Sample entry types 5
4.4.3 Box types 6
4.4.4 Track reference types 6
4.4.5 Entity grouping types 7
4.4.6 Sample grouping types 7

5 Carriage of haptic coding data **7**
5.1 General 7
5.2 MIHS streams and tracks 7
5.2.1 Referencing MIHS band tracks 7
5.2.2 Grouping MIHS band tracks 8
5.2.3 MIHS band entity group 8
5.2.4 MIHS sample entry 9
5.2.5 MIHS band sample entry 9
5.2.6 MIHS configuration box 10
5.2.7 Haptic experience description box 11
5.2.8 Haptic experience description header box 11
5.2.9 Haptic avatar description box 12
5.2.10 Haptic perception description box 13
5.2.11 Haptic perception description header box 13
5.2.12 Haptic reference device description box 15
5.2.13 Haptic channel description box 17
5.2.14 Haptic channel description header box 17
5.2.15 Haptic band description box 19
5.2.16 Sample format 20
5.2.17 Haptics presentation dependency sample group 21
5.2.18 Haptics silent unit sample group 21

6 Encapsulation and Signalling in MPEG-DASH **22**
6.1 General 22
6.2 Haptics Media MPD signalling 22
6.3 Basic MIHS track support 22
6.3.1 DASH segment and MPD signalling 22
6.4 Multiple MIHS tracks support 22
6.4.1 Alternative tracks 23
6.4.2 Alternative tracks with different bitrates and/or qualities 23
6.4.3 DASH segment and MPD signalling for bitrate switching 23
6.5 Synchronizing with other media representations 23
6.6 Signalling of Multi-track Haptics Experiences 23
6.6.1 Initialization and Media Segments 24

© ISO/IEC 2025 – All rights reserved

6.6.2 Bitstream Switching 24
6.7 Haptics experience descriptor 24
6.7.1 The hapticsExperience XML element 25
6.7.2 The hapticsAvatar XML element 26
6.7.3 The hapticsPerception XML element 26
6.7.4 The hapticsChannel XML element 27
6.7.5 The hapticsBandsDescription XML element 27
6.7.6 The hapticsBand XML element 28
6.7.7 The hapticsReferenceDevice XML element 28
Annex A (normative) **File format toolsets and brands** **30**
Annex B (normative) **MIME types and sub-parameters** **35**
Annex C (informative) **Multiple MIHS tracks and alternate groups** **36**
Annex D (informative) **Player handling of MIHS tracks** **37**
Annex E (normative) **Haptics DASH MPD Schema** **38**
Annex F (informative) **DASH MPD Examples** **41**

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives or www.iec.ch/members_experts/refdocs).

ISO and IEC draw attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents and https://patents.iec.ch. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html. In the IEC, see www.iec.ch/understanding-standards.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 29, *Coding of audio, picture, multimedia and hypermedia information*.

A list of all parts in the ISO/IEC 23090 series can be found on the ISO and IEC websites.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html and www.iec.ch/national-committees.

Information technology — Coded representation of immersive media —

Part 32:
Carriage of haptics data

1 Scope

This document specifies carriage of haptic media in ISO base media files.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO/IEC 14496-12:2022, *Information technology — Coding of audio-visual objects — Part 12: ISO base media file format*

ISO/IEC 23009-1:2022, *Information technology — Dynamic adaptive streaming over HTTP (DASH) — Part 1: Media presentation description and segment formats*

ISO/IEC/DIS 23090-31, *Information technology — Coded representation of immersive media — Part 31: Haptics Coding*
